How can you admit your *seniors* to the examination or allowing of them, not only being inferior in office and calling, but in gifts also?—*Archbishop Whitgift.*

He [Pope] died in May, 1744, about a year and a half before his friend Swift, who, more than twenty years his *senior*, had naturally anticipated that he should be the first to depart, and that, as he cynically, and yet touchingly too, expressed it, while Arbuthnot grieved for him a day, and Gay a week, he should be lamented a whole month by 'poor Pope,'—whom, of all those he best knew, he seems to have the most loved.—*Craik, History of English Literature*, vol. ii. p. 225.

Sénna. *s.* [Arabic, *sene*.] In *Botany* and *Medicine.* Plant, and leaves thereof used as a purgative infusion, of certain genera of the Labiatæ or Fabaceæ, i.e. the great class of plants akin to the pea, bean, tamarind, &c. There are several species with properties sufficiently alike to be confounded with one another: (often used *adjectivally*, or as the *first element* in a *compound*).

What rhubarb, *senna*, or what purgative drug,
Would scour these English hence!
Shakespear, Macbeth, v. 3.

Senna tree is of two sorts: the bastard *senna*, and the scorpion *senna*, both of which yield a pleasant leaf and flower.—*Mortimer, Husbandry.*

Purgative properties are the great character of this sub-order [the Cæsalpineæ]. *Senna* is their most remarkable product. The *senna* of the shops consists, according to Delile, of Cassia acutifolia and Cynanchum Argel. He says the Cassia lanceolata of Arabia does not yield the *senna* of commerce, but this statement is at variance with the positive statement of Forskhal. For the various qualities of *senna*, the reader is referred to the Flora Medica and other works in which the subject is treated specially; it will there be found that many species yield this useful drug, which, according to Pallon, is not an Egyptian product, as is usually supposed, the whole . . . of the Alexandrian product coming from Dongola. . . . Well-marked purgative properties occur in Colutea arborescens (bladder *senna*), whose leaves are used for adulterating the blunt-leaved *senna* of the druggists, Coronilla emerus (scorpion *senna*) and C. varia, which last is even poisonous; as well as in certain species of Genista, Cytisus, Robinia, Clitoria, Anagyris fœtida [plants of the sub-order Papilionaceæ]. . . . Tephrosia *senna* is used as a purgative by the people . . . of Popayan.—*Lindley, Vegetable Kingdom.*

The leaves of various species of Cassia, as C. obovata, elongata, acutifolia, . . . are imported in large quantities, . . . under the name of *senna* . . . from Alexandria, whither they are brought from Upper Egypt. They are largely mixed with the leaves of Solenostemma Argel, which, however, are thick, and not ribbed like the genuine *senna* leaves. They have a nauseous, mucilaginous, bitter taste, and yield a pale brownish-green infusion. The true *senna* leaves are distinctly ribbed, thin, generally pointed, and when chewed have a peculiar nauseous flavour, and yield a dark brown infusion. It is a griping, nauseating, and somewhat drastic purge, but a valuable addition to, or vehicle for, other purgatives. Other kinds are imported from India. . . . Various preparations of *senna* are used medicinally, and several different species of the plant are to be found in the markets supplying the drug. The Alexandrian and the Indian *senna* are chiefly used in this country. The former is collected in Nubia and Upper Egypt from the Cassia acutifolia and obovata. The latter going by the name of Tinnevelly *senna* grows in India, but in all probability is only naturalised there. It is the product of Cassia elongata. *Senna* contains a purgative principle called Cathartin, and also an odorous volatile oil.—*Moore*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Sénnight. *s.* [*seven-night*.] Week.

Time trots hard with a young maid between the contract of her marriage and the day it is solemnized: if the interim be but a *sennight*, time's pace is so hard that it seems the length of seven years.—*Shakespear, As you like it*, iii. 2.

This great source of most of the ideas we have, depending wholly upon our senses, and derived by them to the understanding, I call *sensation*.—*Locke.*

When we are asleep, joy and sorrow give us more vigorous *sensations* of pain or pleasure than at any other time.—*Addison.*

The happiest, upon a fair estimate, have stronger *sensations* of pain than pleasure.—*Rogers.*

Sensations and ideas in our knowledge are like matter and form in bodies. Matter cannot exist without form, nor form without matter: yet the two are altogether distinct and opposite. There is no possibility either of separating or of confounding them. The same is the case with sensations and ideas. Ideas are not transformed, but informed *sensations*; for without ideas, *sensations* have no form. The *sensations* are the objective, the ideas the subjective part of every act of perception or knowledge.—*Whewell, Novum Organon Renovatum, Aphorisms*, b. i. aph. vi.-viii.

The feelings connected with the movements of the body, or the action of the muscles, have come to be recognised as a distinct class, differing materially from the *sensations* of the five senses. They have been regarded by some metaphysicians as proceeding from a sense apart, a *sixth* or muscular sense, and have accordingly been enrolled under the general head of *sensations*. That they are to be dealt with as a class by themselves as much so as sounds or sights, the feelings of affection, or the emotion of the ludicrous, is now pretty well admitted on all hands.—*Bain, The Senses and the Intellect*, b. i. ch. i.

Sensátional. *adj.*

Are we then obliged to give in our adherence to the *sensational* philosophy?—*Farrar, Origin of Language*, p. 148.

2. Melodramatic: (recently applied to a certain school of novelists).

The evil spirit which inhabited the breast of the old madhouse-keeper has now migrated to another human form. Cast down from his former sphere, he now, in the guise of the low-class *sensational* novel-writer, endeavours to scare the poor lunatic from the benefits provided for him.—*Dr. Sankey, Lectures on Mental Diseases*, lect. xiii.

Sensátionalism. *s.* Doctrine of sensationalists.

Sensátionalist. *s.* One who regards the phenomena of mind as having their origin in sensations: (used *adjectivally* in the extract).

Accordingly we are not surprised to find that Locke was claimed as the founder of a *sensationalist* school, whose ultimate conclusions his calm and pious mind would have indignantly repudiated. . . . We consider this on the whole a less objectionable term than 'sensualist' or 'sensuist;' the latter word is uncouth, and the former, from the things which it connotes, is hardly fair.—*Farrar, Origin of Language*, p. 150, and note.

Sense. *s.* [Fr. *sens*; Lat. *sensus*.]

1. Faculty or power by which external objects are perceived; sight; touch; hearing; smell; taste.

This power is *sense*, which from abroad doth bring
The colour, *taste*, and *touch*, and scent, and sound,
The quantity and shape of every thing
Within earth's centre, or heav'n's circle found:
And though things sensible be numberless,
But only five the *sense's* organs be;
And in those five, all things their forms express,
Which we can touch, taste, feel, or hear or see.
Sir J. Davies, Immortality of the Soul.

Then is the soul a nature, which contains
The power of *sense* within a greater power,
Which doth employ and use the *sense's* pains;
But sits and rules within her private bower.
Ibid.

The feeling of resistance—to begin with this—is, I conceive to be ascribed, not to our organ of touch, but to our muscular frame, to which I have already more than once directed your attention, as forming a distinct organ of *sense*, the affections of which, particularly as existing in combination with other feelings, and modifying our judgments concerning these, as in the case of distant vision, for example, are not less important than those of our other sensitive organs. The sensations of this class are, indeed, in common circumstances so obscure as to be scarcely heeded or remembered by us; but there is probably no contraction even of a single muscle which is not attended with some faint degree of sensation that distinguishes it from the contraction of other muscles, or from other degrees of contraction of the same muscle.—*Dr. T. Brown, Lectures on the Philosophy of the Mind*, lect. x.

Man is the interpreter of nature, science the right interpretation. The *senses* place before us the characters of the book of nature; but these convey no knowledge to us, till we have discovered the alphabet by which they are to be read. The alphabet, by means of which we interpret phenomena, consists of the ideas existing in our own minds; for these give to the phenomena that coherence and significance which is not an object of sense. The antithesis of *sense* and ideas is the foundation of the philosophy of science. No knowledge can exist without the union, no philosophy without the separation, of these two elements. Fact and theory correspond to *sense* on the one hand, and to ideas on the other, so far as we are conscious of our ideas: but all facts involve ideas unconsciously; and thus the distinction of facts and theories is not tenable, as that of *sense* and ideas is.—*Whewell, Novum Organon Renovatum, Aphorisms*, b. i. aph. i.-v.

2. Perception by the senses; sensation.

In a living creature, though never so great, the *sense* and the affects of any one part of the body instantly make a transcursion throughout the whole. —*Bacon, Natural and Experimental History.*

If we had nought but *sense*, then only they
Should have sound minds which have their senses sound;
But wisdom grows when senses do decay,
And folly most in quickest *sense* is found.
Sir J. Davies, Immortality of the Soul.

Such is the mighty swiftness of your mind,
That, like the earth's, it leaves the *sense* behind.
Dryden, To the Lord Chancellor Hyde, 109.

3. Perception of intellect; apprehension of mind.

This Basilius, having the quick sense of a lover, took as though his mistress had given him a secret reprehension.—*Sir P. Sidney.*

God, to remove his ways from human *sense*,
Placed heaven from earth so far.
Milton, Paradise Lost, viii. 119.

4. Sensibility; quickness or keenness of perception.

He should have lived,
Save that his riotous youth, with dangerous *sense*,
Might in the times to come have ta'en revenge.

Something there is more needful than expense,
And something previous ev'n to taste; 'tis *sense*,
Good *sense*, which only is the gift of heaven,
And, though no science, fairly worth the seven:
A light within yourself you must perceive;
Jones and Le Nôtre have it not to give.
Pope, Moral Essays, iv. 41.

6. Reason; reasonable meaning.

He raves; his words are loose

And turns his brains to frenzy.

Sénsed. *part. adj.* Perceived by the senses. *Rare.*

Let the sciolist tell me, why things must needs be so as his individual senses represent them: is he sure that objects are not otherwise *sensed* by others than they are by him? And why must his sense be the infallible criterion? It may be, what is white to us is black to negroes.—*Glanville, Scepsis Scientifica.*

If any one should be found so *senselessly* arrogant as to suppose man alone knowing and wise, but yet the product of mere ignorance and chance, and that all the rest of the universe acted only by that blind hap-hazard, I shall leave with him that very rational and emphatical rebuke of Tully.—*Locke.*

Sénselessness. *s.* Attribute suggested by Senseless; folly; unreasonableness; absurdity; stupidity.

That we fall not therefore into that like ἀναλγησίαν, stupidity and *senselessness*, our way is to catch those young foxes, and strangle them in the nest.—*Hales, Golden Remains*, p. 176.

My brain began to fail when the fourth sun
Burst o'er the golden isles—a fearful sleep,
Which through the caverns dreary and forlorn
Of the riven soul, sent its foul dreams to sweep
With whirlwind swiftness—a fall far and deep—
A gulf, a void, a sense of *senselessness*—
These things dwelt in me.
Shelley, Revolt of Islam.

'Twere better to be born a stone,
Of ruder shape, and feeling none
Than with a tenderness like mine,
And *sensibilities* so fine!

Fast rooted against every rub.
Cowper, The Poet, the Oyster, and Sensitive Plant.

Is this a dagger which I see before me,
The handle tow'rd my hand? Come, let me clutch thee:
I have thee not, and yet I see thee still:
Art thou not, fatal vision, *sensible*
To feeling as to sight? *Shakespear, Macbeth*, ii. 1.

The greater part of men are no otherwise moved than by sense, and have neither leisure nor ability so to improve their power of reflection, as to be capable of conceiving the divine perfections without the assistance of *sensible* objects.—*Rogers.*

Air is *sensible* to the touch by its motion, and by its resistance to bodies moved in it.—*Arbuthnot, On the Effects of Air on human Bodies.*

Into their temper; which must needs remove
The *sensible* of pain. *Milton, Paradise Lost*, ii. 274.

b. Whatever is perceptible around us.

The creation
Of this wide *sensible*.
Dr. H. More, Song of the Soul, i. 2, 135.

Sénsibleness. *s.* Attribute suggested by Sensible.

1. Possibility to be perceived by the senses.

Nor was it altogether bodily pains that made him so; but there was something extraordinary: as, a withdrawing the *sensibleness* of divine assistance from him. As the sun at our Saviour's crucifixion, though not disjoined from the world, yet for a time deserted the world by withdrawing his light from it. And although this withholding the *sensibleness* of the divine presence was done without any aversation, or dislike, of the person of our blessed Lord, which not only before but at that very instant was tenderly beloved of God, yet the apprehension of it could not but make him bemoan his case in that sad exclamation, 'My God, my God, why (or how) hast thou forsaken me!'—*Hallywell, Saving of Souls*, p. 22: 1677.

2. Actual perception by mind or body.

The retirement or privacy used by sober women here in England, when they apply anything helpful to their looks or complexion, is no argument of any sinful shame, but of modesty, civility, and that discretion, which commands us to do many things apart from any witnesses or spectators, which yet

are no sins, but only *sensibleness* and reflexions upon those infirmities to which our vile bodies are subject. —*Jeremy Taylor, Artificial Handsomeness*, p. 167.

3. Quickness of perception; sensibility.

The *sensibleness* of the eye renders it subject to pain, as also unfit to be dressed with sharp medicaments.—*Sharp.*

4. Painful consciousness.

5. Judgement; reasonableness: (a use not admitted but in conversation).

Sénsibly. *adv.* In a sensible manner.

A sudden pain in my right foot increased *sensibly*. —*Sir W. Temple.*

The salts of human urine may, by the violent motion of the blood, be turned alkaline, and even corrosive; and so they affect the fibres of the brain more *sensibly* than other parts.—*Arbuthnot.*

2. With perception of either mind or body.

3. Externally; by impression on the senses.

That church of Christ, which we properly term his body mystical, can be but one; neither can that one be *sensibly* discerned by any, inasmuch as the parts thereof are some in heaven already with Christ.—*Hooker, Ecclesiastical Polity.*

4. With quick intellectual perception.

What remains past cure
Bear not too *sensibly*; nor still insist
To afflict thyself in vain.
Milton, Samson Agonistes, 912.

5. Judiciously; reasonably.

Sénsitive. *adj.* [Fr. *sensitif.*] Having sense or perception, but not reason.

The *sensitive* faculty may have a *sensitive* love of some *sensitive* objects, which though moderated so as not to fall into sin; yet, through the nature of man's sense, may express itself more sensitively towards that inferior object than towards God: this is a piece of human frailty.—*Hammond.*

All the actions of the *sensitive* appetite are in painting called passions, because the soul is agitated by them, and because the body suffers and is sensibly altered.—*Dryden.*

Bodies are such as are endued with a vegetative soul, as plants; a *sensitive* soul, as animals; or a rational soul, as the body of man.—*Ray.*

Sénsitive plant. *s.* Plant of the genus Mimosa so called.

Vegetables have many of them some degrees of motion, and, upon the different application of other bodies to them, do very briskly alter their figure and motion, and so have obtained the name of *sensitive plants*, from a motion which has some resemblance to that which in animals follows upon sensation.—*Locke.*

Whence does it happen, that the *plant*, which well
We name the *sensitive*, should move and feel?
Whence know her leaves to answer her command,
And with quick horror fly the neighbouring hand?
Prior, Solomon, i. 86.

The *sensitive plant* is so called, because, as soon as you touch it, the leaf shrinks.—*Mortimer, Husbandry.*

The flower consists of one leaf, which is shaped like a funnel, having many stamina in the centre: these flowers are collected into a round head: from the bottom of the flower rises the pistillum, which afterwards becomes an oblong flat-jointed pod, which opens both ways and contains in each partition one roundish seed. Of this plant the humble plants are a species, which are so called, because, upon being touched the pedicle of their leaves falls downward; but the leaves of the *sensitive plant* are only contracted.—*Miller, Gardener's Dictionary.*

'When,' cry the botanists, and stare,
'Did *plants* call'd *sensitive* grow there?'
No matter when—a poet's muse is
To make them grow just where she chooses.
Cowper, The Poet, the Oyster, and the Sensitive Plant.

A *sensitive plant* in a garden grew,
And the young winds fed it with silver dew,
And it opened its fan-like leaves to the light,
And closed them beneath the kisses of night.
And the Spring arose on the garden fair,
And the Spirit of Love felt everywhere:
And each flower and herb on earth's dark breast
Rose from the dreams of its wintry rest.
But none ever trembled and panted with bliss;
In the garden, the field, or the wilderness,
Like a doe in the noontide with love's sweet want,
As the companionless *sensitive plant.*
Shelley, The Sensitive Plant.

In certain species [of the Oxalidaceæ, plants akin to the wood-sorrels] an irritability of so marked a kind has been found as to cause them to be classed among *sensitive plants*. Averrhoa bilimbi and Oxalis sensitiva are the most remarkable; but the same irritability has been observed by Professor Morren in the European Oxalis stricta.—*Lindley, Vegetable Kingdom.*

When the leaf of a *sensitive plant* is at rest, it consists of many leaflets spreading flat, and connected in pairs along the sides of certain common leaf-stalks. When one of these leaflets is irritated, the pair to which it belongs rise upward, and apply their faces to each other; this is rapidly followed by the same action in the succeeding leaflets, and in the course of a few seconds the whole of the leaflets are in a state of collapse; then the leaf itself suddenly bends downwards; and if the plant is in very good health, the shock thus communicated to one leaf will extend to those immediately above and below it. After a time the leaf resumes its original position. Upon the approach of night, that is to say, upon the withdrawal of light, the leaf falls of itself into the same state, without any special irritation. This kind of irritability is by no means confined to the Mimosa pudica; . . . among the Leguminous order, it is also found beyond the genus Mimosa, as in the Hedysarum gyrans, whose three leaflets are in a continual state of dancing or balancing during the day. . . . Nor is such irritability confined to this order; the ternate and pinnate leaved species of Oxalis, the Dionea muscipula, and numerous other plants, exhibit similar phenomena.—*Id.*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Sénsitively. *adv.* In a sensitive manner.

The sensitive faculty, through the nature of man's sense, may express itself more *sensitively* towards an inferior object than towards God: this is a piece of frailty.—*Hammond.*

Sensórium. *s.* [Lat.] Part where the senses transmit their perceptions to the mind; seat of sense.

As sound in a bell or musical string, or other sounding body, is nothing but a trembling motion, and the air nothing but that motion propagated from the object, in the *sensorium* 'tis a sense of that motion under the form of sound.—*Sir I. Newton.*

Imagine that an immense number of fingers could be packed side by side, so that their ends made a flat surface; and that each of them had a separate nervous connection with the same *sensorium*. If anything were laid upon the flat surface formed by these finger-ends, an impression of touch would be given to a certain number of them—a number great in proportion to the size of the thing.—*Herbert Spencer, Principles of Psychology.*

Sénsory. *s.*

1. Sensorium.

Spiritual species, both visible and audible, will work upon the *sensories*, though they move not any other body.—*Bacon.*

Is not the *sensory* of animals the place to which the sensitive substance is present, and into which the sensible species of things are carried through the nerves of the brain, that there they may be perceived by their immediate presence to that substance.—*Sir I. Newton.*

2. Organ of sensation.

That we all have double *sensories*, two eyes, two ears, is an effectual confutation of this atheistical sophism.—*Bentley.*

Sénsory. *adj.* Connected with the sensorium.

The actions of sneezing, swallowing, coughing, hiccoughing, vomiting, and expelling the fæces and urine . . . are deduced . . . from those vibrations which first ascend up to the *sensory* nerves and are then detached down by the motory nerves, which communicate with them by some common trunk, plexus, or ganglion.—*Hartley, On Man*, vol. i. p. 97.

Sénsual. *adj.* [Fr. *sensuel.*]

That hour as blest when on his worthless days
The frozen hand of death shall set its seal.
Shelley, Queen Mab.

Since tyrants, by the sale of human life,
Heap luxuries to their *sensualism*, and fame
To their wide-wasting and insatiate pride,
Success has sanctioned to a credulous world
The ruin, the disgrace, the woe of war. *Ibid.*

2. Doctrine of sensationalist philosophers.

The best known, and the most elaborate attempt . . . to resolve all our mental acts and intellectual powers into various modifications of mere sensation . . . which has been made in modern times, is that of Condillac, who conceived that he was following out the principles of Locke into their legitimate consequences. . . . The theory opposed to *sensualism* is called Intellectualism. —*Brande and Cox, Dictionary of Science, Literature, and Art.*

Sénsualist. *s.* Carnal person; one devoted to corporal pleasures.

Let atheists and *sensualists* satisfy themselves as they are able; the former of which will find, that, as long as reason keeps her ground, religion neither can nor will lose hers.—*South, Sermons.*

Sensuálity. *s.* [Fr. *sensualité.*] Devotedness to the senses; addiction to brutal and corporal pleasures.

They avoid dress, lest they should have affections tainted by any *sensuality*, and diverted from the love of him who is to be the only comfort and delight of their whole beings.—*Addison.*

She was certainly pretty, but disagreeably pretty, at least Fontenoy thought so. Whether it was a certain *sensuality* in her face, that conveyed the idea of ripeness without bloom, or not,—he could not analyse the impression at the instant;—but certainly, he shrunk from her black eyes, decidedly, if indefinably. — *Hannay, Singleton Fontenoy*, b. i. ch. iv.

Sénsualize. *v. a.* Sink to sensual pleasures; degrade the mind into subjection to the senses.

Sénsuous. *adj.* Pertaining to sense; feeling.

The soul by this means of overbodying herself, given up to fleshly delights, bated her wing apace downward; and finding the ease she had from her visible and *sensuous* colleague the body, in performance of religious duty, her pinions now broken and flagging, shifted off from herself the labour of high soaring any more.—*Milton, Of Reformation in England*, b. i.

To this poetry would be made precedent as being less subtile and fine; but more simple, *sensuous*, and passionate.—*Id., Tractate on Education.*

Séntence. *s.* [Fr.; Lat. *sententia.*]

If we have neither voice from heaven, that so pronounceth of them, neither *sentence* of men grounded upon such manifest and clear proof, that they, in whose hands it is to alter them, may likewise infallibly, even in heart and conscience, judge them so; upon necessity to urge alteration, is to trouble and disturb without necessity.—*Ibid.*

If matter of fact breaks out with too great an evidence to be denied, why, still there are other lenitives, that friendship will apply, before it will be brought to the decretory rigours of a condemning *sentence*.—*South, Sermons.*

Let him set out some of Luther's works, that by them we may pass *sentence* upon his doctrines.— *Bishop Atterbury.*

2. It is usually spoken of condemnation pronounced by the judge; doom.

This acting of the sentient phantasy is performed by a presence of sense, as the horse is under the sense of hunger, and that without any formal syllogism presseth him to eat.—Sir M. Hale.

When we say, Socrates was cotemporary with the Peloponnesian war, the foundation of this assertion, as of all assertions concerning substances, is an assertion concerning the phenomena which they exhibit,—namely, that the series of facts by which Socrates manifested himself to mankind, and the series of mental states which constituted his sentient existence, went on simultaneously with the series of facts known by the name of the Peloponnesian war.—J. S. Mill, System of Logic, pt. i. ch. v. § 6.

Serf. *s.* [Lat. *servus* = slave, servant.] Predial slave; forced labourer attached to the soil. See also Villein.
A great part of them were *serfs*, and lived in a state of absolute slavery or villainage.—*Hume, History of England, Appendix II. after the Life of King John.*
The characteristic distinction of a *villein* was his obligation to remain upon his lord's estate. He was not only precluded from selling the lands upon which he dwelt; but his person was bound, and the lord might reclaim him at any time, by suit in a court of justice, if he ventured to stray. But, equally liable to this confinement, there were two classes of *villeins*, whose condition was exceedingly different. In England, at least from the reign of Henry II., one only, and that the inferior species, existed; incapable of property, and destitute of redress, except against the most outrageous injuries. The lord could seize whatever they acquired or inherited, or convey them, apart from the land, to a stranger. Their tenure bound them to what were called *villein* services, ignoble in their nature, and indeterminate in their degree; the felling of timber, the carrying of manure, the repairing of roads for their lord, who seems to have possessed an equally unbounded right over their labour and its fruits. But by the customs of France and Germany, persons in this abject state seem to have been called *serfs*, and distinguished from *villeins*, who were only bound to fixed payments and duties in respect of their lord, though, as it seems, without any legal redress, if injured by him.—*Hallam, View of the State of Europe during the Middle Ages*, ch. ii.
One of the most remarkable privileges of chartered towns was that of conferring freedom on runaway *serfs*, if they were not reclaimed by their masters within a certain time. This was a pretty general law.... The cities of Languedoc had the same privilege.... A similar custom was established in Germany; but the term of prescription was, in some places at least, much longer than a year and a day. —*Ibid.*

Sérial. *adj.* Consisting of, constituted by, having the nature of, a series.
Classification by a single attribute, which the objects possess in different degrees, may be more or less *serial*, or linear. Books may be put in the order of their dates, in single file; or if they are grouped as works in one volume, works in two volumes, works in three volumes, &c., the groups may be placed in an ascending succession.—*Herbert Spencer, Inductions of Biology*, pt. ii. ch. x. § 98.

Séries. *s.*
1. Sequence; order.
Draw out that antecedent, by reflecting briefly upon the text as it lies in the *series* of the epistle.—*Ward, Of Infidelity.*
The chasms of the correspondence I cannot supply, having destroyed too many letters to preserve any *series.*—*Pope.*
The main principle of division must of course be natural affinity; the classes formed must be natural groups: and the formation of these has already been sufficiently treated of. But the principles of natural grouping must be applied in subordination to the principle of a natural *series.* The groups must not be so constituted as to place in the same group things which ought to occupy different points of the general scale.—*J. S. Mill, System of Logic*, pt. iv. ch. viii. § 4.
2. Succession; course.
This is the *series* of perpetual woe,
Which thou, alas! and thine are born to know.
Pope.

To give these excellent words their full force, it should be known that they came not from the priesthood, but the court; and from a courtier as eminent as England ever boasted.—*Young.*
2. Important; weighty; not trifling.
I'll hence to London on a *serious* matter.

All laugh'd to find
Unthinking plainness so o'erspread thy mind,
That thou could'st *seriously* persuade the crowd

Creech, Translation of Juvenal, xiii. 54.
Justin Martyr, Tertullian, Lactantius, and Arnobius, tell us, that this martyrdom first of all made them *seriously* inquisitive into that religion, which could endue the mind with so much strength, and overcome the fear of death, nay, raise an earnest desire of it, though it appeared in all its terrors.—*Addison.*

Finds tongues in trees, books in the running brooks, *Sermons* in stones, and good in every thing.

I would have said,' cried Mr. Pecksniff, 'that the *serpent* lied. Such was my faith in Thomas Pinch, that I would have cast the falsehood back into the *serpent's* teeth, and would have taken Thomas to my heart. But I am not a *serpent*, sir, myself, I grieve to say, and no excuse or hope is left me.'—*Dickens, Martin Chuzzlewit*, ch. xxxi.

Serpent, in zoology, [is] a general name for the species of the order Ophidia. *Serpents* are divided into spurious, or Pseudophidians, and true, or Ophidians proper. The Pseudophidians, although presenting the well-marked external characters of the order, retain an imperfect pelvis, a small sternum, scapulæ, and coracoids or clavicles, hidden beneath the skin; whereby, as well as in the structure of the skull, they approach the Saurian order. . . . The true *serpents* have neither sternum nor vestige of the scapular arch. . . . Several species retain a vestige of hind-limbs, which in some even shows itself externally in the form of a small hook. The chief subdivisions of the true Ophidians are: the Amphisbænæ; the Typhlopes; the Roles (Tortrix); the Boas: the Pythons; Colubers; the Acrochords—all which tribes are non-venomous. The Pseudoboas, Rattlesnakes, Trigonocephali, and Vipers are the venomous tribes. . . . The last tribe of true *serpents* includes the Hydrophides, or sea-snakes, which have likewise a poison-gland and duct, the latter being enclosed by the last instead of the first of the maxillary series of teeth. The tail of the sea-snakes is flattened vertically, and forms their chief organ of swimming. No species of this family has yet been discovered which exceeds ten feet in length. The remains of an extinct genus of *serpents* (Palæophis), indicating species of from ten to twenty feet in length, have been discovered in the Eocene tertiary formations in Suffolk, Kent, and Sussex.—*Owen*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

The one was green, variegated with spots of black, thence called the black ophites; another, called the white ophites, was green also, but variegated with spots of white: the third was called tephria, and was of a grey colour, variegated with small black spots. Milton, Paradise Lost, vi. 174.
Tho' it is necessary, that some persons in the world should be in love with a splendid *servitude*, yet certainly they must be much beholding to their own fancy, that they be pleased at it; for he that rises up early, and goes to bed late, only to receive addresses, is really as much abridged in his freedom, as he that waits to present one.—*South, Sermons.*
In every age and country, until times comparatively recent, personal *servitude* appears to have been the lot of a large, perhaps the greater, portion of mankind. We lose a good deal of our sympathy with the spirit of freedom in Greece and Rome, when the importunate recollection occurs to us, of the tasks which might be enjoined, and the punishments which might be inflicted, without control either of law or opinion, by the keenest patriot of the Comitia, or the Council of Five Thousand. A similar, though less powerful, feeling will often force itself on the mind, when we read the history of the middle ages.... Under every denomination of *servitude*, the children followed their mother's condition; except in England, where the father's state determined that of the children, on which account bastards of female villeins were born free; the law presuming the liberty of their father.... It is not generally known, I think, that predial *servitude* was not abolished in all parts of France till the revolution. In some places, says Pasquier, the peasants are taillables à volonté, that is, their contribution is not permanent, but assessed by the lord with the advice of prud'hommes, resseants sur les lieux, according to the peasant's ability. Others pay a fixed sum. Some are called serfs de poursuite, who cannot leave their habitations, but may be followed by the lord into any part of France for the taille upon their goods. This was the case in part of Champagne, and the Nivernois.—*Hallam, View of the State of Europe during the Middle Ages*, ch. ii. and note.
None of those Roman patriots, who poniarded Julius Cæsar for aspiring to be a king, would have had the smallest scruple about crucifying a whole school of gladiators for attempting to escape from the most odious and degrading of all kinds of *servitude*.—*Macaulay, History of England*, ch. xvii.

There is a kind of *Seseli* Creticum, called also Tordylium.... There is likewise a kind of *Seseli*, which hath a root as big as a man's arm. ... There is also a kind of *seseli*, which Pena setteth forth for the first kind of Daucus... There is likewise a kind of *seseli* called *Seseli* Marsiliense, which hath leaves very much cloven or cut, and finely jagged, very much like the leaves of sweet fennel; greater and thicker than the common fennel.... Séxtant. *s.* [Fr.]

1. Sixth part of a circle.
2. Astronomical instrument made in that form.

In order to test the accuracy of graduation of a *sextant*, it is necessary to have a series of well-defined objects, the angular distances between which must be accurately known. The *sextant* under trial is made to measure these angular distances; and the results thus obtained, when compared with the correct values of these distances (supposed to be otherwise determined) will give at once the error of the instrument. Now with regard to this series of objects, the following conditions are necessary in order that they may be convenient for the purpose of testing *sextants*:—It is necessary that the objects should be distinctly seen and well defined. Luminous objects would be preferable, if these could be obtained. Luminous points would answer well. It is necessary that they should be at a very great or virtually infinite distance from the *sextant*, so that two lines proceeding from any point in the objects, the one to the index-glass, and the other to the horizon-glass, should be virtually parallel to each other. It is necessary that these objects should be at such angular distances from one another, that by means of them it may be possible to test, say every 15° of a *sextant's* arc. It is necessary that these objects should be always visible, or at least that they should be rendered visible easily, and without loss of time.—*B. Stewart*, in *Proceedings of the Royal Society*, June 20, 1867.

She will cry strawberries; nay, *shads* and mackarel.—*B. Jonson, The Alchemist.*

Baron Cuvier, in the last edition of the Règne Animal, has advanced the *shads*, of which we have two species, to the rank of a genus, on account of the deep central notch in the upper lip; and I have followed this example for the additional reason that it will the more easily and effectually afford the means of obtaining a desirable alteration in our nomenclature. According to Cuvier, most modern authors have misapplied the systematic trivial names of these two species, calling the *shad* with teeth, and several spots along each side, C. Alosa; and the larger *shad* without teeth, and with a single spot only behind each gill-cover, or none at all, Clupea finta. The Alosa of Rondeletius is not described or figured as possessing either teeth or spots; and Cuvier, by his usual research, had probably satisfied himself that the fish to which the term Alosa had been originally applied was a toothless *shad*, and that the toothed and spotted shad was the true Finta. Pennant, in noticing the second British species of *shad* taken in the Thames and the Severn, which is without teeth or the row of lateral spots, called it an Allis; a name which it would be desirable still to retain, in reference to the generic term Alosa. The old name for the *shads* was Lachia; and hence are derived Hallachia, Alachia, Alosa, Alose, and Allis or Alice.—*Yarrell, History of British Fishes.*

Shale. *s.*

1. Husk; case of the seeds in siliquous plants.

Shale [is] a black slaty substance, or a clay hardened into a stony consistence, and so much impregnated with bitumen, that it becomes somewhat like a coal. It forms large strata in Derbyshire.—*Chambers.*

Coals and aluminous earths, or *shale.*—*Philosophical Transactions*, vol. li. p. 591.

Shale is a name given to certain argillaceous rocks, which split in some degree like slate, but much less perfectly, and are so little altered as to be easily reducible to clay by mechanical rubbing and pounding. *Shales* are very common in the coal measures. ... Some *shales* contain a marked proportion of bituminous matter capable of being separated by distillation at a low and regulated temperature. These are called bituminous *shales*. ... *Shales* differ from schists in being almost entirely argillaceous and slightly metamorphic. ... They differ from slates in being less perfectly metamorphosed. The *shales* in the coal measures are often loaded with fossil plants, which are very slightly changed. Slates, when they contain fossils, exhibit them in a greatly altered state, and schists contain only inorganic and crystalline minerals. Notwithstanding these broad distinctions, the young geologist may occasionally find difficulty in distinguishing *shales* from slates, and either of these rocks from schists.—*Ansted*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Shale. *v. a.* Peel; shell.

Shall. *v. defective.* This is the entry, which, with what immediately follows, gives the notice as it stands in the original editions: In Chaucer, 'The faithe I *shall* to God,' means the faith I *owe* to God: thence it became a sign of the future tense. The French use *devoir, dois, doit*, in the same manner, with a kind of future signification; and the Swedes have *skall*, and the Icelanders *skal*, in the same sense. It has no tenses but *shall* future, and *should* imperfect. The explanation of *shall*, which foreigners and provincials confound with *will*, is not easy; and the difficulty is increased by the poets, who sometimes give to *shall* an emphatical sense of *will*: but I shall endeavour, *crassâ Minervâ*, to show the meaning of *shall* in the future tense.

I shall love. It will be so that I must love; I am resolved to love.

Shall I love? Will it be permitted me to love? will you permit me to love? will it be that I must love?

Thou shalt love. I command thee to love; it is permitted thee to love: (in poetry or solemn diction), it will be that thou must love.

Shalt thou love? Will it be that thou must love? will it be permitted to thee to love?

He shall love. It will be that he must love; it is commanded him that he love.

It is a mind
That *shall* remain a poison where it is,
Not poison any further.—*Shall* remain!
Hear you this triton of the minnows? Mark you
His absolute *shall? Shakespear, Coriolanus*, iii. 1.

See Romulus the great ...
This prince a priestess of your blood *shall* bear,
And like his sire in arms he shall appear.
Dryden, Translation of the Æneid, vi. 1055.

That he *shall* receive no benefit from Christ, is the affirmation whereon all his despair is founded; and the one way of removing this dismal apprehension, is to convince him that Christ's death, and the benefits thereof, either do, or, if he perform the condition required of him, *shall* certainly belong to him.—*Hammond, On Fundamentals.*

Shall he love? Is it permitted him to love? In solemn language, Will it be that he must love?

The plural persons follow the signification of the singulars.—*Johnson.*

The chief points connected with this verb (laying aside those which relate to *should* as its *preterit tense*, and which will be considered under that entry) are: 1. and 2. Its form and original import; 3. Its peculiar use in English as determined by the person of the pronoun with which it stands in combination.

1. *Its form.*—*Shall* is no true present tense, but a *perfect*; a perfect after the manner of τέτυφα, or the Greek reduplicates, and not a preterit or aorist, after the manner of ἔτυψα. In English, then, it is in the same class as *swam, rose*, and the like, i.e. a past tense formed by changing the vowel, rather than one formed by adding *t, d*, or *ed*; as *moved, called*. Premising, then, that the perfect differs from the aorist by implying that a past action is continued up to the time of speaking about it, and is, so far, present as well as preterit, it is easy to show that this approximate identity has left its traces in more languages than one. Where the *past* action is a *cause*, its *effect* may have the import of a present; and *I have learnt* may thus stand for *I know*; or *I have been constrained*, for *I must*. Thus in Greek it is usual to translate οἶδα as *I know*; and, *vice versâ*, ἥκω as *I have come*, i.e. *here I am*. Can (q.v.) is a word of the same kind, = *I have become able*. The present tense, however, of *can*, is one with which we are familiar, being *ken*. Of *shall*, the present is only to be got at by inference; the word being defective not only in English, but in all the allied languages; and it will be seen that upon its *import* there is a conflict of opinion. In respect to its *form*, there is more unanimity. Substitute *i* for *a*, and *skil* results as the uninflected form of the present. Of this, *skal* is the perfect; a perfect which, in respect to its meaning, comports itself as a present; and, so doing, gives origin to a secondary form in *-d* (as *moved*, and *called*, &c., from *move* and *call*, &c.), which is preterit rather than perfect, though not (as may be seen under Should) wholly so. The following table gives us the inflections of the allied languages; the term *present* being used for what is etymologically a *perfect*, in conformity with custom rather than strict propriety. In like manner the preterit is, in respect to its origin, more of a pluperfect than ought else. Gothic—present, sing. *skal, skalt, skal*; dual, *skulu*, &c.; plur. *skulum*, &c.; preterit, sing. *skulda, skuldes, skulda*; plur. *skuldêdum*, &c. Old High German—present, sing. *scal, scâlt*, &c.; plur. *skulumês*, &c.; preterit, *scolta*, &c.; conjunctive, present, *sculi*, &c.; preterit, *scolti*; infinitive, *scolan* (debere). In Notker, the forms are *scl, solt, sulen, solta, sule, solte, sulan*. Old Saxon—present, sing. *skal, skalt, skal*; plur. *skulum*, &c.; preterit, *skolda*, &c. Anglo-Saxon—present, sing. *sceal, scealt, sceal*; plur. *sculon*, &c.; preterit, *sceolde*, &c. Old Frisian—present, sing. *skël* or *skil*, &c.; plur. *skëlon* or *skilon*, &c.; preterit, *skolde*, &c. Icelandic or Old Norse—present, sing. *skal, skalt, skal*; plur. *skulun*, &c.; preterit, *skuldi*, &c. Modern High German—present, sing. *soll, sollst, soll*; plur. *sollen*, &c.; preterit, *sollte*, &c.; conjunctive, *solle*, &c. This tells us:—1. That none of the allied languages, though in all of them the verb is defective, have fewer forms than the English, and that some of them have more, viz. an infinitive and a conjunctive, not to mention the existence of a plural number. 2. That in this plural, as well as in the preterit, there is a change of vowels. 3. That the second person ends in *t*. In the Gothic there are other verbs which do so; while in English we have *will, wilt*. 4. That *sh-* is softened not only into *sh-*, but into *s-*. In the Dutch the *l* disappears in the preterit giving *zoude*, and even *zou*. 5. That in the Old High German the sense of the infinitive is *debere* (the example is taken from a gloss). The same sense may be found in English, e.g. in the extract from Chaucer.

2. *Its original import.*—The current doctrine is probably that of Grimm, who deduces the present sense of the verb from that of *owe*, itself deduced from that of *kill*—killers being under certain liabilities, and, as such, owers.

'*Skal*,' debeo, implies a form *skila*: but the reader will be surprised at the original meaning, which I affix to these words. '*Skila*' must have meant 'I kill or wound;' '*skal*,' 'I have killed or wounded, and am therefore liable to pay the wergeld.' We find the Gothic '*skilja*' lanio (1 Corinthians, x. 25); and I believe that to the same source may be traced the Old High German 'scëlmo,' 'pestis,' and 'scëlmic,' 'morticinus.' ... Perhaps, too, the Old Norse '*skilja*,' 'discriminare,' 'intelligere,' may be added; if we are justified in supposing the original notion was that of dissection, or cutting to pieces, 'dilaniare,' 'discindere,' 'diffindere.' We shall no longer at any rate, be embarrassed to explain why in Ulfilas 'dulgs' mean 'debitum,' 'a debt,' whilst in Anglo-Saxon, '*dolg*,' and in the Old High German, '*dôlgr*,' is 'an enemy.' The infliction of a wound was as much the subject of the wergeld as a deadly blow; and the expressions 'sculd' and 'dulgs' illustrate one another completely. 'Dulgis kula' and 'dulgis haitja' are used by Ulfilas for the debtor and creditor respectively, 'he who owes the debt' and 'he who bids it' or demands it.—*Translation* (in *Shall and will*, p. 75) *from Grimm's History of the German Language*, b. ii. p. 902.

The following extracts suggest a closer connection with *skil* (see Skill, *v. n.*) denoting *difference* (*what skills it?* = what difference does it make?).

The sense of liability or indebtedness is explained by Grimm on the supposition that the original meaning of *skall*, was I have slain; thence, I have become liable for the weregilt. A more satisfactory explanation may be found in Norse *skil, skjel, skyl*, separation, difference, distinction. ... In the same way *odds*, difference, is vulgarly used in the sense of consequence, tendency to produce an effect. 'It's no odds which you take.' The term signifying difference is there applied to that from whence the difference proceeds, the reason, cause, grounds of an action, the sake or that on account of which it is done, the proper principles of action, equity, justice.—*Wedgwood, Dictionary of English Etymology.*

Let [the] opposition or contrast of [*shall*] to *will*, lead us towards an inkling of its meaning. If *will*, mean agency determined by the volition of the agent, *skil* may mean agency determined by causes acting from without upon and through the agent; the agent who may more properly be considered as an instrument. Let us say that *will* means having the intention to do so and so, whilst *shall* means

being in the condition to do so and so.... Now such expressions as the condition to do so and so, and the bias to do so and so, are by no means widely separated in meaning; inasmuch as the term bias implies external influence, rather than internal resolve. The ideas of determination and decision are visibly allied to one another. A decided man is (in the first instance) one whom events have brought to a decision; just as a determined man is one whom events have brought to a determination. To keep in this state shows firmness of character, and hence the ordinary power of the word, *decide, distinguish, differ*; I submit that the sequence of ideas here is transparently clear. Now *skil=differ, distinguish, separate.* It is the Norse word *skilja*, so translated. It is also the English word in the phrase, what *skills* it?=what difference does it make?—*Dr. R. G. Latham, The English Language.*

Dr. Jamieson's learned researches have enabled us to throw some light upon the great Shibboleth of modern English speech—the peculiar use of the auxiliaries *will* and *shall*; by their unskilfulness in which, more perhaps than by any other peculiarities, our countrymen are so often bewrayed. It is not, we trust, entirely out of resentment towards this unlearnable system of speaking, that we are induced to say that this is one of the most capricious and inconsistent of all imaginable irregularities, and at variance, not only with original etymology, but with former usage, and substantially with itself.—*Edinburgh Review*, no. 94: 1828.

Our future, or at least what answers to it, is I *shall*, thou *wilt*, he *will*. When speaking in the first person, we speak submissively; when speaking of ... another, we speak courteously.... When the use of *shall* does not convey any appearance of infringing on another's free will, it is still employed in the old way to express futurity.—*C. J. Hare*, in *Philological Museum*, vol. ii. p. 219.

Archdeacon Hare's Usus Ethicus is taken from the brighter side of human nature; it explains *I shall, thou wilt*, but I cannot think it explains *I will, thou shalt.* The present explanation is taken from the darker side.... It seems to be the natural disposition of man to think of his own volition in the two following categories, and of another man's in the other two: Compelling, non-compelling; restrained, non-restrained. The ego, with reference to the non-ego, is apt, thinking of himself, to propound the alternative, 'Shall I compel, or shall I leave him to do as he likes?' So that, thinking of the other, the alternative is 'Shall he be restrained, or shall he be left to his own will?' Accordingly, the express introduction of his own will is likely to have reference to compulsion, in case of opposition; the express introduction of the will of another is likely to mean no more than the gracious permission of the ego to let the non-ego do as he likes. Correlatively the suppression ... of reference to his own will, and the adoption of a simply productive form, on the part of the ego, is likely to be the mode with which, when the person is changed, he will associate the idea of another having his own way, while the suppression of reference to the will of the non-ego is likely to infer restraint produced by the predominant will of the ego.—*De Morgan*, in *Transactions of the Philological Society*, p. 186: 1850.

It is considered that the difference between being determined by the will and by circumstances other than the will, best agrees with the explanation of Hare, which the editor considers to be the true one. The rule itself is best laid down by Wallis. 'In the first person *shall* simply predicts; *will* promises or threatens. In the second and third persons, *shall* promises; *will* simply predicts.—Uram, *I shall burn*; ures, *thou wilt burn*; uret, *he will burn*; uremus, *we will burn*; uretis, *ye will burn*; urent, *they will burn.* Here I *predict—I will burn; thou shalt burn; he shall burn; we will burn; ye shall burn; they shall burn.* This I warrant, or will bring about—hoc futurum *spondeo*, vel *faxo* ut sit.'

1. In *Navigation.* Apparatus for raising heavy weights.

The easiest-formed *sheers* are made of two spars lashed together near the top with a block suspended from the point of intersection. The resemblance borne by such spars to an open pair of shears is said to have suggested the name. In permanent *sheers*, employed in dockyards, the upper ends of the spars are cut off, the tops joined by an iron cap and bolts, the bases firmly set in masonry, and the apparatus is lowered or raised by chains working to the top of a massive mast, rising vertically from between the feet of the spars. In some instances a pair of *sheers* is placed on each side of the centre spar, the whole being built on a stone causeway, between two basins. A *sheer-hulk* is an old hull fitted with *sheers*. It has the advantage of locomotion, but the weight of modern boilers and masts is so great as to have caused the *sheer-hulk* to become nearly obsolete. Its place has in some degree been taken by the derrick.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

2. In *Artillery.* See extract.

Sheers [are] two spars from thirty to forty feet long, lashed together at one end. Their other ends are planted in the ground, the lashed ends being raised by tackle, and fixed by guy ropes. Teals, *sheldrakes*, and peckled fowls, that come hither in winter out of Scandia, Muscovy, &c.—*Burton, Anatomy of Melancholy*, p. 66.

The *shelldrake*, or *shieldrake*, is one of the most beautiful in appearance of our ornamental waterfowl. . . . Some are constantly found on the sea coast, and that during the whole year, preferring flat shores, sandy bars, and links, where it breeds in rabbit burrows, or other holes in the soft soil, and hence has obtained the name of burrow duck, and bar gander, which Dr. Turner considers is derived from berg and gander, because it also builds in rocks. In Scotland it is called skeeling goose, according to Sibbald and other writers since his time. Many *shelldrakes* come from the north to visit this country for the winter, returning again in spring. The young *shelldrakes*, directly after being hatched in the rabbit burrows, are taken by the parent birds to the sea, where they may be seen in what the boatmen call troops of from thirty to forty; but as the female seldom hatches more than fourteen eggs, it is clear that each flock is formed by two or three broods. On their being approached, the old ones fly away, and leave the young to shift for themselves by diving.—*Yarrell, History of British Birds.*

Sheldrake [is] the common name of the species of duck called Anas tadorna, which is the type of the subgenus Tadorna of Ray and modern ornithologists. This elegant species frequents many parts of our coast, and remains throughout the year. The female commonly selects a rabbit-hole in which to deposit her eggs, which are sometimes as many as sixteen in number. The *sheldrake* feeds on small fish, marine insects, and sea-weed.—*Owen*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Should. Although a past tense of *shall*, this word is entered separately in the previous editions; and it is left to stand so in the present. It may be compared with *ought*, the preterit of *owe*, with a present sense; and more particularly with *would*. What follows is the notice of the previous editions. A fuller one, by the present editor, will be found under Would.

I should go. It is my business or duty to go.

If I should go. If it happens that I go.

Thou shouldst go. Thou oughtest to go.

If thou shouldst go. If it happens that thou goest.

The same significations are found in all the others singular and plural.

Than safety *should*.

So subjects love just kings, or so they *should*.
Dryden.

Used for *would*, formerly; and in later times for *could*, *may*, *might*, *must*. It has been well observed that this sign respects time variously; the present, the past, and the future. When it respects the present, it generally implies duty or obligation, fitness, propriety, decency, or reasonableness; is often used in the way of supposition, and of comparison upon supposition; often also marks conduct or event as involuntary or accidental; often carries doubt in it; and seems frequently to mark the power, energy, influence, or force of things upon the speaker, or otherwise; and it follows interjections of grief. In denoting time past, it either implies doubt, or marks the event as involuntary or accidental. But of all the other periods of time, the future seems to be that in which *should* most frequently makes its appearance. It marks the hypothetical, and denotes the common future; in both cases it is still conditional, never absolute. It refers to the hypothetical future; and, in doing so, marks the event either as doubtful and precarious, or as conditional and preparatory to somewhat else, or as highly probable but fit to be prevented, or as predetermined. Whilst it respects the common future, it either puts the event in the way of supposition, or marks it as precarious, or as certain in the highest degree, or as conditionally certain, or as certain but improper, or as certain but involuntary, or threatens, or follows verbs of desire or wishing, or denotes the event to be fit or proper.

Should is sometimes omitted, as when it marks the event as precarious.

I pray you, sir, receive the money now,
For fear *you ne'er see* chain nor money more.
Shakespear, Comedy of Errors, iii. 2.

Should be. Proverbial phrase of slight contempt or irony.

I conclude that things are not as they *should* be.—*Swift.*

The girls look upon their father as a clown, and the boys think their mother no better than she *should be*.—*Addison.*

Should have. This sign barely points at the supposed existence of an event, or circumstance of conduct, in former time; or places that supposed behaviour as the result of something that preceded or might have preceded it; and, in doing this, either puts the event in the way of supposition, or marks it as accidental, or as involuntary, or as certain, or as morally or naturally fit and becoming; and is also found in the hypothetical future, or marking an imaginary event or behaviour as proceeding from or succeeding in course of time to some other action, or incident, imaginary or otherwise; and thus marks the event, or action, either as precarious, or as accidental, or in a comparative view, or as certain; and carries in it frequently an intimation of natural or civil right and title to a thing, and gives the highest assurance.

There is another signification now little in use, in which *should* has scarcely any distinct or explicable meaning. *It should be* differs in this sense very little from *it is*.

There is a fabulous narration, that in the northern countries there *should be* an herb that groweth in the likeness of a lamb, and feedeth upon the grass. —*Bacon, Natural and Experimental History.*

Shrapnel shell in artillery [is] a shell invented by General Shrapnel of the Royal Artillery. The projectile originally consisted of a thin iron shell filled with balls, sufficient powder being inserted with the balls to cause, when ignited by the fuse, the bursting of the shell; it was designed to act as case or grape at longer range than was attainable by those projectiles. Hence it was also called spherical case-shot. The essence of the shell's construction is that the bursting charge should be so small as merely to open the shell, allowing the bullets to continue in flight with unimpeded velocity. Improved *shrapnel* shells had the bursting charge separated from the balls by being placed in a cylinder in the middle of the shell. In the diaphragm *shrapnel* shell the powder is separated by an iron diaphragm from the bullets, all space between which is filled up with coal-dust. *Shrapnel* shells should burst about fifty yards short of the object, and should not be fired at very long ranges, or the bullets will not have sufficient velocity.—*Brackenbury*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

A *shrew-ash* is an ash whose twigs or branches, when applied to the limbs of cattle, will immediately relieve the pains which a beast suffers from the running of a *shrew-mouse* over the part affected; for it is supposed that a *shrew-mouse* is of so baneful and deleterious a nature, that, whenever it creeps over a beast, be it horse, cow, or sheep, the suffering animal is afflicted with cruel anguish, and threatened with the loss of the use of the limb. Against this accident, to which they were continually liable, our provident forefathers always kept a *shrew-ash* at hand, which when once medicated, would preserve its virtue for ever. A *shrew-ash* was made thus:—into the body of the tree a deep hole was bored with an auger, and a poor devoted *shrew-mouse* was thrust in alive, and plugged in, no doubt with several incantations long since forgotten.—*White, Natural History of Selborne*, pt. ii. ch. xxvii.

Mr. Loveday used to style *shyness* the English madness. If indulged, it may be the cause of madness, by driving men to shun company, and live in solitude; which few heads are strong enough to bear; none, if it be joined with idleness. Or it may be the effect of madness, which is misanthropic and malignant: some say, pride is always at the bottom. —*Jones, Life of Bishop Horne*, p. 397.

The true rule is this. Words ending in *y* . . . preceded by a consonant, if they assume an additional syllable, change *y* into *i*. The exceptions to this are, 1. when the additional syllable begins with *i*; 2. when the original word is a monosyllable; though before *ed* even monosyllables change *y* into *i*, as *dried*; for when a single letter forms a fourth or fifth part of a whole word, the eye is not easily reconciled to the loss, nor consequently to the change. We should therefore write *shyly* and *shyness*.—*Todd*, in *Nares's Orthoepy*, p. 310.

Sílica. *s.* See extract.

It constitutes the principal portion of most of the hard stones and minerals which compose the crust of the globe; occurring nearly pure in rock-crystal, quartz, agate, calcedony, flint, &c. *Silica* or silicic acid may be obtained perfectly pure, and also in the finest state of comminution, by taking the precipitate formed by passing silicated fluoric gas through water, filtering, washing, and igniting it, to expel the last traces of the fluoride of *silicon*. The powder thus obtained is so light as to be blown away with the least breath of air. ... *Silica* is composed of 48·04 *silicon*, and 51·96 oxygen.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

The product of the combustion is a brown cinder, which on being thrown into water disengages hydrogen with violence, and lets fall a dark liver-brown powder, upon which water exercises no action. The known existing representatives of the *Sirenian* order are the Dugongs and the Manatees: the latest extinct form is the edentulous *Sirenian*, called 'Steller's sea-cow,' last observed in the arctic seas off the shores of Bering's Island: the miocene extinct genus has left its remains in southern Europe.—*Owen, Anatomy of Vertebrates*, vol. iii. p. 429.

Skéleton. *s.* [Gr. σκελετός.]

1. In *Anatomy*. Bones of the body preserved together as much as can be in their natural situation; bony framework of the body.
   When rattling bones together fly,
   From the four corners of the sky;
   When sinews o'er the *skeletons* are spread,
   Those clothed with flesh, and life inspires the dead.
   Dryden.
   Though the patient may from other causes be excedingly emaciated, and appear as a ghastly *skeleton*, covered only with a dry skin, yet nothing but the ruin and destruction of the lungs denominates a consumption.—*Sir R. Blackmore*.
   I thought to meet, as late as Heaven might grant,
   A *skeleton*, ferocious, tall, and gaunt,
   Whose loose teeth in their naked sockets shook,
   And grinned terrific, a Sardonian look. *Harte*.
   The *skeletons* of nations were
   Around that lonely man.
   Campbell, The Last Man.
2. Compages of the principal parts.

Sképtic. *s.* [Gr. σκεπτικός.] One who doubts, or pretends to doubt, of everything. (Such is the explanation in the previous editions. At present, the term is less offensive in its application, and often suggests little more than hesitation and caution in the adoption of received opinion; as such it nearly coincides with critical).

He is a *scepticke*, and dares hardly give credit to his senses.—*Bishop Hall, Characters*, p. 151; 1608.

Bring the cause unto the bar; whose authority none must disclaim, and least of all those *scepticks* in religion.—*Dr. H. More, Decay of Christian Piety.*

In this word the use and wont, according to which the second consonant is sounded, have been sufficiently influential to retain in the spelling the *k*, as the equivalent to the Greek κ. In *ascetic*, the doctrine that that letter must be represented by the Latin *c*, has exerted an opposite influence, and *ascetic* is pronounced *assetic.* Should uniformity on this point ever be insisted on, it is the precedent of the word under notice which should be adopted.

Skew. *s.* In *Architecture.* See extract.

The term *skew* is still used in the north for a stone built into the bottom of a gable, or other similar situation, to support the coping above. It appears formerly to have been applied to the stones forming the slopes of the set-offs of buttresses, and other projections. *Skew-table* was probably the course of stone weathered, or sloped, on the top, placed as a coping to the wall. It may perhaps have been applied to the sloping tabling commonly used in mediæval architecture over the gable-ends of roofs, where they abut against higher buildings, of which examples are to be seen on the towers of many churches which have had the main roofs lowered; or it may be a racking coping formed of solid blocks, with horizontal joints, and built into the walling; a mode of construction which is common in the churches of Normandy.—*Glossary of Architecture.*

Their food is fish, but they devour also the smaller water birds and their eggs, the flesh of whales, as well as other carrion, and are observed to tear their prey to pieces, while holding it under their crooked talons. The question as to spelling of dissyllabic compounds and derivatives from monosyllables ending in *y*, can scarcely be considered a settled one. The first rule that applies to it is that *y*, when sounded as a *vowel* (i.e. not a semivowel), is limited to the *end* of words; moreover that, at the end of words, it is preferred to either *ee* or *i* (i.e. to any ordinary vowel). It is evident, however, that the addition of a second element, by depriving *y* of its final character, involves the substitution of *i*; e.g. *merry, merriment, merrily.* The difficulty, however, which attends the present word is the fact of there being *two y*'s. *Slyness* is, perhaps, better than *sliness*; but *slily* is, perhaps, better than *slyly.*

Smállage. *s.* [Lat. *mollugo.*] The explanation of previous editions is, Wild plant of the parsley kind. This, however, is certainly not the smallage of the extract. In the ordinary works on Botany, the word stands as the English equivalent to Apium graveolens, i.e. Wild celery. In its present form the word Smallage may mean almost anything. If, however, its connection with the Latin *mollugo* be admitted, its true import must be sought in the origin of that word. Here the ordinary connection is with *mollis* = soft. Yet the Galium *mollugo*, or Great Hedge Bedstraw, is bristly.

The real origin is probably very different. The primitive *mollugo* seems to be a *pepper*: the secondary *mollugos*, plants of which the seeds were pepper-like. In this respect, those of the parsley and its allies have little beyond the spicy flavour of the carraway and celery. The Galiums, on the other hand, without any notable taste, are round, and, when ripe, black; and when of a certain size, not unlike grains of black pepper. As a name for the *true* peppers, *milagu* is, at the present time, the ordinary Tamil term; and in the word Mulligatawny (=pepper-water) soup, it is an English word.
Smallage is raised by slips or seed, which is reddish, and pretty big, of a roundish oval figure; a little more full and rising on one side than the other, and streaked from one end to the other.—*Mortimer, Husbandry.*

Smelts have a very peculiar scent, from whence is derived one of their English names, *smelt*, i.e. *smell it.* That of sparling, which is used in Wales and the North of England, is taken from the French, 'eperlan.' There is a wonderful disagreement in the opinion of people as to the scent of the fish. Some assert that it flavours of the violet; the Germans, for a very different reason, distinguish it by the elegant name of Stinckfish; . . . and not without reason, if we may depend on Linnæus, who says there

are in the Baltic two varieties; the one which is called Nors, fœtidissimus, stercoris instar, which, in the early spring, when the peasants come to buy it, fills all the streets of Upsal with the smell. He adds that, at this season, agues reign there.... *Smelts* are often sold in the streets of London split and dried. The Atherine ... is very common in the sea near Southampton, where it is called a *smelt*.—*Pennant, British Zoology, Smelt and Atherine.*

The *smelt*, as a British fish, appears to be almost exclusively confined to the eastern and western coasts of Great Britain. Mr. Salter, in his Angler's Guide, says he has caught very fine *smelts* by angling in Portsmouth Harbour; but there is very little doubt that the *sandsmelt*, or Atherine, which is there abundant, is the fish alluded to.—*Yarrell, History of British Fishes.*

Smolt. *s.* [?] Young salmon.

Desirous of ascertaining the appearance of the young salmon at periods intermediate between the states as pinks and salmon peal, other experiments were tried. Pinks in the river Hodder in the month of April are rather more than three inches long, and are considered to be the fry of that year: at this time, *smolts* of six inches and a half are also taken. The *smolts* are considered as the fry of the previous year, and are distinguished by the blue colour on the upper half of their body, the silvery tint of the lower half, and the darker hue of the fins generally as compared with those of the pink. In this state as to colour, the *smolts* are said to have assumed their migratory dress, and go down to the sea in May. In June the young pink in the Hodder measures about four inches; in July it measures five inches, and no *smolts* are then found in the river. To be further convinced of this change, and the length of time required to produce it, a pink put into a well at Whitewell in the forest of Bowland in November 1837, was taken out in the state of a *smolt* of six inches and a quarter in July 1838. In another instance more pinks by Mr. Upton's directions were put into Lillymere in September 1837, and Mr. Parker caught five or six in the state of *smolts* of seven and a half inches in August 1838. In referring to the particular size of the pinks in the river Hodden at stated periods, it may be necessary to remark that the pinks of different rivers, and even in the same river will be found to vary in size, depending

on the time at which the spawn was deposited, the temperature of the season, and other causes.—*Yarrell, History of British Fishes.*

Snake. *s.* [A.S. *snaca.* The etymological connection of this word with *snail,* in A.S. *snæg-el,* in Danish and Swedish, *snekke, snäcka,* shows that the notion of *creeping* is at the bottom of its several meanings. Hence it is with words like *serpens, reptilis,* ἑρπετόν, and the like, rather than with words like *anguis,* ὄφις, &c., that it must be compared; i.e. it is, etymologically, a *general,* rather than a *specific,* name. Nor is the English application of the term universal; the German name being *schlange;* the Norse, *orm.* See under Worm and Sneak.]

1. In a general and somewhat lax sense, any member of the class Ophidia (Gr. ὄφις = serpent), i.e. reptiles with a backbone, but without either fins or feet, and, as such, crawlers or creepers, may be called a *snake;* the term thus used applying to adders, boas, and even to the slowworm or blindworm, which is really a lizard rather than an ophidian. In Latin, *anguilla* = eel, is a derivative of *anguis* = snake. With this meaning the word is common as the second element in a compound, e.g. *rattlesnake* and *whipsnake;* both of which are venomous. A distinction between *serpent,* as the name of the venomous, and *snake* as that of the non-venomous, ophidians has been suggested; and this, in Zoology, is, probably, convenient.

We have scotch'd the *snake,* not kill'd it:
She'll close, and be herself; whilst our poor malice
Remains in danger of her former teeth.
Shakespear, Macbeth, iii. 2.

The parts must have their outlines in waves resembling the gliding of a *snake* upon the ground: they must be smooth and even.—*Dryden, Translation of Dufresnoy's Art of Painting.*

Id., Translation of the Georgics, ii. 295.

2. Specifically, the common snake (Natrix torquata), as opposed to the slow-worm, or blindworm, and to the adder or viper, which is venomous.

The family of Colubridæ, to which our common *snake* belongs, is one of the most extensive of all the natural groups of reptiles. It includes a number of generic divisions, some more and some less strongly marked, which are found in every quarter of the globe. They are all of them perfectly free from any poisonous quality.—*Bell, British Reptiles.*

Snákenut. *s.* In *Botany.* See extract.

A very general character of the soapworts, is to have their embryo either curved or twisted spirally. This occurs in a very remarkable manner in the nut of a Demerara tree, called the *snakenut,* in consequence of the large embryo resembling a snake curled up. Sir R. Schomburgk, who first described this production, has called the tree Ophiocaryon paradoxum.—*Lindley, Vegetable Kingdom.*

Snákeroot. *s.* In *Botany* and *Pharmacy.* See extract.

Others [of Polygalaceæ] are distinguished for their emetic, purgative, and diuretic action. Of these, the most celebrated is a North American herb called *snakeroot,* Polygala senega; of this plant, the root is somewhat acid and acrid. It acts as a sudorific and expectorant in small doses, and as an emetic and cathartic in large ones. It is employed in pneumonia, asthma, croup, dropsy, chronic rheumatism, and especially in such uterine complaints as amenorrhœa. Dr. Archer has extravagantly praised it in cynanche trachealis. Chemists refer the action to the presence of a particular principle called polygaline or senegine.—*Lindley, Vegetable Kingdom.*

Snákeshead. *s.* In *Botany.* Rare and doubtful native, but common garden, plant, of the genus Fritillaria (Meleagris); so called from the markings of its flower. Both the Latin names indicate a comparison with something chequered, or dotted; *fritillus* = dice-box, and *meleagris* = a guinea-fowl. The plant is sometimes called the Snakeshead lily, and sometimes the Snakeshead iris.

Snákewood. *s.*

1. See extract.

What we call *snakewood* is properly the smaller branches of the root of a tall straight tree growing in the island of Timor and other parts of the East. It has no remarkable smell; but is of an intensely bitter taste. The Indians are of opinion, that it is a certain remedy for the bite of the hooded serpent, and from thence its name of lignum colubrinum, or *snakewood.* We very seldom use it.—*Sir J. Hill, Materia Medica.*

2. South American tree of the genus Brosimum, or Piratinera (guainensis).

Snakewood, or Bois de Lettres, so called because of the markings which it presents ... is obtained from a tree sixty or seventy feet high, whose beautiful timber is so hard that it can only be felled by the American axe.—*Lindley, Vegetable Kingdom.*

Wings on his heels were hung, and in his hand
He holds the virtue of the *snaky* wand.
Dryden, Translation from Ovid, Metamorphoses, b. i.

As the *first element* in a *compound.*

What was that *snaky-headed* gorgon shield
That wise Minerva wore, unconquer'd virgin,
Wherewith she freezed her foes to congeal'd stone?
Milton, Comus, 447.

Snap. *v. a.* [compare with *knap.*]

1. Break at once; break short.

If the chain of necessity be no stronger, but that it may be *snapped* so easily in sunder: if his will was no otherwise determined from without himself, but only by the signification of your desire, and my modest entreaty, then we may conclude, human affairs are not always governed by absolute necessity.—*Bishop Bramhall, Against Hobbes.*

Light is broken like a body, as when 'tis *snapped* in pieces by a tougher body.—*Sir K. Digby.*

Dauntless as death, away he walks;

The barons, without perhaps one exception, and a large proportion of the gentry, were of French descent, and preserved among themselves the speech of their fathers. 'Just when I was intertwining what is left of my life with the bright threads of his, he *snaps* the web asunder: he quits this London world again; says he will return to it no more.'—*Lord Lytton, What will he do with it?* b. vii. ch. xix.

That the louder you could *snap* them, the more accomplished and elegant you were considered. But in my confusion I quite forgot his injunctions; and it was not until the ladies all *snapped* their fingers in obedience to the commands of their sovereign, that I recollected the omission which I had been guilty of.—*Marryat, The Pacha of Many Tales, Huckaback.*

Donne.

The backbone is divided into so many vertebres for commodious bending, and not one entire rigid bone, which, being of that length, would have been often in danger of *snapping* in sunder.—*Ray, Wisdom of God manifested in the Works of the Creation.*

But whether that was the case or not the case;—or whether the *snapping* of my father's tobacco pipe so critically, happened through accident or anger—will be seen in due time. Though my father was a good natural philosopher—yet he was something of a moral philosopher too; for which reason, when his tobacco pipe *snapped* short in the middle—he had nothing to do, as such, but to have taken hold of the two pieces, and thrown them gently upon the back of the fire.—*Sterne, Tristram Shandy,* vol. ii. ch. vi.

Snápdragon. *s.*

1. Plant so called of the genus Linaria (vulgaris); the name is applied also, perhaps more usually, to the garden plant of the genus Antirrhinum.
It has been remarked, that the flowers of certain species, whose parts are not symmetrically arranged, and which do not alternate in the manner described, do nevertheless occasionally assume a perfectly regular structure, by the development of supernumerary parts. As an illustration of our meaning, we may select the common *snapdragon*; in which, as well as in some other species of this and of the allied genus Antirrhinum, the phenomenon we are about to describe may occasionally be observed.—*Henslow, Principles of Descriptive and Physiological Botany*, pt. i. ch. vi.
2. Kind of play, in which brandy is set on fire, and raisins thrown into it, which those who are unused to the sport are afraid to take out; but which may be safely snatched by a quick motion, and put blazing into the mouth, which being closed, the fire is at once extinguished.
We got into a dark corner with a porringer of brandy, and threw raisins into it; then set it on fire. My chamber-fellow and I diverted ourselves with the sport of venturing our fingers for the raisins; and the wantonness of the thing was, to see each other look like a demon, as we burnt ourselves and snatched out the fruit. This fantastical mirth was called *snapdragon*.—*Tatler*, no. 85.
When they were all tired of blind-man's buff, there was a great game at *snapdragon*; and when fingers enough were burnt with that, and all the raisins were gone, they sat down ... to a substantial supper.—*Dickens, Pickwick Papers*, ch. xxviii.

It is probable that this custom, so universally prevalent, originated in some ancient superstition; it seems to have excited inquiry among all nations. Some Catholics, says Father Feyjoo, have attributed the origin of this custom to the ordinance of a pope, Saint Gregory—who is said to have instituted a short benediction to be used on such occasions, at a time when, during a pestilence, the crisis was attended by *sneezing*, and in most cases followed by death. But the rabbins, who have a story for everything, say, that before Jacob men never *sneezed* but once, and then immediately died: they assure us that that patriarch was the first who died by natural disease, before him all men died by *sneezing*; the memory of which was ordered to be preserved in all nations by a command of every prince to his subjects to employ some salutary exclamation after the act of *sneezing*.... A memoir of the French Academy notices the practice in the New World on the first discovery of America. Everywhere man is saluted for *sneezing*. An amusing account of the ceremonies which attend the *sneezing* of a king of Monomotapa shows what a national concern may be the *sneeze* of despotism. Those who are near his person, when this happens, salute him in so loud a tone that persons in the antechamber hear it, and join in the acclamation; in the adjoining apartments they do the same, till the noise reaches the street, and becomes propagated throughout the city; so that at each *sneeze* of his majesty, results a most horrid cry from the salutations of many thousands of his vassals. When the king of Sennaar *sneezes* his courtiers immediately turn their backs on him, and give a loud slap on their right thigh.—*I. Disraeli, Curiosities of Literature, On the Custom of Saluting after Sneezing.*
Coughing is produced by a quick and forcible contraction of the diaphragm; by which a large quantity of air is received into the chest; this, by a powerful and rapid contraction of the abdominal muscles, is propelled through the trachea with considerable force; and in this way dislodges mucus, or any other extraneous substance which irritates the part.... *Sneezing*, in many respects, resembles coughing, but it differs from it in being more violent, and in being involuntary.—*Bostock, Elementary System of Physiology*, p. 421: 1836.
The difference in coughing and *sneezing* consists in this—that in the latter the communication between the larynx and the mouth is partly or entirely closed by the drawing together of the sides of the velum palati over the back of the tongue; so that the blast of air is directed, more or less completely, through the nose, in such a way as to carry off any source of irritation that may be present there.—*Dr. Carpenter, Principles of Human Physiology*, § 556: 1853.

Snipe. *s.* [German, *schneppe.*]

1. In *Ornithology.* British bird of the genus Scolopax (species gallinago, gallinula, major); as an equivalent to the Latin *scolopax* the word has a wider import, and includes *woodcocks*, &c. Great, double, full, jack, snipe.

The external evident causes of the atra bilis are a high fermenting diet; as old cheese, birds feeding in fens, as geese, ducks, woodcocks, *snipes*, and swans.—*Sir J. Floyer.*

The great *snipe* (Scolopax *major*) is rarely seen in this kingdom: . . . weight, eight ounces; length, twelve inches; and, to the end of the toes, sixteen. . . . The weight of [the common *snipe*] is four ounces. . . . [The jack *snipe*] is about half the size of the common *snipe*, and weighs scarcely two ounces.—*Latham, General History of Birds.*

The birds . . . shot . . . on the coast of Devonshire . . . seem to vary so little in the essential characters from the brown *snipe* described by Mr. Pennant and Dr. Latham, that we cannot hesitate to pronounce it a variety of that bird.—*Montague, Ornithological Dictionary.*

This [the *snipe*] division of the numerous Scolopax genus of Linnæus, amounts, according to Latham, to about twenty species, besides varieties, of which only the woodcock, common *snipe*, and judcock, and their varieties, are accounted British birds. Pennant has placed the woodcock after the curlews, as the head of the godwits and *snipes*: and others are of opinion, that the knot, from the similarity of its figure to that of the woodcock, ought to be classed in this tribe. In these subdivisions, ornithologists may vary their classifications without end. . . . The author has seen three specimens of a large kind of *snipe* called, by some sportsmen, from being always found alone, the solitary *snipe*.—*Bewick, History of British Birds.*

The great *snipe* was at first described as a British bird by Pennant . . . and was at that time considered a very rare bird. . . . The habits of the great *snipe*, or solitary *snipe*, as it is often called, . . . are, &c.—*Yarrell, History of British Birds.*

Snipe is often used for *snipes*, i.e. as a plural, like *sheep*; or rather as a collective. The same is done with the word *plover* = plovers. As far as the Editor's personal experience goes, he thinks that this use of the collective singular form is found in the Isle of Ely (Cambridgeshire), rather than in the Holland (Lincolnshire), fen, or snipe and plover, districts. In favour of this collective form is the fact of the greater part of the edible fen-birds that appear in the local winter markets being known chiefly in the singular forms, *teal*, *widgeon*, and often *wild-duck*, rather than *wild ducks*.

2. Fool; blockhead.

Snípsnap. *s.* Tart dialogue; with quick replies: ('*You say snip, and I'll say snap*, are words used in a child's game, where what one of the players lays down, whether a material object or a catchword, is taken up by the other. It implies readiness to go on with what is begun).

When wrongs provoke, and honour bids him kill;
Each tiny bully lives can freely bleed,
When pressed by wine, or punk to knock on the head;
Give me your thorough-paced rogue, who scorns to be
Prompted by poor revenge or injury,
But does it of true inbred cruelty.
Oldham, Satire upon the Jesuits.

Snob. *s.* [Dealt with as an English word, the nearest original of this is Knobstick, i.e. a violator of the rules for strikes in the work of artizans, or one who works at lower wages than his fellows. As a correlative of *nob*, the Italian suggests *nobile* = noble, and *ignobile*.] Intrinsically vulgar person.

A funny little waiter immediately appeared, . . . having . . . received private intelligence from the bailiff that the gentleman in the drawing-room was a regular nob. . . . Of all the great distinctions in life none perhaps is more important than that which divides mankind into the two great sections of nobs and *snobs*. . . . Almost at the very moment that Captain Armine arrived at his sorrowful hotel, a poor devil of a tradesman who had been arrested for fifty pounds, and torn from his wife and family, had been forced to repair to the same asylum. He . . . had continued meekly to ring at intervals for the last half hour in order that he might write and forward his letter. The waiter heard the coffee-room bell ring, but never dreamed of noticing it, though the moment the signal of the private room sounded, and sounded with so much emphasis, he rushed up stairs, three steps at a time, and instantly appeared before our hero: and all this difference was occasioned by the simple circumstance, that Captain Armine was a nob, and the poor tradesman a *snob*.—*B. Disraeli, Henrietta Temple.* b. vi. ch. xv.

First the world was made: then, as a matter of course, *snobs*. . . . Not above five-and-twenty years since, a name, an inexpressive monosyllable, arose to designate that race. That name has spread over England like railroads subsequently. *Snobs* are known and recognized throughout an empire on which I am given to understand the sun never sets. . . . I have (and for this gift I congratulate myself with a deep and abiding thankfulness) an eye for a *snob*. If the truthful is the beautiful, it is beautiful to study even the snobbish; to track *snobs* through history as certain little dogs in Hampshire hunt out truffles; to sink shafts in society and come upon rich veins of *snobs*. Snobbishness is like Death in a quotation from Horace, which I hope you never have heard, 'beating with equal foot at poor men's doors, and kicking at the gates of emperors.' It is a great mistake to judge of *snobs* lightly, and think they exist among the lower classes merely. An immense per centage of *snobs*, I believe, is to be found in every rank of this mortal life. You must not judge hastily or vulgarly of *snobs*; to do so shows that you are yourself a *snob*. I myself have been taken for one.—*Thackeray, Book of Snobs*, prefatory remarks.

Used *adjectivally.*

If their lordships are inclined to make [this] declaration, a great lapis offensionis will be removed, and the *snob* papers will not have been written in vain.—*Thackeray, Book of Snobs*, ch. xii.

Snóbbish. *adj.* Having the character of a snob.

Snóbbishness. *s.* Attribute suggested by Snobbish.

Snobbishness is vulgar—the mere words are not; and that which we call a snob, by any other name would still be snobbish.—*Thackeray, Book of Snobs*, ch. xviii.

Snóbling. *s.* Little snob.

'In either of which cases, you see, dear *snobling*, that though the parson would not have been authorised, yet he might have been excused for interfering. . . . But if the clergyman din in the duke's ear what he would not do in Smith's . . . then, I confess, my dear *snobling*, your question might elicit a disagreeable reply, and one which I respectfully decline to give.—*Thackeray, Book of Snobs*, ch. xii.

We may descry

He gives the winter's *snow* her airy birth,
And bids her virgin fleeces clothe the earth. *Sandys.*

Soft as the fleeces of descending *snows*. *Pope.*

Snow [is] congealed water, which falls from the atmosphere. Very little is yet known respecting the formation of this meteor. The only observations which may be considered as in any degree complete have reference to the different forms which the flakes assume. This subject was considered by Kepler, Hooke, Cassini, Muschenbroek, and many others; but the most interesting series of observations hitherto obtained are those of Scoresby, and more recently of Glaisher, who have reduced the different forms into classes, and given a number of excellent representations of the flakes in different states. . . . It had been remarked by the ancients that *snow* sometimes assumes a red tint, and Pliny ascribes the cause to age: 'Ipsa nix vetustate rubescit.'—*Brande*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Used *adjectivally.*

An experiment of Professor Tyndall's has shown in a very beautiful manner that ice is but an agglomeration of *snow* crystals; the transparency of the former being due to the expulsion of the air entrapped in, and causing the whiteness and opacity of the latter. By exposing a piece of clear ice to the radiation from the sun, a flame, or a bright fire, numberless minute specks are suddenly developed within the ice. After a few seconds' exposure, these attain a diameter of about 0·1 of an inch, and when examined through a lens are seen to be little six-rayed stars; the less developed ones resembling tiny flowers with six petals each. These ice-flowers are composed of water resulting from the disintegration of the ice by radiant heat, and indicate the way in which the ice originally crystallized; hence, as we should expect, their planes are parallel to the plane in which the ice froze. When the ice-flowers are compared with *snow* crystals, the two are essentially the same, the rays and serrations in both following the common angle of 60°.—*Frankland*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Snów-line. *s.* Line, in elevation, of perpetual snow.

Since the temperature of the atmosphere continually diminishes in ascending from the surface into the higher altitudes, there must be in every latitude a certain limit of elevation at which the air attains the temperature of freezing water. This limit is called the *snow-line*, or line of perpetual congelation; and the mountains which rise above it are covered with perpetual snow. . . . The altitude of the *snow-line* . . . is dependent not upon latitude alone, but also on the configuration and aspects of the mountain-chains, the extent and temperature of the surrounding plains, the quantity of snow which falls annually, and the multitude of causes which influence the climate of a country. On the Himalaya chain, for example, the limit of perpetual congelation on the northern side, is at an elevation exceeding by upwards of 4,400 feet that on the southern side. . . . No dependence, then, can be placed upon any general rule for estimating the height of the *snow-line*; and it affords an exceedingly fallacious indication of the altitude of a mountain.—*Brande*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Snów-plant. *s.* Microscopic plant growing in snow, and giving it the appearance of being coloured.

Meyen states that the red and green *snow-plants*, which have been described as confervæ, and assigned to the genus Protoccus, are nothing more than the animalcules called Enchelis sanguinea and Pulvisculus. But this does not affect the genus Protoccus, which contains productions respecting whose vegetable nature no doubt is entertained.—*Lindley, Vegetable Kingdom.*

Scott, Red-Gauntlet*, ch. i.

'What does Jem say?' inquired the old lady. 'There ain't anything the matter, is there?'—'No, no, mother,' replied Wardle; 'he says there's a *snow-drift*, and a wind that's piercing cold. I should know that, by the way it rumbles in the chimney.'—*Dickens, Pickwick Papers*, ch. xxviii.

Trace the sly felon through the tainted dew:
Once *snuff'd*, he follows with unalter'd aim,

In blood of princes. *Shakespear, Henry V.* iv. 7.

There deep Galesus *soaks* the yellow sands.
Dryden, Translation of the Georgics, iv. 187.

Wormwood, put into the brine you *soak* your corn in, prevents the birds eating it.—*Mortimer, Husbandry.*

2. Draw in through the pores.

Thou whose life's a dream
Of lazy pleasures, tak'st a worse extreme;
'Tis all thy business, business how to shun,
To bask thy naked body in the sun:
Suppling thy stiffen'd joints with fragrant oil;
Then in thy spacious garden walk a while,
To suck the moisture up and *soak* it in.
Dryden, Translation of Persius, iv. 74.

A good fellow! a painful, able, and laborious *soaker*; . . . who owes all his good-nature to the pot and the pipe.—*South, Sermons*, vi. 111.

You may have taken notice of a maudlin kind of *soakers*, who commonly relent when they are well moistened, as if they shrunk in the wetting.—*Goodman, Winter Evening Conference*, pt. i.

The sun's an honest *soaker*. He has a cellar at your Antipodes. . . . Your Antipodes are a good rascally sort of topsy-turvy fellows. If I had a bumper, I'd stand upon my head and drink a health to 'em.—*Congreve, Way of the World.*

Soáking. *part. adj.* Guzzling; drinking intemperately.

Let a drunkard see that his health decays, his estate wastes, yet the habitual thirst after his cups drives him to the tavern, though he has in his view the loss of health and plenty; the least of which he confesses is far greater than the tickling of his palate with a glass of wine, or the idle chat of a *soaking* club.—*Locke.*

Soap. *s.* [Lat. *sapo*; A.S. *sapa.*] Substance used in washing, made of a lixivium of vegetable alkaline ashes and any oily or fatty substance. When the alkali is soda the soap is hard; when potash, soft. Since the chemistry of the compounds resulting from certain elements in the fats and oil with an alkali, in other words the process of saponification, has been investigated, the word has had a more general meaning, and denotes the result of the combination of a fatty acid (margaric, oleic, or stearic) with an alkali.

He is like a refiner's fire, and like fuller's *soap.*—*Malachi*, iii. 2.

A bubble blown with water, first made tenacious by dissolving a little *soap* in it, after a while will appear tinged with a great variety of colours.—*Sir I. Newton, On Opticks.*

Soap is a mixture of a fixed alkaline salt and oil; its virtues are cleansing, penetrating, attenuating, and resolving; and any mixture of any oily substance with salt may be called a *soap.*—*Arbuthnot, On the Nature and Choice of Aliments.*

Soap is a chemical compound of saponified fats or oils, with potash or soda, prepared for the purpose of washing linen, &c. . . . Some chemical writers describe under the title *soap*, every compound which may result from the union of fats with the various earths and metallic oxides—a latitude of nomenclature which common language cannot recognise, and which would perplex the manufacturer. *Soaps* are distinguished into two great classes, according to the consistence; the hard and the soft; the former being produced by the action of soda upon fats, the latter by that of potash. The nature of the fats contribute also somewhat to the consistence of *soaps*; thus, tallow, which contains much stearine and margarine, forms with potash a more consistent *soap* than liquid oils will do, which consist chiefly of oleine. The drying oils, such as those of linseed and poppy, produce the softest *soaps.*—*Ure, Dictionary of Arts, Manufactures, and Mines.*

The fat-acids (stearic, oleic acid, &c.), when separated from glycerin, are easily *saponified* by the action of alkaline carbonates. . . . Resins also, which are chiefly mixtures of acid compounds, easily decompose alkaline carbonates, and form *soaps.*—*H. Watts, Dictionary of Chemistry, Soap.*

As the *first element* in a *compound.*

Soap-earth is found in great quantity on the land near the banks of the river Hermus, seven miles from Smyrna.—*Woodward.*

Soap-ashes are much commended, after the soap-boilers have done with them, for cold or sour lands.—*Mortimer, Husbandry.*

As rain-water diminishes their salt, so the moistening of them with chamber-lee or *soap-suds* adds thereto.—*Id.*

Soap and water. Washing. *Colloquial.*

The healthy man is a most meritorious product of Nature, so far as he goes. A healthy body is good; but a soul in right health—it is the thing beyond all others to be prayed for. . . . The false and foreign will not adhere to him; cant and all fantastic diseased incrustations are impossible;—as Walker, the Original, in such eminence of health was he, for his part, could not, by much abstinence from *soap-and-water*, attain to a dirty face.—*Carlyle, Critical and Miscellaneous Essays, Scott.*

Soap. *v. a.* Apply soap.

Yussuf then *soaped* and lathered, scrubbed and sponged the skin of the pilgrim, until it was as smooth and glossy as the back of a raven.—*Marryat, The Pacha of Many Tales, The Water-Carrier.*

Soap-pan. *s.* [the *p* doubled in sound as well in spelling.] Pan or vessel for soap-boiling.

The *soap-pans* used in the United Kingdom are made of cast-iron, and in three separate pieces joined together by iron-rust cement.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Soap-test. *s.* See extract.

On washing in hard water no lather can be obtained until the lime and other hardening salts have been decomposed by, and have decomposed, the soap. The product of the decomposition is the well-known curd which floats on the surface of the water. This action being definite, the hardness of waters may be determined by adding to equal quantities of them a solution of soap of known strength until a permanent lather is produced on shaking. Such a soap solution is called a *soap-test.*—*Brande and Cox, Dictionary of Science, Literature, and Art.*

Soápboiler. *s.* One whose trade is to make soap.

A *soapboiler* condoles with me on the duties on castle-soap.—*Addison, Spectator.*

The soda-ash used by the *soap-boilers* contains in general about thirty-six per cent. of real soda, in the state of dry carbonate mixed with muriate of soda, and more or less undecomposed sulphate.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Soáphouse. *s.* Soapwork.

In a Marseilles *soap-house* there are four lye-vats in each set.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Soápmaker. *s.* Soapboiler.

Three such boils must be given in the course of one day's work by an active *soap-maker.*—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Soápstone. *s.* Steatite.

When very strongly heated, *soapstone* loses the small portion of combined water which it contains, and becomes harder and susceptible of polish. In this state it is made into jets for gas-burners, which have the advantage of not being liable to rust or corrosion. When reduced to powder, it is used like plumbago, as a lubricator and to diminish friction, as well as to give a surface to some kinds of paper-hangings. The *soapstone* of Mylos is an important article of commerce in Turkey and Russia, where it is used instead of soap.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

Soápsuds. *s.* See Suds.

Soápwork. *s.* Building for making soap.

Mottling is usually given in the London *soap-works*, by introducing into the nearly finished soap in the pan a certain quantity of strong lye of crude soda through the rose spout of a watering-can.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Soápwort. *s.* Plant chiefly, but not exclusively, of the genus Saponaria, yielding a soapy, or detergent, juice.

The species are in general remarkable for little except insipidity. A few, such as Dianthus and Lychnis are handsome flowers; but the greater part are mere weeds. Vaccaria vulgaris is said to increase the lacteal secretions of cows fed upon it. It contains saponine, as also does the Egyptian *soapwort*, which is derived from Gypsophila struthium.—*Lindley, Vegetable Kingdom.*

Soápy. *adj.* Resembling soap; having the quality of soap.

Tar-water . . . as a *soapy* medicine, dissolves the grumous concretions of the fibrous part.—*Bishop Berkeley, Siris*, § 96.

Upon one ton of tallow put into the soap-pan about two hundred gallons of soda-lye, of specific gravity 1·040, being poured, heat is applied, and after a very gentle ebullition of about four hours, the fat will be found to be completely saponified, by the test of the spatula, trowel, or pallet knife; for the fluid lye will be seen to separate at once upon the steel blade from the *soapy* paste.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Soar. *v. n.*

Sóber. *v. a.* Make sober.

A little learning is a dangerous thing;
Drink deep, or taste not the Pierian spring;
There shallow draughts intoxicate the brain,
And drinking largely *sobers* us again.
Pope, Essay on Criticism, ii. 215.

Sóberly. *adv.* In a sober manner.

1. Temperately; moderately.

Let any prince think *soberly* of his forces, except his militia of natives be valiant soldiers.—*Bacon.*

2. Coolly; calmly.

Whenever children are chastised, let it be done without passion, and *soberly*, laying on the blows slowly.—*Locke, Thoughts on Education.*

Sóberminded. *adj.* Temperate in opinion and action.

I found two other volumes . . . enriched with manuscript notes. I wish every book I have were so noted. They have thoroughly converted me to relish Daniel, or to say I relish him: for, after all, I believe I did relish him. You well call him *sober-minded.*—*C. Lamb, Letter to Coleridge.*

Sobermíndedness. *s.* Attribute suggested by Soberminded; calmness; regularity; freedom from inordinate passion.

To induce habits of modesty, humility, temperance, frugality, obedience, in one word, *sobermindedness.*—*Bishop Porteus, Sermon before the University of Cambridge.*

Sóberness. *s.* Attribute suggested by Sober.

1. Temperance, especially in drink.

Keep my body in temperance, *soberness*, and chastity.—*Book of Common Prayer, Catechism.*

2. Calmness; freedom from enthusiasm; coolness.

I am not mad, most noble Festus, but speak forth the words of *soberness* and truth.—*Acts*, xxvi. 25.

A person noted for his *soberness* and skill in spagyrical preparations, made Helmont's experiment succeed very well.—*Boyle.*

The *soberness* of Virgil might have shewn the difference.—*Dryden.*

Sobríety. *s.*

1. Temperance in drink; soberness.

Drunkenness is more uncharitable to the soul, and in Scripture is more declaimed against than gluttony; and *sobriety* hath obtained to signify temperance in drinking.—*Jeremy Taylor.*

2. Present freedom from the power of strong liquor.

3. General temperance.

In setting down the form of common prayer, there was no need that the book should mention either the learning of a fit, or the unfitness of an ignorant minister, more than that he which describeth the manner how to pitch a field should speak of moderation and *sobriety* in diet.—*Hooker, Ecclesiastical Polity.*

4. Freedom from inordinate passion.

The libertine could not prevail on men of virtue and *sobriety* to give up their religion.—*Rogers.*

5. Calmness; coolness.

Enquire, with all *sobriety* and severity, whether there be in the footsteps of nature any such transmission of immateriate virtues, and what the force of imagination is.—*Bacon.*

The *sobrieties* of virtue.—*South, Sermons*, vi. 157.

Mirth makes them not mad,
Nor *sobriety* sad. *Sir J. Denham.*
On Killegrew's Return from Venice,

Soc. *s.* Thus spelt, i.e. with a final *c*, the word is Anglo-Saxon rather than English, Soke being the English form; the vowel being long, and the addition of the *e* mute being necessary to ensure its being so sounded. To write it, however, *soce*, would run the risk of its being pronounced *sose.* It is the same word as the German *sach*, the Danish *sag*, the English *sake* = thing, matter, case, cause. It was the name of a certain feudal tenure, lower than military, and higher than predial service. See next entry; also Soke.

Sócage. *s.* [L.Lat. *socagium.*] Tenure by Soc.

The lands are not holden at all of her majesty, or not holden in chief, but by a mean tenure in *soccage*, or by knight's service.—*Bacon.*

Soccage [is] tenure of lands for certain inferiour or husbandly services to be performed to the lord of the fee. All services due for land being knight's service, or *soccage*; so that whatever is not knight's service is *soccage.* This *soccage* is of three kinds; a *soccage* of free tenure, where a man holdeth by free service of twelve pence a year for all manner of services. *Soccage* of ancient tenure is of land of ancient demesne, where no writ original shall be sued, but the writ 'secundum consuetudinem manerii.' *Soccage* of base tenure is where those that hold it may have none other writ but the 'monstraverunt;' and such *socmen* hold not by certain service.—*Cowell.*

Used *adjectivally.*

Some might be inclined to suspect that the ceorls were sliding more and more towards a state of servitude before the conquest. . . . By the laws of William the Conqueror, there was still a composition fixed for the murder of a villein or ceorl, the strongest proof of his being, as it was called, law-worthy, and possessing a rank however subordinate, in political society. And this composition was due to his kindred, not to the lord. Indeed, it seems positively declared in another passage, that the cultivators, though bound to remain upon the land, were only subject to certain services. . . . Nobody can doubt that the Villani and Bordarii of Domesday Book, who are always distinguished from the serfs of the demesne, were the ceorls of Anglo-Saxon law. And I presume that the *socmen*, who so frequently occur in that record, though far more in some counties than in others, were ceorls more fortunate than the rest, who by purchase had acquired freeholds, or by prescription and the indulgence of their lords had obtained such a property in the outlands allotted to them, that they could not be removed, and in many instances might dispose of them at pleasure. They are the root of a noble plant, the free *socage* tenants, or English yeomanry, whose independence has stamped with peculiar features both our constitution and our national character.—*Hallam, View of the State of Europe during the Middle Ages*, pt. i. ch. viii.

Sócager. *s.* Tenant by socage; Socman.

Sociabílity. *s.* Sociableness.

He introduceth the system of human *sociability*, by showing it to be the dictate of the Creator.—*Bishop Warburton.*

Sóciable. *adj.* [Fr.; Lat. *sociabilis.*]

1. Fit to be conjoined.

Another law toucheth them as they are *sociable* parts united into one body: a law which bindeth them each to serve unto other's good, and all to prefer the good of the whole before whatsoever their own particular.—*Hooker, Ecclesiastical Polity.*

2. Ready to unite in a general interest.

To make man mild, and *sociable* to man,
To cultivate the wild licentious savage
With wisdom, discipline. *Addison, Cato.*

3. Friendly; familiar; conversable.

Them thus employ'd, beheld
With pity heaven's high King, and to him call'd
Raphael, the *sociable* spirit, that deign'd
To travel with Tobias.
Milton, Paradise Lost, v. 221.

4. Inclined to company.

In children much solitude and silence I like not, nor any thing born before his time, as this must needs be in that *sociable* and exposed age.—*Sir H. Wotton.*

Sóciable. *s.* Kind of less exalted phaeton, with two seats facing each other, and a box for the driver.

Sóciableness. *s.* Attribute suggested by Sociable.

1. Inclination to company and converse.

Such as would call her friendship love, and feign
To *sociableness* a name profane. *Donne.*

2. Freedom of conversation; good fellowship.

He always used courtesy and modesty, disliked of none; sometimes *sociableness* and fellowship well liked by many.—*Sir J. Hayward.*

Sóciably. *adv.* In a sociable manner; conversibly; as a companion.

Yet not terrible,
That I should fear; nor *sociably* mild,
As Raphael, that I should much confide;
But solemn and sublime.
Milton, Paradise Lost, xi. 234.

Sócial. *adj.* [Lat. *socialis.*]

1. Relating to a general or public interest; relating to society.

To love our neighbour as ourselves is such a fundamental truth for regulating human society, that by that alone one might determine all the cases in *social* morality.—*Locke.*

Thus God and Nature link'd the general frame,
And bade self-love and *social* be the same.
Pope, Essay on Man, iii. 317.

Its admirable analysis of the complex political and *social* organisations, of which the modern civilized world is made up, must have led thousands to trace with keener interest the great crisis of times past, by which the characteristics of the present were determined.—*Sir E. S. Creasy, The Fifteen Decisive Battles of the World, Victory of Arminius.*

I would not here undertake to decide what other hypothetical or abstract sciences similar to political economy, may admit of being carved out of the general body of the *social* science. . . . *Social* phenomena are in a sufficiently close and complete dependence, in the first resort, on a peculiar class of causes, to make it convenient to create a preliminary science of those causes.—*J. S. Mill, System of Logic*, pt. vi. ch. ix. § 3.

2. Easy to mix in friendly gaiety; companionable.

Withers, adieu! yet not with thee remove
Thy martial spirit or thy *social* love.
Pope, Epitaph on General Henry Withers.

3. Consisting in union or converse with another.

Thou in thy secrecy although alone,
Best with thyself accompanied, seek'st not
Social communication.
Milton, Paradise Lost, viii. 427.

Sócialism. *s.* Proposed, and partially adopted, system in politics and political economy, for securing a comparative equality in the distribution of property, as opposed to the existing system of extremes in the way of poverty and wealth; it aims at the competence of the many rather than the opulence of the few; favouring labour and skill rather than capital, and co-operation rather than competition. When dealing with the tenure of land, it is generally called *communism*; and *communism*, when it deals with questions of manufacturing industry, may be called *socialism.* Which of the two terms is the more general, or which is the more current, is uncertain; nor have they exactly the same meaning. In writings about Russia and Poland, where the question is of serfage and land, *communism* is the word which occurs the oftenest; whereas, in France, where the question is mainly one of skilled labour and capital, the term is *socialism.* Of this the system of Fourier is, perhaps, the best representative; indeed Fourierism, like St. Simonianism, is a synonym founded on the name of one of the chief expositors of the doctrine.

These theories commonly pass under the general name of *socialism*, and in this sense not only the theories of philosophers, but many existing or proposed laws and usages, may be regarded as *socialist* in their tendencies. Such are: agrarian laws, limiting the quantity of land to be held by an individual; laws fixing the maximum of rent, or the minimum of wages; laws interfering in other ways between the capitalist and the labourer (for shortening the duration of labour, and the like); the usages of trades' unions; nay, poor laws, and income taxes limited to the higher classes; all these, some of them innocently, others intentionally, bear in the same direction. *Socialism* in this sense had a large part in the institution, and still larger in the theories, of classical antiquity. . . . But in the middle ages it may be said to have entirely disappeared. . . . Hence, with the revival of political speculation, *socialism* may be said to have made its way to the light through two different avenues. . . . Robert Owen of Lanark . . . stands in point of date next to Babeuf among the leading advocates of *socialism*. . . . Saint Simon's . . . theory partook of the religious as well as the political aspect of *socialism.* Property was to be in common. But the enjoyment of it by individuals was to be regulated by a superior authority. . . . Charles Fourier, of Besançon, . . . developed the theory that all the tendencies of man are naturally good, and that the real function of government is simply to favour and direct their development. . . . Etienne Cabet . . . is the last *socialist* authority of whom it is necessary to make detailed mention. According

to his ideas, an imaginary State is to regulate the life of every member of society.—*Merivale*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Sócialist. *s.* One who maintains the doctrine of socialism; socialistic.

The fifth, or Republican party [in France] is made up of—1. The Republican of 1848. . . . 2. The advanced Republican of the Ledru-Rollin shade. . . . 3. The *Socialist* Republican. This denomination is also somewhat vague. We can only convey an idea of it by saying that a *Socialist* Republican is one who is never content with the Republic when he has it. 4. The Republican of 1793, who is decidedly of the school of Robespierre. He approaches the *Socialist*, but wants his energy in the study of social problems and theories of social regeneration. . . . 5. The Republicans of the school of Hébert. . . . 6. The *Socialists*, who have no connexion with the Terrorist Republicans. These form a group of humanitarian philosophers, sympathize with the sufferings of the people, occupy themselves with solving 'social problems,' and indulge in dreams of perfectibility. They combine together the theories of Owen, Fourier, and St. Simon, and produce something which nobody understands or accepts. They are given to study, are decidedly pacific, and believe themselves to be the apostles of a new creed.—*The Times*, February 3, p. 10: 1869.

Sócialist. *adj.* Connected with, relating to, constituted by, socialism.

(For examples see Socialism and Socialist, *s.*)

Socialístic. *adj.* Socialist.

The national or Anti-western current of Russian political thought finds no more quarter in another paper on the *socialistic* system of the Russian peasant communities.—*Saturday Review*, Jan. 16, 1869, p. 94.

Sócially. *adv.* In a social manner.

Sóciate. *v. n.* Associate: (the latter being the *commoner* word).

One sort will not *sociate* with the rest of their neighbours.—*Shelford, Learned Discourses*, p. 58: 1635.

Sóciate. *s.* Associate. *Rare.*

Beloved retreat, where every tree is hung
With some fond record of a brighter day,
Sociate of joy, when love and youth were young.
Sir W. Boothby, Sorrows.

Society. *s.* [Fr. *société*; Lat. *societas, -atis.*]

1. Union of many in one general interest.

If the power of one *society* extend likewise to the making of laws for another *society*, as if the church could make laws for the state in temporals, or the state make laws binding the church, relating to spirituals, then is that *society* entirely subject to the other.—*Leslie.*

2. Numbers united in one interest; community.

As the practice of piety and virtue is agreeable to our reason, so is it for the interest of private persons and publick *societies*.—*Archbishop Tillotson.*

3. Company; converse.

To make *society*
The sweeter welcome, we will keep ourself
Till supper-time alone. *Shakespear, Macbeth*, iii. 1.

Whilst I was big in clamour, came there a man
Who having seen me in my worser state,
Shunn'd my abhorr'd *society*. *Id., King Lear*, v. 3.

For solitude sometimes is best *society*,
And short retirement urges sweet return.
Milton, Paradise Lost, ix. 249.

The middle ages, according to the division I have adopted, comprise about one thousand years, from the invasion of France by Clovis to that of Naples by Charles VIII. This period, considered as to the state of *society*, has been esteemed dark through ignorance, and barbarous through poverty and want of refinement. . . . No circumstance is so prominent on the first survey of *society*, during the earlier centuries of this period as the depth of ignorance in which it was immersed; and as from this, more than any single cause, the moral and social evils which those ages experienced appear to have been derived and perpetuated, it deserves to occupy the first place in the arrangement of our present subject.—*Hallam, View of the State of Europe during the Middle Ages*, pt. i, ch. ix.

Examine [your] own mind solemnly, and ask, 'Do I, or do I not, eat peas with a knife?' . . . I may as well say what the moral of this . . . is. *Society* having ordained certain customs, men are bound to obey the law of *society*, and conform to its harmless orders. If I should go to the British and Foreign Institute . . . if I should go to one of the tea-parties in a dressing-gown and slippers, and not in the usual attire of a gentleman, viz. pumps, a gold waistcoat, a crush hat, a sham frill, and a white choker, I should be insulting *society*, and eating peas with my knife. Let the porters of the Institute hustle out the individual who shall so offend. Such an offender is, as regards *society*, a most emphatical and refractory snob. It has its code and police as well as governments, and he must conform who would profit by the decrees set forth for their common comfort.—*Thackeray, Book of Snobs*, ch. i.

4. Partnership; union on equal terms.

Among unequals what *society*
Can sort? what harmony or true delight?
Milton, Paradise Lost, viii. 383.

Heaven's greatness no *society* can bear;
Servants he made, and those thou want'st not here.
Dryden, State of Innocence, ii. 1.

Sociológical. *adj.* Connected with, relating to, constituted by, sociology.

Sociólogy. *s.* [Fr. *sociologie*. The barbarism of the term, justly condemned in the extract, which explains its meaning, may possibly be sufficiently recognised to prevent it (for it is a new one) becoming current. At the same time it is by no means easy to suggest an improvement on it; while the necessity for the name, and the reality of the department of philosophy to which it applies, is beyond doubt. In the last part of J. S. Mill's System of Logic it appears in almost every page; a fact which shows that at least one influential authority has committed himself to its adoption. Its fault is of course not so much its simple hybridism (*socius* being Latin, and λόγος Greek) as the flagrant and patent character of it; the Greek origin of the forms in *-logy* being generally known, and the exceptions to it being few.] Science of social life.

Sociology [is] a word somewhat barbarously coined by the school of M. Comte to express the science which has to do with man in his social capacity; including politics, political economy, and similar subjects.—*H. Merivale*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Sock. *s.* [Lat. *soccus*; A.S. *soc.*]

1. Something put between the foot and the shoe.

Ere I lead this life long, I'll sow nether *socks*, and mend them, and foot them too.—*Shakespear, Henry IV. Part I.* ii. 4.

A physician, that would be mystical, prescribeth for the rheum to walk continually upon a camomile alley; meaning he should put camomile within his *socks*.—*Bacon.*

2. Shoe of the ancient comic actors, taken in poems for comedy, and opposed to buskin or tragedy.

What do we act to-day?—Agave's frenzy,
With Pentheus' bloody end.—It skills not what,
The times are dull, and all that we receive
Will barely satisfy the day's expense.
The Greeks, to whom we owe the first invention
Both of the buskined scene and humble *sock*,
That reign in every noble family,
Declaim against us; and our theatre,
Great Pompey's work, that hath given full delight
Both to the eye and ear of fifty thousand
Spectators in one day, as if it were
Some unknown desert, or Great Rome unpeopled,
Is quite forsaken.
Massinger, The Roman Actor, i. 1.

Then to the well-trod stage anon,
If Jonson's learned *sock* be on,
Or sweetest Shakspeare, Fancy's child,
Warble his native wood-notes wild.
Milton, L'Allegro, 131.

Great Fletcher never treads in buskins here,
Nor greater Jonson dares in *socks* appear;
But gentle Simkin just reception finds
Amidst the monument of vanish'd minds.
Dryden, Macflecnoe, 79.

On two figures of actors in the villa Mathei at Rome, we see the fashion of the old *sock* and larva.—*Addison.*

Sócket. *s.* [Fr. *souchette.*]

1. Any hollow pipe; generally the hollow of a candlestick.

Two goodly beacons, set in watches stead,
Therein gave light, and flamed continually;
For they of living fire most subtilly
Were made, and set in silver *sockets* bright.
Spenser, Faerie Queen.

She at your flames would soon take fire,
And like a candle in the *socket*
Dissolve. *Butler, Hudibras.*

The stars amazed ran backward from the sight,
And, shrunk within their *sockets*, lost their light.
Dryden.

Two dire comets
In their own plague and fire have breath'd their last,
Or dimly in their sinking *sockets* frown. *Dryden.*

The nightly virgin, while her wheel she plies,
Foresees the storm impending in the skies,
When sparkling lamps their sputtering light advance,
And in the *sockets* oily bubbles dance.
Id., Translation of the Georgics, i. 535.

To nurse up the vital flame, as long as the matter will last, is not always good husbandry; it is much better to cover it with an extinguisher of honour, than let it consume till it burns blue, and lies agonizing within the *socket*, and at length goes out in no perfume.—*Collier.*

2. Receptacle of the eye.

His eye-balls in their hollow *sockets* sink;
Bereft of sleep, he loaths his meat and drink;
He withers at his heart, and looks as wan
As the pale spectre of a murder'd man.
Dryden, Palamon and Arcite, i. 526.

3. Any hollow that receives something inserted.

The *sockets* and supporters of flowers are figured, as in the five brethren of the rose, and *sockets* of gilliflowers.—*Bacon.*

Gomphosis is the connection of a tooth to its *socket*.—*Wiseman, Surgery.*

As the weight leans wholly upon the axis, the grating and rubbing of these axes against the *sockets* wherein they are placed, will cause some inaptitude and resistency to that rotation of the cylinder which would otherwise ensue.—*Bishop Wilkins.*

On either side the head produce an ear,
And sink a *socket* for the shining share.
Dryden, Translation of the Georgics, i. 252.

Sócketchisel. *s.* Stronger sort of chisel.

Carpenters, for their rougher work, use a stronger sort of chisels, and distinguish them by the name of *socketchisels*; their shank made with a hollow socket a-top, to receive a strong wooden sprig made to fit into the socket.—*Moxon, Mechanical Exercises.*

Sóckless. *adj.* Wanting socks or shoes.

You shall behold one pair of legs, the feet of which were in times past *sockless*, but are now, through the change of time that alters all things, very strangely become the legs of a knight and courtier.—*Beaumont and Fletcher, Woman Hater.*

Sócle. *s.* [Italian, *zoccolo* = shoe.] In *Architecture.* Square member, under the bases of statues and pedestals of vases: (it serves as a foot or stand).

A *socle* differs from a pedestal in being without base or cornice.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

Sócman. *s.* Socager.

In almost every page [Domesday Book] we meet with tenants either of the crown, or of other lords, denominated thanes, freeholders, (liberi homines,) or *socagers* (*socmanni.*) Some of these, it is stated, might sell their lands to whom they pleased; others were restricted from alienation. . . . I am not aware that military service is specified in any instance to be due from one of these tenants; though it is difficult to speak as to a negative proposition of this kind with any confidence. . . . It has been shown in another place how the right of territorial jurisdiction was generally, and at last inseparably, connected with feudal tenure. Of this right we meet frequent instances in the laws and records of the Anglo-Saxons, though not in those of an early date. A charter of Edred grants to the monastery of Croyland *soc, sac*, toll, team, and infangthef; words which generally went together in the description of these privileges, and signify the right of holding a court to which all freemen of the territory should repair, of deciding pleas therein, as well as of imposing amercements according to law, of taking tolls upon the sale of goods, and of punishing capitally a a thief taken in the fact within the limits of the manor. . . . Some have derived their name from the Saxon *soc*, which signifies a franchise, especially one of jurisdiction. And whatever may come of this etymology, which is not perhaps so well established as that from the French word *soc*, a ploughshare, they undoubtedly were suitors to the court-baron of the lord, to whose *soc*, or right of justice, they belonged. . . . It is not easy to decide between these two derivations of the words *socage* and *socman*. On the one hand, the frequent recurrence in Domesday-book of the expression, *socmanni* de *socâ* Algari, &c. seems to lead us to infer that these words, so near in sound, were related to each other. Somner . . . is clearly for this derivation. But Bracton . . . derives *socage* from the French *soc*, and this etymology is curiously illustrated by a passage in Blomefield's History of Norfolk. In the manor of Cawston, a mace, with a brazen hand holding a ploughshare, was carried before the steward as a sign that it was held by *socage* of the duchy of Lancaster. Perhaps, however, this custom may be thought not sufficiently ancient to confirm Bracton's derivation.—*Hallam, View of the State of Europe during the Middle Ages*, ch. viii. pt. ii. and note.

(See, also, under Socage.)

Socmanry. *s.* Tenure by socage.

It shall be lawful for the sokeman of the sokemanry of the said Robert le Fitz-Walter to demand the court of the said Robert.—T. Blount, Ancient Tenures, p. 119.

Sócome. *s.* [A.S. *soc.*] Custom of tenants to grind corn at their lord's mill: (in the extract, as the *second element* in a *compound*).

There is *bond-socome*, where tenants are bound to grind at the lord's mill; and *love-socome*, where they do it freely out of love to their lord.—*Cowell.*

Sŏd. *s.* [*sward.*] Turf; clod.

Here fame shall dress a sweeter *sod*
Than fancy's feet have ever trod. *Collins, Odes.*
I trod
My brothers' graves without a *sod.*
Byron, The Prisoner of Chillon.

Sóda. *s.* In *Chemistry.* Oxide of sodium; the word, however, is used *commercially* to denote other less simple combinations, as the *hydrates* and *carbonates*. Soda and potassa are the two typical alkalis; indeed in the previous editions the explanation, or definition, is simply Alkali.

Caustic *soda* is ... used in chemical researches, in bleaching, and in the manufacture of soap. It is prepared by boiling a solution of crystalized carbonate of *soda* in four or five parts of water, with half its weight of recently slaked or sifted lime. At the end of half an hour the vessel ... may be removed from the fire, and covered carefully, till the calcareous matter has settled into a solid magma at the bottom. The clear supernatant lye may then be decanted into bottles for use in the liquid state, or evaporated, out of contact of air, till it assumes an oily appearance, then poured upon an iron or marble slab, broken into pieces, and put up in phials secured with greased stoppers or corks.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Sóda-wáter. *s.* See first extract.

Soda-water is the name given to water containing a minute quantity of *soda*, and highly charged with carbonic acid gas, whereby it acquires a sparkling appearance, an agreeable pungent taste, an exhilarating quality, and certain medicinal powers. —*Ure, Dictionary of Arts, Manufactures, and Mines.*

Nor e'en the blest sherbet, combined with snow,
Nor the first sparkle of the desert spring,
Nor Burgundy, in all its sunset glow,
After long travel, ennui, love or slaughter,
Vie with that glass of hock and *soda-water.*
Byron, Don Juan, ii. 180.

We took him home, and put *him* to bed,
And told his wife and daughter
To give him next morning a couple of red
Herrings and *soda-water.* *Barham.*

Sodáic. *adj.* Used sometimes as *soda* adjectival; e. g. '*Sodaic* powders' may be read on druggists' labels.

Sodálity. *s.* [N.Fr. *sodalité*; Lat. *sodalitas, -atis.*] Fellowship; fraternity.

Sodalities of all sorts and conditions whatsoever, either secular or ecclesiastical.—*Partheneia Sacra*, p. 180: 1633.

Mix it with *sodden* wines and raisins.—*Dryden.*

Sódium. *s.* [the termination *-um* belonging to the technical language of *Chemistry* shows that the word is the name of a metal.] Metallic basis of soda.

Pure *sodium* ... is white like silver; softer and more malleable than any other metal, and may be readily reduced into very thin leaves. ... If a drop of water be thrown upon it, it becomes so hot by the chemical action as to take fire.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Sódomite. *s.* One guilty of sodomy.

Sódomy. *s.* [from Sodom, the city of Scripture, doomed, along with Gomorrah, for its wickedness.] Unnatural crime.

Soe. *s.* Large wooden vessel with hoops, for holding water: (used in the extract as the *first element* in a *compound.* Probably connected with Sodden, Seethe, Souchy, &c.)

It may be justly feared, that the title of fundamentals, being ordinarily confined to the doctrines of faith, hath occasioned that great scandal in the church of God, at which so many myriads of *solifidians* have stumbled, and fallen irreversibly, by conceiving heaven a reward of true opinions.—*Hammond.*

Solifídian. *adj.* Professing the tenets of a solifidian.

3. In *Ornithology.* Extinct brevipennate (short-winged) bird akin to the Dodo; Didus solitarius, or Pezophaps solitaria.

I now proceed to notice another bird of equally remarkable structure to the Dodo, and the evidence, both historical and osteological, of whose existence, though less abundant, is equally positive. The Island of Rodriguez . . . gave birth to an apterous bird called the *solitaire*, which seems to have been an homologous representative of the Dodo in [the Mauritius]. The name *solitaire* had been given to an allied, though doubtless distinct bird in Bourbon. . . . Leguat . . . probably supposed the Rodriguez bird to be the same, and therefore gave it the name which other voyagers had imposed on the Bourbon bird. But as Leguat's bird is the type of the Didus solitarius of systematists, I prefer retaining for it 'par excellence,' the name of *solitaire*.—*H. Strickland, The Dodo and its Kindred.*

Solitárian. *s.* Hermit; solitary.

This man gathered together all the dispersed monks and other *solitarians* of Italy, so that in a short time he had no less than twelve monasteries about him.—*Sir R. Twisden, Monastic Life*, p. 8.

Sólitariness. *s.* Attribute suggested by Solitary; solitude; forbearance of company; habitual retirement.

2. In *Ornithology.* Solitaire.

Of all the birds in the island the most remarkable is that which goes by the name of the *solitary*, because it is very seldom seen in company, though there are abundance of them. The feathers of the males are of a brown grey colour; the feet and beak are like a turkey's, but a little more crooked. They have scarcely any tail, but their hind-part covered with feathers is roundish, like the crupper of a horse. . . . They never fly; their wings are too little to support their bodies; they only serve to beat themselves, and flutter when they call one another. . . . The dates of the plantane are bigger than those of the palm-tree. Having abundance of better things to feed on, fish, and flesh, fruits, &c., we left the dates for the turtles and other birds, particularly the *solitaries*. . . . The [sea-fowl] lay three times a year, and but one egg at a time, like the *solitaries*. . . .

My mouth confesses from the abundance of my heart,
That my soul is touched with sorrow
Now I am about to leave thy wholesome air,
Thy good palm wine, thy excellent melons,
Thy *solitaries*, thy lamantines,
Thy hills always verdant,
The clear water of thy rivers,
Thy fruitful and smiling sun,
And all thy innocent and rare delight.

Somátic. *adj.* [Gr. σωματικός, from σῶμα, -ατος = body.] Connected with, relating to, constituted by, the body.

The death of the body as a whole, which may appropriately be termed *somatic* death, becomes a necessary consequence of the death of a certain part of it, or molecular death, only when the cessation of activity in the latter interferes with the elaboration, the circulation, or the depuration of the blood, which supplies not merely the nutritive pabulum in every part of the organism, but also the oxygen which is essential to the activity of the nervo-muscular apparatus. . . . This term [*somatic*] was first suggested by Dr. Pritchard, in the place of the less accurate term *systemic*, which was previously in use.—*Dr. Carpenter, Principles of Human Physiology*, § 1065 and note.

Has insanity a centrifugal or a centripetal, a subjective or an objective origin? Milton, Paradise Lost, i. 204.

6. Sometimes in *Logic* it is equivalent to *all*.

Remember that *some* does not guarantee more than one. There is much distinction between none (no one) as the logical contrary of *some* (one or more), and nothing as the limit of *some* quantity. In passing from the proposition, 'no man can live without air,' to 'there is one man at least who can live without air,' we make a transition which alters the notions or concepts attached to man; the word man no longer represents entirely the same idea. But in passing from an indenture of apprenticeship with no premium at all, to one with a premium of one farthing, we make no change of notion. An Act was once passed exempting such indentures from duty when the premium was under five pounds sterling. The Court of King's Bench held that the exemption did not apply when there was no premium at all, because 'no premium at all' is not 'a premium under five pounds.' That is, the judges gave to nothing as the terminus of continuous quantity the force of none, as the logical contrary of *some*; and violated to the utmost the principle of the Act, which was intended as a relief to those who could only pay small premiums, and 'à fortiori,' or rather 'à fortissimo,' to those who could pay none at all. Lawyers ought to be much of logicians and something of mathematicians. *Some* may be All. In common language this is or is not the case, according to the speaker's state of knowledge. But in logic there are no implications which depend upon the matter. When a logician says that every X is Y, he means that all the X's are *some* Y's, and that some Y's are all the X's. Whether he have or have not exhausted all the Y's, he does not here profess to state, even if he knew. Again, when he says '*some* X's are Y's,' he does not mean to imply '*some* X's are not Y's'; that is, his *some* may be all, for anything he asserts to the contrary. But when two propositions, each of which contains the vague *some*, are conjoined, the mere meaning may render the conjunction an absurdity, unless *some* take the force of all. Just as in algebra, an equation, having two unknown quantities, has the values of those quantities vague; but when two such equations are conjoined, those values become definite: so in logic, in which the same thing occurs. Thus, the two propositions: all X's are some Y's, and all Y's are some X's, when true together, force the inference that *some* must in both cases be all. Forget that *some* is that which may be all, and these two propositions appear to contradict one another; very distinguished logicians have asserted that they do so.—*De Morgan, Syllabus of a Proposed System of Logic*, § 14.

Somnámbulate. *v. n.* [Lat. *somnus* = sleep; *ambulo* = I walk.] Walk in one's sleep; dream or wander, as a somnambulist.

Somnámbulism. *s.* Sleep walking.

The Jacobins are buried; but their work is not; it continues 'making the tour of the world,' as it can. It might be seen lately, for instance, with bared bosom and death-defiant eye, as far on as Greek Missolonghi; strange enough, old slumbering Hellas was resuscitated, into *somnambulism* which will become clear wakefulness, by a voice from the Rue St. Honoré!—*Carlyle, French Revolution*, pt. ii. b. i. ch. v.

The phenomena of *somnambulism*... occurs in a state of consciousness so far distinct from the ordinary waking condition, as not to be connected with it by the ordinary link of memory.... In either of these extreme forms of *somnambulism* [natural and artificial], and in the numerous intermediate phases which connect the two, the consciousness seems entirely given up to the one impression which is operating upon it at the time; so that whilst the attention is exclusively directed upon any object, whether actually perceived by the senses, or brought suggestively before the mind by previous ideas, nothing else is felt. Thus there may be complete insensibility to bodily pain, the *somnambulist's* whole attention being given to what is passing in his mind.... So, again, when the attention of the *somnambulist* is fixed upon a certain train of thought, whatever may be spoken in harmony with this, is heard and appreciated, but what has no relation to it, or is in discordance with it, is disregarded.—*Dr. Carpenter, Principles of Human Physiology*, § 827: 1853.

Somnámbulist. *s.* One who walks in his sleep.

The *somnambulist* directs himself with unerring certainty through the most intricate windings, and over the most dangerous precipices; and, without any apparent assistance from the organs of sense, has been known to read, write, and compose.—*Bishop Porteus, Sermons*: 1789.

(See, also, under Somnambulism.)

Another form of this word is *Summers*; upon which the remark has been made that those proper names which seem to be derived from the seasons are only so in appearance. *Spring* is a topographical term and *Winter* = Vintner: *Autumn*, being non-existent.)

We are desirous to redress such abuses and grievances, as are said to grow by *somners* or apparitors.—*Constitutions and Canons Ecclesiastical*, § 138.

Of a *sonata* on his viol,
Unless he had the total gut,
Whence every string at first was cut?

This Preface [of Purcel] was written a year after the death of Charles II. and prefixed to a set of *sonatas*.—*Mason, Essays, Historical and Critical, on English Church Music.*

Sónnet. *s.* [Fr.; Italian, *sonetto.*]

1. Short poem consisting of fourteen lines, of which the rhymes are adjusted by a particular rule.

It is known by adepts that the *sonnet* is composed of two quatrains and two tercets; and that this form, most frequently contained in four rhymes, never admit more than five. Adepts find an harmonious grace in its peculiar cut or divisions: in its two quatrains which, on similar rhymes, exhibit the subject and prepare the emotion: in its two tercets, which by a more rapid movement answer the excited expectation, complete the image, and satisfy the natural emotion. The *sonnet*, essentially musical, essentially founded on the harmony of the sounds, the name of which it bears, acts on the heart much more by the words than by the thought: the richness, the plenitude of rhymes, constitute a part of its grace. The recurrence of the same sounds makes an impression so much the more forcible in proportion to its being more repeated and more complete; the reader is astonished at finding himself moved, without almost being able to say what has contributed to cause his natural emotion. . . . Proceeding now to give a particular account of mechanism of the Italian *sonnet*, which is κατ' ἐξοχήν; or par excellence, the *sonnet*, it is to be observed that all other kinds, whatever be the reputation which they possess or deserve, are not entitled to the appellation. They are irregular in their structure, and rather resemble a mazy wilderness than an elegantly arranged garden; and certainly are devoid of that systematic form which constitutes the difficulty and beauty, and even essence, of the *sonnet*. The mechanism, then, for the Italian *sonnet* is the following:—The quatrains which form the first eight verses or lines, ought to be on two different rhymes, which may be arranged in three different manners: in the first, which is the most used; the first line rhymes with the fourth, the fifth, and the eighth; the second, with the third, the sixth, and the seventh: in the second, the first line rhymes with the third, the fifth, and seventh; the second with the fourth, sixth, and eighth: in the third, the first line rhymes with the third, the sixth, and eighth; the second, with the fourth, the fifth, and seventh. With regard to the six lines of the two tercets, there are also three sorts of arrangement; the lines of the first tercet, in the first instance, being on three different rhymes, which have their respective corresponding ones in the three verses of the second, in any order whatever, according to the will or necessity of the composer. Secondly, of these six lines the first is made to rhyme with the third and the fifth; the second with the fourth and the sixth. Lastly, the first rhymes with the third, fourth, and sixth; and the second only with the fifth.—*W. Pulling, Sonnets written strictly in the Italian Style, Prefatory Essay:* 1840.

Again, let me ask a person of the most refined musical taste, . . . when he has heard the finest quintetto of Haydn executed by four of the first violins in the kingdom, and the finest violincello, if he would desire it to be repeated with a duplication of the parts performed by flutes, or hautboys, and a bassoon? Sóphical. *adj.* Teaching wisdom. *Rare.*

All those books which are called *sophical*, such as the Wisdom of Sirach, &c., tend to teach the Jews the true spiritual meaning of God's economy.—*Dr. Harris, On the 53rd Chapter of Isaiah*, p. 256: 1739.

Sóphism. *s.* [Fr. *sophisme*; Lat. *sophisma.*] Fallacious argument; unsound subtilty; fallacy.

When a false argument puts on the appearance of a true one, then it is properly called a *sophism* or fallacy.—*Watts.*

I, who as yet was never known to show
False pity to premeditated woe,
Will graciously explain great nature's laws,
And hear thy *sophisms* in so plain a cause. *Harte.*

In every age it is the *sophism* of malignant and peevish men to traduce the cause of freedom itself, on account of the interested motives by which its ostensible advocates have frequently been actuated. —*Hallam, View of the State of Europe during the Middle Ages*, pt. iii. ch. viii.

Every political party, however honourable may be its objects and character, is liable to be disgraced by the association of such unscrupulous zealots. But though it is an uncandid *sophism* to charge the leaders with the excesses they profess to disapprove in their followers, it must be confessed that few chiefs of faction have had the virtue to condemn with sufficient energy the misrepresentations which are intended for their benefit.—*Id., Constitutional History of England*, vol. i. ch. iv.

Philotas, the physician, lived in his service; and one day at supper, when Philotas silenced a tiresome talker with a foolish *sophism*, the young Antony gave him as a reward the whole sideboard of plate. —*Sharpe, History of Egypt*, ch. x.

The ambiguity of the word 'infinite' is the real fallacy in the amusing logical puzzle of Achilles and the Tortoise, a puzzle which has been too hard for the ingenuity or patience of many philosophers, and among others of Dr. Thomas Brown, who considered the *sophism* as insoluble; as a sound argument, though leading to a palpable falsehood; not seeing that such an admission would be a reductio ad absurdum of the reasoning faculty itself. The fallacy, as Hobbes hinted, lies in the tacit assumption that whatever is infinitely divisible is infinite.—*J. S. Mill, System of Logic*, pt. v. ch. vii.

Sóphist. *s.* [Fr. *sophiste*; Lat. *sophista.*] Professor of philosophy.

The court of Crœsus is said to have been much resorted to by the *sophists* of Greece in the happy beginning of his reign.—*Sir W. Temple.*

He [Alexander] was desirous of carrying away with him some of the Indian *sophists* as companions of Anaxarchus. Fifteen of them were pursuing their contemplative exercises in a grove near Taxila, and Onesicritus was sent to them with the king's invitation. It was rejected with disdain by Dandamis, the eldest and head of the cœnobites: but one of them—by the Greeks nicknamed Calanus—was induced, it is said, by the persuasion of Taxiles, to accept it, and accompanied Alexander to the end of his expedition; a sacrifice of his independence, by which he incurred the contempt of his fellow-recluses.—*Bishop Thirlwall, History of Greece*, ch. liii.

Now such musical teachers as Damon, and the others above-mentioned, were *sophists*, not merely in the natural and proper Greek sense of that word, but to a certain extent, even in the special and restricted meaning which Plato afterwards thought proper to confer upon it. A *sophist*, in the genuine sense of the word, was a wise man—a clever man—one who stood prominently before the public as distinguished for intellect or talent of some kind. Thus Solon and Pythagoras are both called *sophists*; Thamyras, the skilful bard, is called a *sophist*: Sokrates is so denominated, not merely by Aristophanes, but by Æschines. Aristotle himself calls Aristippus, and Xenophon calls Antisthenes both of them disciples of Sokrates by that name: Xenophon, in describing a collection of instructive books, calls them 'the writings of old poets and *sophists*,' meaning by the latter word prose-writers generally. Plato is alluded to as a *sophist*, even by Sokrates: Sokrates himself was harshly criticised as a *sophist*, and defends both himself and his profession. Lastly, Timon, the friend and admirer of Pyrrho, about 300–280 B.C., who bitterly satirised all the philosophers, designated them all, including Plato and Aristotle, by the general name of *sophists*. In this large and comprehensive sense, the word was originally used, and always continued to be so understood among the general public. But along with this idea, the title *sophist* also carried with it or connoted a certain invidious feeling. Timon, who hated the philosophers, thus found the word *sophist* exactly suitable in sentiment as well as meaning to his purpose in addressing them. Now, when in the period succeeding 450 B.C., the rhetorical and musical teachers came to stand before the public at Athens in such increased eminence, they, of course, as well as other men intellectually celebrated, became designated by the appropriate name of *sophists*. But there was one characteristic peculiar to themselves whereby they drew upon themselves a double measure of that invidious sentiment which lay wrapped up in the name. They taught for pay: of course, therefore, the most eminent among them taught only the rich, and earned large sums: a fact naturally provocative of envy, to some extent, among the many who benefited nothing by them; but still more among the inferior members of their own profession. But even great minds, like Sokrates and Plato, though much inferior to any such envy, cherished in that age a genuine and vehement repugnance against receiving pay for teaching. . . . Plato not only stole the name out of general circulation, in order to fasten it specially to his opponents, the paid teachers, but also connected with it express discreditable attributes, which formed no part of its primitive and recognised meaning, and were altogether distinct from, though grafted upon, the vague sentiment of dislike associated with it. Aristotle, following the example of his master, gave to the word *sophist* a definition substantially the same as that which it bears in the modern languages—'an impostrous pretender to knowledge, a man who employs what he knows to be fallacy, for the purpose of deceit and getting money.' And he did this at a time when he himself, with his estimable contemporary, Isokrates, were considered at Athens to come under the designation of *sophists*, and were called so by every one who disliked either their profession or their persons.—*Grote, History of Greece*, pt. ii. ch. lxvii.

Shakespear, King Lear, iii. 4.

Divers experiments succeeded not, because they were at one time tried with genuine materials, and at another time with *sophisticated* ones.—*Boyle.*

These men have obscured and confounded the natures of things, by their false principles and wretched *sophistry*; though an act be never so sinful, they will strip it of its guilt.—*South, Sermons.*

Numerous similar instances might be found of fallacies thus veiled by indistinctness of language in most of the treatises extant on 'fatalism,' 'free-agency,' and other kindred matters; in which the words 'may,' 'can,' 'possible,' &c., are understood partly in reference to power, partly to probability. In these, however, and in all other cases where indistinctness of language serves to veil *sophistry* from a man's hearers, or—which is quite as common—from himself, the expressions must always appear intelligible, and we must follow, or imagine we follow the meaning, as we proceed. There are, however, certain spurious kinds, as they may be called, of writing or speaking, (distinct from what is strictly termed *sophistry,*) in which obscurity of style may be apposite.—*Archbishop Whately, Elements of Rhetoric,* pt. iii. ch. i. § 4.

What probability was there that any sheriff would pack a jury, that any barrister would employ all the arts of *sophistry* and rhetoric, ... in order to convict an innocent person of burglary or sheepstealing? But on a trial for high treason a verdict of acquittal must always be considered as a defeat of the government; and there was but too much reason to fear that many sheriffs, barristers, and judges might be impelled ... to do anything which might save the government from the inconvenience and shame of a defeat.—*Macaulay, History of England,* ch. xviii.

Sorites. *s.* [from Gr. σωρὸς = heap.] In *Logic.* Series of elliptic syllogisms, i.e. syllogisms in which the conclusion of all but the last is omitted; e.g. instead of A = B, C = A, C = B, the sequence is C = A, D = C, E = D, E = A.

The instances given in the extracts are legitimate; but it is easy to see how the *sorites* may lend itself to a sophism. Let A = 100; B = a large number; C = 99; D = 98; and E = 97. By continuing the train of argument in a series of numbers, each imperceptibly smaller than the number preceding, we arrive at *one*; and thus, inasmuch as, *in the fact of its being a large number*, it has been treated as equal to any of the ones between it and 99 (99 itself being equal, *as a large number*, to 100), we get as the result 1 = 100. That this is not the case is evident. Where, however, can we draw the distinction? It is chiefly as an instrument of sophistry that the *sorites* has commanded attention; and this we expect from its name. A heap (σωρὸς) of wheat gives us *large* numbers of grains. Take away one at a time, and when does the number become *small?* Another familiar illustration is got from the hairs in a horse's tail. They are *many*. Pluck them out one by one, and say when they become *few*. This is the result of a series of subtractions. A series of additions gives us, of course, the converse. *One* is a small number; a *hundred* a large one. But add *one* at a time, and the difficulty of saying where the small number ends and the large one begins is manifest.

Chrysippus the Stoick invented a kind of argument, consisting of more than three propositions, which is called *sorites*, or a heap.—*Dryden.*

Sorites is when several middle terms are chosen to connect one another successively in several propositions, till the last proposition connects its predicate with the first subject. Thus, all men of revenge have their souls often uneasy; uneasy souls are a plague to themselves; now to be one's own plague is folly in the extreme.—*Watts, Logick.*

The *sorites* . . . is strictly syllogistic; as may be seen by the examples. If the premises stated be true, the conclusion must be true. For, when you have a string of syllogisms in the first figure, in which the conclusion of each is made the premiss of the next, till you arrive at the main or ultimate conclusion of all, you may sometimes state these briefly, in the form called *sorites*; in which the predicate of the first proposition is made the subject of the next; and so on, to any length, till finally the predicate of the last of the premises is predicated (in the conclusion) of the subject of the first: . . . 'The English are a brave people; a brave people are free; a free people are happy, therefore the English are happy.' A *sorites*, then, has as many middle terms as there are intermediate propositions between the first and the last; and consequently, it may be drawn out into as many separate syllogisms; of which the first will have, for its major premiss, the second, and for its minor, the first, of the propositions of the *sorites*; as may be seen by the example. The reader will perceive also by examination of that example, and by framing others, that the first proposition in the *sorites* is the only minor premiss that is expressed: when the whole is resolved into distinct syllogisms, each conclusion becomes the minor premiss of the succeeding syllogism. Hence, in a *sorites*, the first proposition, and that alone, of all the premises, may be particular; because in the first figure the minor may be particular, but not the major; and all the other propositions, prior to the conclusion, are major premises. It is also evident that there may be, in a *sorites*, one, and only one, negative premiss, viz. the last: for if any of the others were negative, the result would be that one of the syllogisms of the *sorites* would have a negative minor premiss; incompatible with correctness.—*Archbishop Whately, Elements of Logic*, b. ii. ch. iv. § 7.

(Cotgrave.) As the sorrel stems are of a brown-red colour, strikingly conspicuous in a field of mowing-grass, the word may simply signify the colour of sorrel. On the other hand it may be from Platt-Deutsch, *soor*, dry; Old High German *sauren*, *soren*, to dry. See Scar. The *sowbread* does afford rich food for swine,
Physick for man, and garland for the shrine.
Tate, Translation of Cowley.

Cyclamens are called *sowbreads*, because they are the favourite food of the wild boars of Sicily; yet they are very acrid plants, especially the root, whose acrimony is not much perceived at the first tasting, but soon becomes intolerable. It has been used in medicine, its action being that of a drastic purgative, and formerly it was much esteemed as an emmenagogue; but whether its reputation was owing to its actual powers, or to its placentiform root is doubtful. Sibthorp tells us that the modern Greeks use the bruised root of Cyclamen persicum as a means of driving the Sepia octopodia out of its holes. It is said that these roots, notwithstanding their acridity, are eatable or innoxious when dried or roasted.—*Lindley, The Vegetable Kingdom.*

Soy. *s.* [*Chinese.*] See second extract.

Some provinces [of Japan] furnish better *soy* than others; but, exclusively of this, it grows better and clearer through age. Its colour is invariably brown, and its chief excellence consists in the agreeable salt taste which it possesses.—*Translation of Thunberg's Travels*, vol. iv. p. 121: 1795.

Soy is a liquid condiment, or sauce, imported chiefly from China. It is prepared with a species of white haricots, wheat flour, common salt, and water; in the proportions respectively of 50, 60, 50, and 250 pounds. This dough is next spread an inch or an inch and a half thick, upon the flat vessel (made of thin staves of bamboo); and when it becomes hot and mouldy, in two or three days, the cover is raised upon bits of stick, to give free access of air. When it has become as hard as stone, it is cut into small fragments, thrown into an earthen vessel, and covered with the 250 pounds of water having the salt dissolved in it. The whole is stirred together, and the height at which the water stands is noted. The vessel being placed in the sun, its contents are stirred up every morning and evening; and a cover is applied at night, to keep it warm and exclude rain. As the mass diminishes by evaporation, well-water is added; and the digestion is continued till the salt water has dissolved the whole of the flour and the haricots; after which the vessel is left in the sun for a few days, as the good quality of the *soy* depends on the completeness of the solution, which is promoted by regular stirring. When it has at length assumed an oily appearance, it is poured into bags and strained.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Spaad. *s.* [see Spar.] Native sulphate of lime.

Confounded, though immortal.
Milton, Paradise Lost, i. 50.

In a lever the motion can be continued only for so short a *space*, as may be answerable to that little distance betwixt the fulciment and the weight.—*Bishop Wilkins, Mathematical Magick.*

God may defer his judgments for a time, and give a people a longer *space* of repentance: he may stay till the iniquities of a nation be full; but sooner or later they have reason to expect his vengeance.—*Archbishop Tillotson.*

The lives of great men cannot be writ with any tolerable degree of elegance or exactness, within a short *space* after their decease.—*Addison, Freeholder.*

4. Small period of time; short while.

Milton, Paradise Lost, xi. 496.

5. As an object of thought, *space*, like *time*, has been the subject of extreme opinions, chiefly in respect to the extent to which our conceptions of it are derived from experience and *à posteriori*, or are independent of experience and *à priori.*

Space and motion can never be actually infinite: they have a power only and a capacity of being increased without end; so that no *space* can be assigned so vast, but still a larger may be imagined; no motion so swift or languid, but a greater velocity or slowness may still be conceived.—*Bentley.*

Space, like time, is only the intuition or the concept of a certain correlation of existence—of existence therefore, 'pro tanto' as conditioned. It is thus itself only a form of the conditioned. But, apart from this, thought is equally powerless in realizing a notion either of the absolute totality, or of the infinite immensity of *space.* And while time and *space*, as wholes, can thus neither be conceived as absolutely limited, nor as infinitely unlimited; so their parts can be represented to the mind neither as absolutely individual nor as divisible to infinity. The universe cannot be imagined as a whole which may not also be imagined as a part; nor an atom be imagined as a part which may not also be imagined as a whole.—*Sir W. Hamilton, Discussions on Philosophy, &c., Philosophy of the Unconditioned*, p. 39: 1853.

I assert . . . that *space* is not a notion obtained by experience. Experience gives us information concerning things without us; takes for granted their existence in *space.* Experience acquaints us what are the form, position, magnitude of particular objects: but that they have form, position, magnitude, presupposes that they are in *space.* We cannot derive from appearances by the way of observation, the habit of representing things to ourselves as in *space*; for no single act of observation is possible any otherwise than by beginning with such a representation, and conceiving objects as already existing in *space.*—*Whewell, Philosophy of Inductive Sciences*, pt. i. b. ii. ch. ii. § 1.

The fact on which Kant bases his assertion, that *space* is a subjective form and not an objective reality—the fact, namely, that we can conceive the annihilation of bodies, but cannot conceive the annihilation of *space*—is a fact quite comprehensible on the hypothesis that all knowledge is from without. Making no attempt to analyse the notion of *space*, which, even if here practicable, would entail too long a digression, it will suffice for present purposes to say that we know *space* as an ability to contain bodies. I am aware that this is no definition properly so-called; seeing that as the words 'contain' and 'bodies' both imply ideas of *space*, the definition involves the thing to be defined. But leaving out, as irrelevant, all consideration of the mode in which we come by our ideas of *space*, and of bodies as occupying *space*, it will, I think, be admitted, that the antithesis between bodies and an ability to contain bodies, truly represents the contrast in our conceptions of the sensible Non-ego (matter) and the insensible Non-ego (*space*). And if we know *space* as an ability to contain bodies, the fact that we cannot conceive its annihilation, is quite accountable on the experience-hypothesis. Bodies we can conceive annihilated, because, by evaporation, and by burning, we have seen them annihilated—annihilated, that is, to the senses. But the ability to contain bodies we cannot conceive annihilated, because we have never known it absent. In all our experience that ability has remained constant; and hence the conception of it is similarly constant in our minds. Evidently, then, our powerlessness to conceive the non-existence of *space* requires no such hypothesis as that of Kant for its explanation.—*Herbert Spencer, Principles of Psychology.*

Space. *v. n.* [Lat. *spatior.*] Rove; spatiate.

Spádix. *s.* [Lat. = palm-branch with the fruit on it, the colour being light red or bay.] In *Botany.* Form of inflorescence in which the flowers are arranged round a fleshy rachis; often enclosed by a spathe.

When the flowers are closely arranged around a fleshy rachis, which is enclosed in a kind of bract called a *spathe*, the inflorescence is termed a *spadix*. This is chiefly found in the Aral and Palmal alliances. It is frequently terminated by a soft club-shaped mass of cellular substance which extends far beyond the flowers, and is itself entirely naked; this is an instance of a growing point analogous to what forms the spine of a branch, except that it is soft and blunt, instead of being hard and sharp-pointed.—*Lindley, Introduction to Botany*, vol. i. p. 320: 1848.

There is great probability that a thousand *sparrows* will fly away at the sight of a hawk among them.—*Watts.*

As the *second element* in a *compound.*

The *tree-sparrow* is a rare species in most of the extreme southern counties of England, and is not included in some county catalogues of Sussex, Dorsetshire, Devonshire, or Cornwall; but Mr. E. H. Rodd of Penzance, mentions in a private communication, that the Falmouth Museum contains a single specimen. It is not uncommon in Shropshire, as I learn from Messrs. Robert Slaney and Thomas Eyton. In Lancaster it has been observed about Chatmoss. On the eastern side of England this bird appears to be a winter visitor at Southchurch in Essex, according to the observations of Mr. Parsons. It is found in Surrey, Suffolk, Norfolk, Cambridgeshire, Rutland, Lincolnshire, about Wainfleet, in Yorkshire at various localities; in Durham, and also in Northumberland, but I am unable to trace it much farther north than Newcastle, and it does not appear to have been noticed in Scotland.—*Yarrell, History of British Birds.*

The difference between the size of the male and female *sparrow-hawks* is more disproportionate than in most other birds of prey; the former sometimes scarcely weighing five ounces, the latter nine ounces. The length of the male is about twelve inches, the breadth twenty-three; the female is fifteen inches long, in breadth twenty-six. — *Pennant, British Zoology.*

[I] once took a partridge with a *sparrow-hawk* of [my] own breaking ten days after he had been taken wild from a wood. These hawks must be kept in a high condition, and cannot fly when there is the least wind; they are upon the whole more difficult to manage than strong birds. The flight of the *sparrow-hawk* is rapid for a short distance; he will take partridges at the beginning of the season, and is the best of all the hawks for landrails.—*Sir J. Sebright,* in *Yarrell, History of British Birds.*

The *sparrow-hawk* is another short-winged hawk, but of small comparative size; in its habits very similar to the goshawk last described, and has been aptly termed a goshawk in miniature. It has, however, been separated from the goshawk generically, on account of the tarsi and toes being long and slender; and the term accipiter originally bestowed upon it by our countryman and naturalist Ray has been restored to it.—*Yarrell, History of British Birds.*

In the month of May, the oysters cast their spawn, which the dredgers call their *spat*: it is like to a drop of candle, and about the bigness of an halfpenny. The *spat* cleaves to stones, old oyster-shells, pieces of wood, and such like things, at the bottom of the sea, which they call cultch. It is probably conjectured that the *spat* in twenty-four hours begins to have a shell. In the month of May, the dredgers, by the law of the Admiralty Court, have liberty to catch all manner of oysters of what size soever. When they have taken them, with a knife they gently raise the small brood from the cultch, and then they throw the cultch in again to preserve the ground for the future, unless they be so newly *spat* that they cannot be safely severed from the cultch: in that case they are permitted to take the stone or shell, &c., that the *spat* is upon, one shell having many times twenty *spats.*—*Bishop Sprat,* in *Transactions of the Royal Society.*

It is proved experimentally, that every bundle of nerve-fibres and every ganglion, has a special duty; and that each part of every such bundle and every such ganglion, has a duty still more special. Can it be, then, that in the great hemispherical ganglia alone, this *specialization* of duty does not hold? If it be urged that there are no marked divisions among the fibres of the cerebrum, I reply—neither are there among those contained in one of the bundles proceeding from the spinal chord to any part of the body: yet each of the fibres in such bundle has a function more or less special; though a function included in that of the bundle considered as a whole. And this is just the kind of *specialization* which may be presumed to exist in different parts of the cerebrum.—*Herbert Spencer, Principles of Psychology*, p. 607.

A special idea is called by the schools a *species*; it is one common nature that agrees to several singular individual beings: so horse is a special idea or *species*, as it agrees to Bucephalus, Trot, and Snowball.—*Watts.*

2. In *Logic*. See extract.

It is evident from what has been said that the genus and difference put together make up the *species*; e.g. 'rational' and 'animal' constitute 'man;' so that, in reality, the *species* contains the genus [i.e. implies it;] and when the genus is called a whole, and is said to contain the *species*, this is only a metaphorical expression, signifying that it comprehends the *species*, and its own more extensive signification.—*Archbishop Whately, Elements of Logic*, b. ii. ch. v. § 4.

3. Class of nature; single order of beings.

He intended the care of *species* or common natures, but letteth loose the guard of individuals or single existences.—*Sir T. Browne.*

The Phenix Pindar is a whole *species* alone.—*Cowley.*

If animal, both of us may,
As justly pass for bears as they;
For we are animals no less,
Although of different *specieses*.
Butler, Hudibras, i. 1, 861.

Thou nam'st a race which must proceed from me,
Yet my whole *species* in myself I see.
Dryden, State of Innocence, ii. 1.

Species, when applied to organized beings is always applied (when we are speaking strictly, as naturalists) to such individuals as are supposed to be descended from a common stock, or which might have so descended; viz. which resemble one another (to use M. Cuvier's expression) as much as those of the same stock do. Now this being a point on which all (not merely naturalists) are agreed, and since it is a fact (whether an ascertained fact or not) that certain individuals are, or are not, thus connected, it follows that every question whether a certain individual or plant, belongs to a certain *species* or not, is a question not of mere arrangement, but of fact. But in the case of questions respecting genus, it is otherwise. If, e.g. two naturalists differed, in the one placing (as Linnæus) all the *species* of bee under one genus, which the other subdivided (as later writers have done into several genera) it would be evident that there was no question of fact debated between them, and that it was only to be considered which was the more convenient arrangement. If, on the other hand, it were disputed whether the African and the Asiatic elephant are distinct *species*, or merely varieties, it would be equally manifest that the question is one of fact, since both allow that if they are descended (or might have descended) from the same stock, they are of the same *species*; and if otherwise, of two: this is the fact, which they endeavour to ascertain, by such indications as are to be found.—*Archbishop Whately, Elements of Logic*, b. iv. ch. v. § 1.

A mind of superior or meaner capacities than human would constitute a different *species*, though united to a human body in the same laws of connexion: and a mind of human capacities would make another *species*, if united to a different body in different laws of connexion.—*Bentley, Sermons.*

The meaning attached to the term *species* in natural history is very definite and intelligible. It includes only the following conditions, namely separate origin and distinctness of race, evinced by the constant transmission of some characteristic peculiarity of organization. A race of animals or of plants marked by any peculiar character which has always been constant and undeviating, constitutes a *species*; and two races are considered as specifically different, if they are distinguished from each other by some characteristic which the one cannot be supposed to have acquired, or the other to have lost, through any known operation of physical causes; for we are hence led to conclude that the tribes thus distinguished have not descended from the same original stock.—*Prichard, Researches into the Physical History of Mankind*, b. ii. ch. i. sect. i.

When it can be shown that two races have had a separate origin, they are to be regarded as of different *species*, and, in the absence of proof, this is inferred, when we see some peculiarity of organization characteristic of each, so constantly transmitted from parent to offspring, that the one cannot be supposed to have lost, or the other to have acquired it, through any known operation of physical causes.—*Dr. Carpenter, Principles of Physiology, General and Comparative*, § 737: 1851.

It will . . . be seen . . . that the terms 'genus' and '*species*' not only differ very considerably in importance, but in signification also. Whilst the former is merely suggestive of a particular position which a creature occupies in a systematic scale (a position, however, which depends upon the various structural peculiarities which it possesses in common with other beings, which thus more or less resemble it), the latter expresses the actual creature itself; so that while one applies to several animals (of distinct natures and origins though bound together by a certain bond of imitation,) the other belongs to a single race alone, which it therefore exclusively indicates.—*T. Vernon Wollaston, On the Variation of Species*, ch. vi.

In considering the origin of *species* it is quite conceivable that a naturalist, reflecting on the mutual affinities of organic beings, on their embryological relations, their geographical distribution, geological succession, and other such facts, might come to the conclusion that each species had not been independently created, but had descended like varieties from other species. Nevertheless such a conclusion, even if well founded, would be unsatisfactory until it could be shown how the innumerable *species* inhabiting this world have been modified, so as to acquire that perfection of structure and co-adaptation which most justly excites our admiration.—*C. Darwin, On the Origin of Species.*

One main aim of his [Cuvier's] successors is, and long will be, to determine that point; or whether there be, indeed, any such at which the mutation of a *species* necessarily stops. The observed grades of departure from specific type are termed varieties, and the degree of variation in the offspring from the parent appears to be greatest in the lowest organisms. Consequently the definition or recognition of a *species* of Foraminifer, or Brachiopod, e.g. is much less easy than of a bird or a mammal.—*Owen*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

It is obvious that the names *species* and genus are merely relative; and that the same common terms may, in one case, be the *species* which is predicated of an individual, and in another case the individual of which a *species* is predicated: e.g. the individual, Cæsar, belongs to the *species* man; but man, again, may be said to belong to the *species* animal, &c., as we contemplate higher and more comprehensive terms. A *species*, in short, when predicated of individuals, stands in the same relation to them as the genus to the *species*, and when predicated of other lower *species*, it is then, in respect of these, a genus, while it is a *species* in respect of a higher genus. Such a term is called a subaltern *species* or genus; while the highest term of all, of which nothing can be predicated, is the summum genus; the lowest of all, which can be predicated of nothing, the infima *species*. The difference which, together with the genus, makes up the *species*, is termed the specific difference.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

3. Appearance to the senses; any visible or sensible representation.

An apparent diversity between the *species* visible and audible is, that the visible doth not mingle in the medium, but the audible doth.—*Bacon.*

The *species* of the letters illuminated with blue were nearer to the lens than those illuminated with deep red by about three inches, . . . but the *species* of the letters illuminated with indigo and violet appeared so confused and indistinct, that I could not read them.—*Sir I. Newton, On Opticks.*

Specifick difference is that primary attribute which distinguishes each species from one another, while they stand ranked under the same general nature or genus. Though wine differs from other liquids, in that it is the juice of a certain fruit, yet this is but a general or generick difference; for it does not distinguish wine from cyder or perry: the *specifick* difference of wine therefore is its pressure from the grape; as cyder is pressed from apples, and perry from pears.—*Watts.*

The writer of the volume in question meets me upon my own ground. Spéctrum. *s.* [Lat.] Display of prismatic colours, resulting from the decomposition of light.

This prism had some veins running along within the glass, from the one end to the other, which scattered some of the sun's light irregularly, but had no sensible effect in increasing the length of the coloured *spectrum.*—*Sir I. Newton, On Opticks.*

Mr. Huggins and Dr. Miller devised a method of seeking in the *spectra* of the fixed stars that evidence of the existence in them of known elementary substances which had been obtained in the case of the sun by Bunsen and Kirchhoff.... The *spectra* of the stars were compared by a method of simultaneous observation with the *spectra* of many of the terrestrial elements. ... On extending these researches to the Nebulæ, Mr. Huggins made the most unexpected discovery that the *spectra* of certain of these bodies are discontinuous, consisting of bright lines only.... During the last two years Mr. Huggins has examined the *spectra* of more than sixty nebulæ and clusters. This examination shows that these remarkable bodies may be divided into two great groups: viz. 1st, True or gaseous nebulæ, which furnish a discontinuous *spectrum,* consisting of two or three bright lines only; and 2nd, what we may distinguish as spurious nebulæ, or nebulous matter with clusters, which give a *spectrum* apparently continuous.... In the present year also Mr. Huggins has made a remarkable observation upon the small comet, known as comet No. 1, 1866. He ascertained that the minute nucleus gave a gaseous or discontinuous *spectrum*; whilst the *spectrum* of the coma, as though formed by suspended particles which reflected solar light, gave a continuous *spectrum.*—*President's (General Sabine's) Anniversary Address, Royal Society*: 1866.

The most magnificent *spectrum* that we are acquainted with, a combination, so to speak, of innumerable *spectral* bands placed side by side, is that which occurs when rain-drops are the reflecting and refracting media—the familiar but ever-glorious rainbow.—*Lockyer,* in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Used *adjectivally,* or as the *first element* in a *compound.*

Thus, then, a prism has the power of analysing light, showing what are its constituent rays; the latter being termed a *spectrum.* The operation is that of *spectrum analysis.* ... Four new metals have been discovered by *spectrum analysis.* Bunsen and Kirchhoff, in examining the *spectra* of certain residues of the evaporation of water from a spring (Durckheim), detected rays of a colour and position in the *spectrum* hitherto unobserved. Following up the research, they succeeded in isolating the two metallic elements cæsium and rubidium. Soon afterwards Mr. Crookes discovered thallium; indium being the last added to the list in this way.—*Lockyer,* in *Brande and Cox, Dictionary of Science, Literature and Art.*

The seeds of one of the species are spiny, whence it is commonly called, tautologically, Prickly *spinach*. It is a singular fact that the water drained from *spinach* after being boiled is capable of making as good match-paper as that made by a solution of nitre.—*Moore*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Spínal. *adj.* [Lat. *spina.*] Belonging to, constituted by, the spine or backbone.

All *spinal*, or such as have no ribs, but only a backbone, are somewhat analogous thereto.—*Sir T. Browne, Vulgar Errours.*

Those solids are entirely nervous, and proceed from the brain and *spinal* marrow, which by their bulk appear sufficient to furnish all the stamina or threads of the solid parts.—*Arbuthnot.*

Descending careless from his couch, the fall
Lux'd his joint neck, and *spinal* marrow bruised.
J. Philips, Cyder, ii. 467.

Spíndle. *s.* [A.S. *spindel.*]

1. Pin by which the thread is formed, and on which it is conglomerated.

Bodies fibrous by moisture incorporate with other thread, especially if there be a little wreathing; as appeareth by the twisting of thread, and twirling about of *spindles.—Bacon.*

Sing to those that hold the vital sheers,
And turn the adamantine *spindle* round
On which the fate of gods and men is wound.
Milton, Arcades, 65.

Upon a true repentance, God is not so fatally tied to the *spindle* of absolute reprobation as not to keep his promise, and seal merciful pardons.—*J. Maine.*

So Pallas from the dusty field withdrew,
And when Imperial Jove appear'd in view,
Resumed her female arts, the *spindle* and the clew:
Forgot the sceptre she so well had sway'd,
And with that mildness, she had ruled, obey'd.
Stepney.

Do you take me for a Roman matron,
Bred tamely to the *spindle* and the loom?
A. Philips.

Were the speed of the bobbins equal to that of the *spindles*, that is, did the bobbin and *spindle* make the same number of turns in the same time, the process would be limited to mere twisting. But the bobbin anticipates the flyers a little, that is, it makes in a given time a somewhat greater number of revolutions than the *spindle*, and thereby effects the continuous winding of the cord upon itself. Suppose the bobbin to make forty revolutions, while the *spindle* completes thirty; thirty of these revolutions of the bobbin will be inoperative towards the winding-on, because the flyers follow at that rate, so that the cord, or twisted silver, will only be coiled ten times round the bobbin, and the result as to the winding-on will be the same as if the *spindle* had stood still, and the bobbin had made forty—thirty—ten turns. The thirty turns of the *spindles* serve, therefore, merely the purpose of communicating twist.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

2. Long slender stalk.

The *spindles* must be tied up, and, as they grow in height, rods set by them, lest by their bending they should break.—*Mortimer, Husbandry.*

Used *adjectivally*. Slender.

Repose yourself, if those *spindle* legs of yours will carry you to the next chair.—*Dryden, Spanish Friar*, ii. 3.

The marriage of one of our heiresses with an eminent courtier gave us *spindle* shanks and cramps.—*Tatler.*

Spíndle. *v. n.* Shoot into a long small stalk.

When the flowers begin to *spindle*, all but one or two of the biggest, at each root, should be nipped off.—*Mortimer, Husbandry.*

Spíndle-legged. *adj.* Having small legs.

Many great families are insensibly fallen off from the athletick constitution of their progenitors, and are dwindled away into a pale, sickly, *spindle-legged* generation of valetudinarians.—*Tatler, no.* 148.

Spíndle-shanked. *adj.* Having small shanks.

Her lawyer is a little rivelled, *spindleshanked* gentleman.—*Addison.*

Spíndletree. *s.* Native tree of the genus Euonymus (species, europæus).

There is a shrub called the *spindle-tree*, commonly growing in our hedges, which bears a very hard wood.—*Evelyn.*

Spíndling. *verbal abs.* [? *spire.*] Sprouting.

Another ill accident in drought is the *spindling* of the corn, which with us is rare, but in hotter countries common; insomuch as the word calanity was first derived from calamus, when the corn could not get out of the stalk.—*Bacon.*

Spine. *s.* [Lat. *spina.*]

1. Backbone.

The rapier entered his right side, reaching within a finger's breadth of the *spine.—Wiseman, Surgery.*

There are who think the marrow of a man,
Which in the *spine*, while he was living, ran,
When dead, the pith corrupted will become
A snake, and hiss within the hollow tomb.
Dryden, Translation from Ovid, The Pythagorean Philosophy.

2. Thorn (for the botanical explanation see extract).

Some leaves, which do not freely develop in the usual manner, assume a dry hardened appearance, and pass into *spines*, as in the common furze; just as some abortive branches have been stated to assume the character of thorns.—*Henslow, Principles of Descriptive and Physiological Botany*, § 78.

Spinél. *s.* [Fr. *spinelle.*] In *Mineralogy.* Aluminate of magnesia; oriental ruby.

Spinel ruby is of a bright rosy red; it is softer than the rock or balass ruby.—*Woodward.*

It is of various tints of red, violet, and yellow, sometimes black, as at the copper mine, Migiandone, in the valley of Toce in Piedmont; occasionally nearly white. It occurs in octahedrons, the edges of which are occasionally replaced, and sometimes in rhombic dodecahedrons; also in macles. . . . The finest specimens are brought from Ceylon, Siam, Pegu, and other eastern countries. *Spinel* constitutes a beautiful gem, which is often sold for oriental ruby. The scarlet *spinel* is called *spinel* ruby by lapidaries; the rose-red, balass ruby; the yellow or orange-red, rubicelle; the violet-coloured, almandine ruby.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

Spinelle ruby [is] called Dodecahedral corundrum by some mineralogists, and Balas ruby by others. . . . Pleonaste is a variety which yields a deep green globule with borax. Crystals of *spinelle* from Ceylon have been observed imbedded in limestone, mixed with mica, or in rocks containing adularia, which seem to have belonged to a primitive district. . . . When the weight of a good *spinelle* exceeds four carats, it is said to be valued at half the price of a diamond of the same weight. M. Brard has seen one at Paris which weighed two hundred and fifteen grains.—*Ure, Dictionary of Arts, Manufactures, and Mines, Lapidary.*

Spinét. *s.* [Italian, *spinetta*; Fr. *épinette.*] Small harpsichord.

When miss delights in her *spinnet*,
A fiddler may his fortune get.
Swift, Cadenus and Vanessa.

By an ancient list of the domestic establishment of Edward III. it appears that he had in his service a musician called a cyteller, or cysteller: the citole, or cistole, derived from cistella, a little chest, might probably be an instrument resembling a box, with strings on the top or belly, which, by the application of the tastatura, or key board, borrowed from the organ, and jacks, became a *spinnet*; but as to the harpsichord, the earliest description of it which, after a careful research, could be found, is that of Ottomarus Luscinius, in his Musurgia, published at Strasburg in 1536.—*Sir J. Hawkins, A General History of Music*, vol. i. b. iv. ch. ix. p. 465: 1779.

[Proposition XXXIX.] treats of the *spinnet*, or as Mersennus terms it, the clavicymbalum; the figure which he has given of it resembles exactly the old English original, in shape a parallelogram, its width being to its depth in nearly the proportion of two to one; from whence it may be inferred that the triangular *spinnet* now in use is somewhat less ancient than the time of Mersennus. He makes it to consist of thirteen chords and keys, including twelve intervals; that being the number contained in an octave divided according to the modern system into seven tones and five semitones. He says that the tuning of this instrument is by many persons held a great secret, nevertheless he reveals it by explaining the method of tuning the *spinnet* agreeable to the practice of the present times. From the *spinnet* he proceeds in Prop. XL. to shew the construction of the organocymbalum, in French called the clavecin, and English the harpsichord, an instrument too well known at this day to need a description. But it seems that in the time of Mersennus there were two kinds of harpsichord, the one of the French above spoken of, and the other of the Italians, called by him manichordium. Of this he treats at large in Prop. XLII.—*Ibid.*, vol. iv. b. i. ch. i. p. 105.

Spínet. *s.* [Lat. *spinetum*; from *spina* = thorn.] Small wood; place where briars and brushes grow; spinny.

The invention was to have a satyr lodged in a little *spinet*, . . . who advanced his head above the top of the wood, &c.—*B. Jonson, Entertainment at Althorpe.*

Spink. *s.* [? *finch, pinket.*] Finch; bird.

Want sharpens poesy, and grief adorns;
The *spink* chaunts sweetest in a hedge of thorns.
Harte.

As a name in its simple form its application is doubtful, it being uncertain whether, standing alone, it is the ordinary name of any native bird. Preceded, however, by some other word, it may be found, as in *goldspink* = goldfinch. In this it agrees with *finch.*

Spínnaret. *s.* In *Entomology.* Spinning organ of spiders. See extract.

Lyonnet . . . has discovered that the surface of each of the *spinnarets* is pierced by an infinite number of minute holes, from each of which there escapes as many little drops of a liquid which, becoming dry the moment it is in contact with the air, forms so many delicate threads. Immediately after the filaments have passed out of the pores of the *spinnaret*, they unite first together and then with those of the neighbouring *spinnarets*, to form a common thread, so that the thread of the spider, as it is employed in the manufacture of the web, or such as the creature suspends itself by when hanging from one's finger, is composed of an immense number of minute filaments, perhaps many thousands, of such extreme tenuity that the eye cannot detect them until they are twisted together into the working-thread.—*Victor Audoin, Arachnidæ.*

Spínner. *s.* One who spins.

1. As an artisan in spinning.

A practised *spinner* shall spin a pound of woo worth two shillings for sixpence.—*Gaunt.*

One *spinner* has mules, which face one another, so that he needs merely turn round in the spot where he stands, to find himself in the proper position for the other mule. For this reason, the rim-wheel and handle, by which he operates, are not placed in the middle of the length of the machine, but about two-fifths of the spindles are to the right, and three to the left; the rim wheel being towards his right hand. The carriage of the one mule is in the act of going out and spinning, while that of the other is finishing its twist, and being put up by the *spinner*. The quantity of yarn manufactured by a mule in a given time, depends directly upon the number of the spindles, and upon the time taken to complete every stretch of the carriage. Many circumstances have an indirect influence upon that quantity, and particularly the degree of skill possessed by the *spinner.—Ure, Dictionary of Arts, Manufactures, and Mines.*

2. Spider.

Spynners ben tokens of divynation, and of knowing what wether shal fal.—*Translation of Bartholomeus de Proprietatibus Rerum*, fol. 314.

Where the bee gathereth honey, even there the *spinner* gathereth venome.—*Latimer*, in *Fox's Acts and Monuments.*

Weaving spiders come not here:
Hence, you long-legg'd *spinners*, hence!
Shakespear, Midsummer-Night's Dream, ii. 3, song.

Spínning. *verbal abs.* In *Composition*, or as the *first element* in a *compound.* Process by which anything is spun.

My *spinning wheel* and rake,
Let Susan keep for her dear sister's sake.
Gay, Shepherd's Week, Friday, 123.

The fifth operation may be called the first *spinning* process, as in it the cotton sliver receives a twist; whether the twist be permanent as in the bobbin and fly-frame, or be undone immediately, as in the tube-roving machine. In fact, the elongated slivers of parallel filaments could bear little further extension without breaking asunder, unless the precaution were taken to condense the filaments by a slight convolution, and at the same time to entwine them together. The twisting should positively go no further than to fulfil the purpose of giving cohesion, otherwise it would place an obstacle in the way of the future attenuation into level thread. The combination of drawing and twisting is what mainly characterises the *spinning* processes, and with this fifth operation, therefore, commences the formation of yarn.—*Ure, Dictionary of Arts, Manufactures, and Mines, Cotton Manufacture.*

Duncan Macmorrogh informed us, that we were quite wrong in supposing ourselves to be the miracle of the Creation. On the contrary, he avowed that already there were various pieces of machinery of far more importance than man; and he had no doubt, in time, that a superior race would arise, got by a steam-engine on a *spinning-jenny.—B. Disraeli, The Young Duke*, b. v. ch. viii.

Spínny. *adj.* Thin; slender.

The Italians proportion it [beauty] big and plum; the Spaniards, *spynie* and lanke; and amongst us, one would have her white, another brown.—*Florio, Translation of Montaigne*, p. 269: 1613.

They plow it early in the year, and then there will come some *spinny* grass that will keep it from scalding.—*Mortimer, Husbandry.*

Spínous. *adj.* Thorny; full of thorns.

Our senses are pricked and wounded with this *spinous* or thorny matter.—*W. Mountague, Devout Essays, Part I.* p. 72: 1648.

Spínster. *s.* [that the *-str-* was, *by itself*, a sign of the feminine gender, has long been known; of which import the present word is the only current instance, being simply the feminine form of Spinner. Hence, etymologically, all forms in *-ster* are fundamentally female; *songster* being a female *singer*. Hence, too, the forms giving us *-str-* succeeded by *-ess* (as *song-str-ess*) are feminines with a second feminine element superadded to the primary one, the true power of which had become obsolete.]

And the free maids that weave their thread with bones,

'I have forgotten my flowers,' said the *spinster* aunt. 'Water them now,' said Mr. Tupman in accents of persuasion. 'You will take cold in the evening air,' urged the *spinster* aunt, affectionately. 'No, no,' said Mr. Tupman rising; 'it will do me good. Let me accompany you.' . . . The *spinster* aunt took up a large watering-pot which lay in one corner, and was about to leave the arbour. Mr. Tupman detained her, and drew her to a seat beside him. 'Miss Wardle!' said he. The *spinster* aunt trembled, till some pebbles which had accidentally found their way into the large watering-pot shook like an infant's rattle. 'Miss Wardle,' said Mr. Tupman, 'you are an angel.'—*Dickens, Pickwick Papers*, ch. viii.

'Get on your bonnet,' repeated Wardle. 'Do nothing of the kind,' said Jingle. 'Leave the room, sir—no business here—lady's free to act as she pleases—more than one-and-twenty.' 'More than one-and-twenty!' ejaculated Wardle, contemptuously. 'More than one-and-forty!' 'I a'nt,' said the *spinster* aunt, her indignation getting the better of her determination to faint. 'You are,' replied Wardle, 'you're fifty if you're an hour.' Here the *spinster* aunt uttered a loud shriek, and became senseless.—*Ibid.*, ch. x.

Spínstry. *s.* Work of spinning. *Rare.*

When I entered, I found to my surprise that there was plenty of light, which was supplied from windows composed of small panes of whalebone, ground down very thin; and at the further end the head and skull of the animal formed a kitchen, the smoke from the fire escaping through the *spiracles* or breathing-holes above.—*Marryat, The Pacha of Many Tales, Huckaback,*

2. In *Entomology.* See extract.

We shall divide the respiratory organs [of insects] into external and internal. The external are of three kinds, *spiracles*, tracheæ, and branchiæ. The internal are either simply tracheal, or tracheal and vesicular. The *spiracles* are apertures situated along the sides of the body communicating directly with the internal respiratory organs. They are usually nine in number on each side. In hymenopterous larvæ there are ten.—*Newport (Insecta)*, in *Todd's Cyclopædia of Anatomy and Physiology.*

Similar effects are produced by a tight ligature; and most persons have observed the appearance which a woodbine causes on the branches of trees by twining round them. A *spiral* protuberance is formed immediately above and below the stricture, but more especially above it, and in process of time, these swellings often become so large as to meet completely over the woodbine and embed it in the substance of the tree.—*Henslow, Principles of Descriptive and Physiological Botany*, pt. ii. ch. iii. § 190.

Spíral. *s.* That which has a spiral form.

Nor like those spirits which alchymists do find,
When they in every thing seek gold in vain;
For she all natures under heav'n doth pass,
Being like those *spirits* which God's bright face do see;
Or like himself, whose image once she was,
Though now, alas! she scarce his shadow be:
For of all forms she holds the first degree,
That are to gross material bodies knit;
Yet she herself is bodyless and free,
And though confined is almost infinite.

It was *spiritualism*, exquisite and exalting *spiritualism*, but it was too spiritual.—*Milman, History of Latin Christianity,* b. xiv. ch. x.

2. System of spirit-rapping, and its allied manifestations.

The first may be the wiser; but the second are likely to be the more energetic. Now the *spiritualists*, so called, meaning all who receive the facts, or some of them, as facts, may be divided into those who believe that the communications are *spiritual*, those who do not see what else they can be, and those who do not see what they can be. All who enquire further, let them think what they may, will, if they shape their inquiries upon the *spiritual* hypotheses, be sound imitators of those who led the way in physical science in the old time.—*From Matter to Spirit, by C. D., preface by A. B.*

Spirt, or **Spurt.** *v. n.* [in the previous editions there is a double entry (1) for the spelling with *spi-*, and (2) the spelling with *spu-*. As both can scarcely be right, and as the spelling is likely to be finally fixed by the preponderance of instances either way, the editor has made them uniform; preferring the present entry, chiefly because it gives the most instances. In Wedgwood, *spurt* is the leading form; inasmuch as it is connected with *sprout* = shoot forth; but *spirt*, &c., have the same affinities. It is scarcely necessary to remark that, *phonetically*, the words, whether spelt with *i*, or with *u*, are sounded alike. The case is repeated under Sponge.] Spring out in a sudden stream; stream out by intervals.

Mr. Gifford, the recent editor of Ben Jonson's works, denies that *spittle* means generally an hospital or almshouse; and says that, with our ancestors, it had an appropriate signification, viz. a lazar-house, a receptacle for wretches in the leprosy, and other loathsome diseases, the consequence of debauchery and vice. (B. Jonson, i. 17. And see Massinger's Works, iv. 53.) Mr. Gifford, therefore, opposes the use of *spital* or *spittal* in this sense. Our ancestors, however, were not uniformly thus scrupulous: 'Bryand Lyle, lord of Abergevenny, having two sons both leprous, built for them a lazaretto or *spitall*.' (The Younger Brother's Apology, Oxford, 1635, p. 50.) But the distinction is observed at a later period: 'He should rather pity such, as knowing in himself the misery of poverty, than oppress them and rob the *hospital* and *spittle*.' Spleen. *s.* [Lat. *splen*; Gr. σπλήν.]

1. In *Anatomy*. Vascular gland without a duct for carrying off its secretion, and (as such) one having its function imperfectly understood.

If the wound be on the left hypochondrium, under the short ribs, you may conclude the *spleen* wounded.—*Wiseman, Surgery*.

There is reason to believe that the office performed by certain bodies connected with the sanguiferous system, which possess the essential elements of the glandular structure without any efferent ducts, is to restore to the circulating current any substances which they may withdraw from it; and there seems adequate ground therefore for the conclusion that their action, whatever it may be, is subsidiary to the process of sanguification; being exercised, perhaps upon that portion of the nutrient materials more especially which did not traverse the absorbent system when first introduced, but which was directly taken up by the blood-vessels. The organs in question are the *spleen* and the thymus, thyroid, and supra-renal bodies.... The results then of all the recent investigations on these organs tend to prove that, equally with the absorbent glands, they supply the germs of those cells which are ultimately to become blood-corpuscles. Such it is well known was the doctrine of Hewson, in regard to the *spleen* and thymus gland: and there are many facts which lend it a considerable probability.—*Dr. Carpenter, Principles of Human Physiology*, §§ 129, 139: 1864.

Splénetic, or **Splenétic.** *adj.* [Fr. *splénétique.*—That *splenétic* is a common pronunciation is a matter of experience; and that, as far as authority goes, so influential an authority as Pope wrote *splénetic*, may be seen from the extracts. Which is right is difficult to say. That the length of the vowel has little to do with the matter is plain from words like *théatre* (*theātrum*), *órator* (*orātor*), and numerous others. The question turns upon the extent to which the English habit of throwing the accent back has over-ridden the influence of the length of the vowel thus shortened. Treating *ē* and *ā* (both long), whether Greek or Latin, followed by *-ĭcus* or *-ĭκος*, and converted into English, as the same, the result is that we get two extreme words, *lúnatic* and *lymphátic*; the question then arising being which of the two determines the less definite instances? The word under notice is one of them; and the extent to which sound is doubtful is implied in the present remarks. *Fanatic* is another; and, although the editor says *fanátic*, as he says *splenétic*, (also *lymphátic*) he has more than once heard *fánatic* defended. It is probable that the *lúnatics* will beat the *lymphátics*.] Troubled with spleen; fretful; peevish.

Spóliation. *s.* Act of robbery or privation.

An ecclesiastical benefice is sometimes void 'de jure et facto,' and sometimes 'de facto,' and not 'de jure;' as when a man suffers a *spoliation* by his own act.—*Ayliffe, Parergon Juris Canonici.*

Of all the agents of the foreign government he [Sunderland] was, with the single exception of Jeffreys, the most odious to the nation. Few knew that Sunderland's voice had in secret been given against the *spoliation* of Magdalene College and the prosecution of the bishops: but all knew ... he had turned or pretended to turn Papist, that he had, a few days after his apostasy, appeared in Westminster Hall as a witness against the oppressed fathers of the church.—*Macaulay, History of England*, ch. xx.

The principle of a poor-law is, therefore, laudable and beneficial. But if this principle be carried beyond a certain limit; if it be not carefully guarded by counteracting forces; ... a poor-law will become a system of legal *spoliation*, which will impoverish one part of the community in order to corrupt the remainder.—*Sir G. C. Lewis, On the Influence of Authority on Matters of Opinion*, ch. vii.

Spondáical. *adj.* Spondaic.

Spóndee. *s.* [Gr. σπονδεῖος, from σπένδω = I pour out as a libation; the metre founded on the preponderance of long syllables being supposed from its gravity, or majesty, to be suitable to the solemnity thereby implied; Lat. *spondæus.*] Foot of two long syllables.

Sponge. *s.* [Lat. *spongia*; Gr. σπόγγος.—Two entries (*sponge* and *spunge*) in the previous editions. Etymologically, the form in *o* is right. Phonetically, both are sounded alike. There is no valid reason for the two forms, though it is evident that the form in *o* goes with the substantive; that in *u* with the verb. The word that is rarely, if ever, spelt with *o*, is *spunging-house.* The single entry, however, of the editor's, is a protest in favour of uniformity—even if it ended in *sponge*, the substantive, being spelt with *u*. But Spongiole is against this. Practice, which is but another name for the instincts of language, will settle the question.] In *Commerce* and *Zoology*. See last extract.

Considering the motion that was impressed by the painter's hand upon the *spunge*, compounded with the specifick gravity of the *spunge* and the resistance of the air, the *spunge* did mechanically and unavoidably move in that particular line of motion.—*Bentley, Sermons.*

Sponge, in natural history, [is] the name of a class of organisms (Porifera) which have not acquired the distinctive characters of plants or animals, but consist of sarcode or gelatinous flesh, composed of an aggregate of amœbiform bodies, connected and supported, in most of the species, by a spicular framework, which may be silicious, calcareous, or albuminous. The mass, which is commonly amorphous, is traversed by canals, of which those that terminate in the superficial pores are incurrent, and those that terminate in larger orifices or oscula are excurrent. The main sign of vitality is the course of currents of water entering by the pores, and escaping by the oscula. The incurrent streams are nutrient, the excurrent carry out the waste particles and the spores. The latter are ciliate and locomotive, as in some algæ. The movement of the currents is due to ciliary action. The most definitely shaped and beautiful *sponges* are those of the genus Euplectella; the most useful are the horny or keratose kinds, represented by the Spongia officinalis of commerce. *Sponges* belong to the sub-kingdom Protozoa.—*Owen*, in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Sponge. *v. a.*

Spongíole. *s.* In *Botany*. Portion of the root of plants, compared to a small sponge, by which the nutriment in its fluid form is sucked from the soil.

The most common position for the roots of plants, is at the base of the stem, from whence they descend into the ground, gradually tapering to a point, and giving off filamentous branches on all sides, in an irregular and indeterminate manner. These branches of the roots are termed 'fibrils,' and are composed of ducts and cellular tissue, and covered by an epidermis, except at their extremities where the cellular tissue is exposed. It is here that the true absorbents of the root exist, termed its *spongioles*.—*Henslow, Principles of Descriptive and Physiological Botany*, pt. i. § 39.

In the baptism of a male there ought to be two males and one woman, and in the baptism of a female child two *women* and one man; and these are called *sponsors* or sureties for their education in the true Christian faith.—*Ayliffe, Parergon Juris Canonici.*

Not only was affinity, or relationship by marriage, put upon the same footing as that by blood; but a fantastical connexion, called spiritual affinity, was invented in order to prohibit marriage between a *sponsor* and godchild.—*Hallam, View of the State of Europe during the Middle Ages*, ch. vii. pt. ii.

Spontanéity. *s.* Voluntariness; willingness; accord uncompelled.

Several writers on political economy have described the case of a supposed race of savages, subsisting on the *spontaneous* productions of the earth, and the precarious supplies of hunting and fishing; and have then traced the steps by which the various arts of life would gradually have arisen, and advanced more and more towards perfection.—*Archbishop Whately, Lectures on Political Economy*, appendix C.

Spontaneous fission has now been observed to take place in almost every order of Annulata; and in all it takes place at nearly the same part, near the beginning of the posterior part of the body; but, the formation of the new aneflid is due to a process of gemmation of new segments, which proceeds from the last or penultimate joint. It is most common, or has been oftenest witnessed, in the little abranchial fresh water naiads.—*Owen, Comparative Anatomy.*

The English, if it had been left to its own *spontaneous* and unassisted development, would probably have assumed a character resembling rather that of the Dutch or the Flemish than that of the German of the present day.—*Craik, History of English Literature*, vol. i. p. 173.

'I told them I was sure the fire was purely accidental, and to go and see about it; and they came back, and agreed that it was purely accidental.'—'I dare say they did,' said Egremont; 'but no one has discovered the accident.'—'For my part, I believe it was *spontaneous* combustion,' said Lord Marney.—*B. Wooden spoon. In Cambridge, the last on the list of mathematical honours.

This gentleman can never want matter for pride, if he finds it so easily. He may boast of an indisputable superiority to all the greatest men of all past ages. He can read and write: Homer probably did not know a letter. . . . We submit, however, that this is not the way in which men are to be estimated. We submit that a *wooden spoon* of our day would not be justified in calling Galileo and Napier blockheads, because they never heard of the differential calculus.—*Macaulay, Critical and Historical Essays, Sir J. Macintosh's History of the Revolution.*

Spoónful. *s.*

1. As much as is generally taken at once in a spoon: (a medical spoonful is half an ounce). This is the entry of the previous editions; and it should have anticipated such common foolish questions as to the relative propriety of *two spoons full*, or *two spoonfuls*. A *spoonful* is as much a single word as *spoony*; and as much (at least, in *Medicine*) a definite measure as peck. Hence, *two spoonfuls* is one thing; *two spoons full* another. *Two mouthfuls of meat* by no means mean *two mouths full of meat*, any more than *two handfuls* mean *two hands full* of corn or anything else.

Prescribe him, before he do use the receipt, that he take such a pill or a *spoonful* of liquor.—*Bacon.*

A *sporadical* disease is . . . what in a particular season affects but few people.—*Arbuthnot.*

Spore. *s.* See extract.

Spores [are] the reproductive bodies of cryptogams. These bodies do not contain an embryo, but consist merely of one or more cells variously combined together; hence, they are called *spores* to distinguish them from true seeds. . . . In many cases, however, these bodies are generated within cells or asci, and they are then for distinction's sake termed *sporidia*. It is, however, desirable that the word *spore* should be used in the more general sense, as opposed to seed, the grand distinction between cryptogams and phænogams consisting in the different nature of their mode of reproduction. . . . *Spores* or *sporules* germinate either by elongation of some particular part, and subsequent cell-division, or by cell-division without any protrusion of a thread or membranous expansion.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

Trod under foot, the *sport* of every wind,
Swept from the earth, and blotted from his mind;
Their secret in the grave he bade them lie,
And grieved they could not 'scape th' Almighty's eye. *Dr. Madden, On Bishop Boulter.*

4. Play; idle jingle.

An author who should introduce such a *sport* of words upon our stage, would meet with small applause.—*Broome.*

5. Diversion of the field: (as of *fowling, hunting,* or *fishing*).

This may be performed by the strength of some such *spring* as is used in watches: this *spring* may be applied to one wheel, which shall give an equal motion to both the wings.—*Bishop Wilkins.*

The *spring* must be made of good steel, well tempered; and the wider the two ends of the *spring* stand asunder, the milder it throws the chape of the vice open.—*Moxon, Mechanical Exercises.*

Bodies which are absolutely hard, or so soft as to be void of elasticity, will not rebound from one another: impenetrability makes them only stop. Newton.*

The *springer* is a small but elegant breed; it is generally red and white, with black nose and palate. The smallness of the head and the length of the ears are essential points in dogs of this race. The true Marlborough breed is sometimes called the *springer*; it is, however, a shorter dog with a less taper muzzle. These spaniels are sometimes sold for an enormous price. Within the last few weeks a man was brought before a magistrate, charged with having stolen or lost one of these dogs; and on being asked the value of the dog, the owner deposed that it was worth seventy-five guineas, and that he had already refused seventy pounds for it.—*Bell, History of British Quadrupeds including the Cetacea.*

Wedgwood, connecting these with each other, connects them also with *sprout*, and other words, beginning with *spr-*, in which the notion of *germination, shooting-out as a bud, budding*, &c., is involved. That *spruce* is *sometimes* a corruption of *Pruce*, or *Prussia*, is likely; at the same time the doctrine that it is so in general is unsafe. See extracts from Johnson, Todd, and Wedgwood.] Nice; trim; neat without elegance: (formerly used of *things* with a *serious* meaning: now used only of *persons*, and with *levity*).

[Skinner derives this word from *preux*, French; but he proposes it with hesitation; Junius thinks it comes from *sprout*; Casaubon trifles yet more contemptibly. I know not whence to deduce it, except from *prute*. In ancient books we find furniture of *pruce*, a thing costly and elegant, and thence probably came *spruce*.—*Johnson.*

Serenius refers the word to the Swedish *spraeg*, formosus; *spraekt et spraeg*, clarus et splendens (de pannis). With this our provincial word *sprey*, or *spry*, in great measure, accords; which in some places is used for *smart, elegant*, and also for *lively* or *acute*. 'Sprey: *spruce, ingenious*. Exmoor dialect.' (Grose.) And so *sprack*, or *sprag*; which see. Dr. Johnson's conjecture of *pruce*, weighed with the following extract, at least will amuse the reader: 'Sir Edward Howard, then Admirall, and with him Sir Thomas Parre, in doubletts of crimsin velvett, &c., were apparelled after the fashion of *Prussia* or *spruce*.' (Holingshed's Chronicle, p. 805.) Prussia, it might hence be supposed, gave in old time, the law as to fashionable and costly apparel. Barret describes *Prussian* leather under the simple name of *spruce*. (Alvearie, 1520.) Thus, in reference to fine habiliments, a *sprusado* likewise became a term to denote one who paid great attention to dress. 'They put me in mind of the answer of that *sprusado* to a judge in this kingdom, a rigid censor of men's habits; who, seeing a neat finical divine come before him in a cloak lined through with plush, encountered him.' (Commentary on Chaucer, p. 19: 1695.)—*Todd.*]

[A decoction of the young shoots of *spruce* and silver fir, was much in use on the shores of the Baltic as a remedy in scorbutic, gouty, and rheumatic complaints. The sprouts from which it was made were called *sprossen* in German, and *jopen* in Dutch, and the decoction itself *sprossenbier*, or *jopenbier*; and, doubtless, the *spruce-fir*, German *sprossenfichte*, takes its name as the fir of which the sprouts are chiefly used for the foregoing purpose, and not from being brought from Prussia, as commonly supposed. — *Wedgwood, Dictionary of English Etymology.*]

Spruce. *s.* [see under Spruce, *adj.*] Species of fir; Pinus abies, or Abies excelsa.

Those from Prussia (which we call *spruce*) and Norway are the best. The hemlock-tree (as they call it in New England) is a kind of *spruce*.—*Evelyn.*

As a species, the common *spruce* is distinguished by having the leaves scattered upon the branches, quadrangular; cones terminal, cylindrical, and pendant; scales naked and flat, their summits truncate: cones from five to seven inches in length, and from one and a half to two inches broad; seeds winged, small; cotyledons from seven to nine.... Though a native of northern countries, and found in

similar parallels of latitude, the *spruce* fir is not considered indigenous to Britain, as no remains of ancient forests of this species are recorded as having existed in any of the mountainous districts of this island, nor have its remains been recognized amongst the other trees deposited in the peat mosses, beneath whose surfaces the common pine is so frequently met with. Its introduction, however, must have taken place at an early period, as it is mentioned by some of our earliest writers on arboriculture. Turner, who published his work entitled 'Names of Herbes' in 1548, includes it in his list; Gerard also, and Parkinson, figure and speak of it in their works. Upon continental Europe it occupies a surface in some of the more northern countries scarcely inferior to that covered by the forests of the common pine.—*Selby, History of British Forest Trees.*

Squírrel. *s.* [Fr. *écureuil*; Lat. *sciurus*, from Gr. σκιὰ = shade + οὐρὰ = tail.] Native animal of the class Rodentia (i. e. akin to the mice, rabbits, &c.) of the genus Sciurus (vulgaris).

One chanced to find a nut,
In the end of which a hole was cut,
Which lay upon a hazel-root,
There scatter'd by a *squirrel*,
Which out the kernel gotten had;
When quoth this fay, Dear queen, be glad,
Let Oberon be ne'er so mad,
I'll set you safe from peril. *Drayton, Nymphidia.*

The *squirrel* derives its name from the form of its tail, σκιὰ, a shade, οὐρά, a tail, as serving this little animal for an umbrella. That part is long enough to cover the whole body, and is clothed with long hairs, disposed on each side horizontally, which gives it a great breadth. These serve a double purpose; when erected, they prove a secure protection from the injuries of heat and cold; when extended, they are very instrumental in promoting those vast leaps the animal takes from tree to tree. On the authority of Klein and Linnæus we may add a third application of the form of the tail; these naturalists tell us, that when the *squirrel* is disposed to cross a river, a piece of bark is the boat, and the tail the sail.—*Pennant, British Zoology.*

The *squirrel* is liable to considerable variety in point of colour, becoming grey in the northern regions, Linnæus, in his Lachesis Lapponica, states that the inhabitants of the Lapland Alps 'contrive, by means of their wooden bows, to procure in the course of the winter a considerable number of *squirrels* (Sciurus vulgaris) in their grey or winter clothing, for the sake of their skins.' Even in this country it appears that a certain degree of change takes place in the colour of the fur in spring and in autumn. Mr. Blyth first informed me of this fact, and states that in the summer the fur is much coarser, and more uniformly red; the pencils of the ears also are lost, as has been observed by former naturalists; in the winter the sides of the body assume a greyish tint, the pencils of the ears are long and full, and the fur softer and fuller. The summer change is not perfect till July.—*Bell, History of British Quadrupeds, including the Cetacea.*

The climbing *squirrels* have four digits on the fore foot, and five digits on the hind foot.... All possess complete collar-bones.... In the grey *squirrel* the scapula is remarkable for the number and strength of the intermuscular cristæ.... The *squirrel's* favourite nut is mainly held between the 'thumb tubercules' when operated on by the chisel-teeth.... The little flying *squirrel* is chiefly remarkable for the long and strong accessory cartilage projecting from the ulnar side of the carpus, which aids in supporting the lateral fold of integument serving as a parachute.—*Owen, Anatomy of Vertebrates*, vol. iii. p. 383.

Squirt. *v. a.* [Norse, *squittra*; *skit* and *skittish* are connected with this word.] Throw out in a quick stream.

2. Fixedness; not fluidity.

Stábles. *s.* ? Stablestand. The following is the text, as it stands in all the editions, except that of Sir J. Hanmer, who proposes *stablestand*, and that of Collier, who, from the corrected folio of 1632, reads—

I'll keep *me stable* where I lodge my wife.

Here *me* means *myself*, the sense being that he will keep himself constantly by his wife. Sir J. Hanmer's reading, adopted in the previous editions, gives the extract under Stablestand. Malone thinks that *stables*, in a secondary sense, *may* mean *station*, i.e. the *statio stabilis* of Hanmer. A German translation renders the word by *Schildwacht* = sentry. This is about the amount of authority in favour of the word meaning *stablestand*. The present editor so interprets it; but he thinks that *stables* may be the *word*; i.e. that the ordinary reading may be combined with Sir J. Hanmer's explanation. Hence, he has entered the word separately.

Be certain what you do, sir, lest your justice
Prove violence; in which three great ones suffer,
Yourself, your queen, your son.—For her, my lord,
I dare my life lay down, and will do't, Sir,
Please you t' accept it, that the queen is spotless
I' the eyes of heaven, and to you: I mean
In this which you accuse her.—If it prove
She's otherwise, I'll keep my *stables* where
I lodge my wife; I'll go in couples with her;
Than when I feel and see her, no further trust her;
For every inch of woman in the world,
Aye, every dram of woman's flesh, is false,
If she be. *Shakespear Winter's Tale*, ii. 1.

Stáblestand. *s.* See extract from Cowell.

Stablestand is one of the four evidences or presumptions, whereby a man is convinced to intend the stealing of the king's deer in the forest: and this is when a man is found at his standing in the forest with a cross bow bent, ready to shoot at any deer; or with a long bow, or else standing close by a tree with greyhounds in a leash ready to slip.—*Cowell.*

Stable-stand (stabilis statio), as Spelman interprets it, is a term of the forest laws, and signifies a place where a deer-stealer fixes his stand under some convenient cover, and keeps watch for the purpose of killing deer as they pass by. From the place it came to be applied also to the person; and any man taken in a forest in that situation, with a gun or bow in his hand, was presumed to be an offender, and had the name of a *stable-stand*. In all former editions this hath been printed *stable*; and it may perhaps be objected that another syllable added spoils the smoothness of the verse. But by pronouncing *stable* short, the measure will very well bear it according to the liberty allowed in this kind of writing, and which Shakspeare never scruples to use; therefore I read *stable-stand*.—*Hanmer, Note on Winter's Tale*, ii. 1.

Stábling. *s.* House or room for beasts.

Stáff-striker. *s.* Sturdy beggar.

As trade increased, however, it was found that this maximum could not be enforced in the walled towns, and especially at the sea-ports, where there was a growing demand for labourers. Hence there was a constant struggle on the part of the young husbandmen to get to the sea-ports. They crossed the country in bands of a dozen together, carrying quarter-staffs, begging their way, and threatening those who would not give alms; and hence arose the terms 'sturdy beggar' and '*staff-striker*' in the old statutes. To stop this, Acts were passed to forbid husbandmen entering walled towns. They were all, however, evaded, and the foolish attempt forcibly to regulate wages was gradually abandoned.—*Doubleday, The True Law of Population*, p. 206: 1853.

Stáffish. *adj.* Stiff; harsh. *Rare.*

Did come to languish.

Milton, Paradise Lost, vii. 469.

Th' inhabitants of seas and skies shall change,
And fish on shore, and *stags* in air shall range.
Dryden, Translation of Virgil, Eclogues, i. 79.

A few of the terms [of Venerie], betokening the different ages of the *stag* and hind, are still retained, though somewhat altered. The young of either sex is called a calf; after a few months the male becomes distinguished by the growth of the bossets, or frontal protuberances, on which the horns are afterwards developed, which during the first year are merely rounded knobs, from whence he takes the name of knobber. In the second year they are longer and pointed, and are called dags, and the animal has now the name of brocket. In the third year the first or brow antler, has made its appearance, and the deer becomes a spayad. In the fourth the bez-antler is added, and he is then termed a *staggard*. He is a *stag* in the fifth year, when the third antler or royal appears: and in the sixth, the commencement of the surroyal or crown is formed, when he takes the name of hart, which name he retains through life. At this time he is called a hart or *stag* of ten—probably because the branches including the surroyal frequently amount to that number. After the seventh year he is said to be cracked, or palmed, or crowned, according to the number of branches composing the surroyal. The female is a calf in the first year, a brocket's sister in the second, and in the third and ever afterwards, a hind.—*Bell, History of British Quadrupeds, including the Cetacea.*

On good and glorious actions, and what shame
Treads on the heels of vice, the salary
Of sex sestertii. *Massinger, The Roman Actor*, i. 1.

Are you on the *stage*,
You talk so boldly.—The whole world is one.

Knights, squires, and steeds must enter on the *stage*. *Pope, Essay on Criticism*, ii. 282.

Used *adjectively*.

Neither shall we offer any extract as a specimen of the diction and sentiment that reigns in these dramas. We have said before that it is fair well-ordered *stage-sentiment* this of his; that the diction too, is good, well-scanned, grammatical diction; no fault to be found with either, except that they pretend to be poetry, and are throughout the most unadulterated prose.—*Carlyle, Critical and Miscellaneous Essays, German Playwrights.*

3. Any place where anything is publicly transacted or performed.

When we are born, we cry that we are come
To this great *stage* of fools.

History, however, in dealing with this Reign of Terror, has had her own difficulties. While the phenomenon continued in its primary state, as mere 'Horrors of the French Revolution,' there was abundance to be said and shrieked. With and also without profit. ... And now, in a new *stage* of the business, when History, ceasing to shriek, would try rather to include under her old forms of speech or speculation this new amazing thing; that so some accredited scientific Law of Nature might suffice for the unexpected Product of Nature, and History might get to speak of it articulately, and draw inferences and profit from it; in this new *stage*, History, we must say, babbles and flounders perhaps in a still painfuller manner.—*Carlyle, History of the French Revolution*, b. v. ch. i.

It is customary with fathers in *stage-plays*, after giving their daughters to the men of their hearts, to congratulate themselves on having no other business on their hands but to die immediately: though it is rarely found that they are in a hurry to do it. Some *stagers* of the wiser sort
Made all these idle wonderments their sport:

Would never fix his thought, but trim his time away.

Stagger. *s.* Staggering motion.

The individual whom Saul Deth discerned in the act of progression towards him, seemed to be more than ordinarily incommoded by the inclemency of the weather; and, to tell truth, with his head bent down and his arms spread out, advanced with a motion that alternated between a reel and a *stagger*, far more resembling that of a drunken man than of a labouring ship.—*Sala, Dutch Pictures, The Ship Chandler.*

The opinion of those who have attended most carefully to the different breeds of dogs is, that the *stag-hound* is the produce of a cross between the old southern-hound—the ancestor probably of most of our races of hounds—and the fleeter fox-hound. Not in the least. It is the critic's duty to point out defects as well as merits, and he invariably does his duty with the utmost gentleness and candour.—*Thackeray, Book of Snobs*, ch. xvi.

Any inhabitant, stranger, or whoever joins not the ruffian tribe in sacrificing to their favourite saint-day, if unfortunate enough to be met by any of the band, is immediately mounted across the *stang* (if a woman, she is basketed), and carried shoulder-height to the nearest public-house, where the payment of sixpence immediately liberates the prisoner. —*Gentleman's Magazine*, p. 1169: 1791.

Thomas Jameson, Matthew Marrington, George Ball, Joseph Rowntree, Simon Emmerson, Robin Parkin, and Francis Wardell, for violently assaulting Nicholas Lowes, of Bishop Wearmouth, and carrying him on a *stang*, were sentenced to be imprisoned two years in Durham gaol, and find sureties for their good behaviour for three years.— *Newcastle-upon-Tyne Courant*, August 8, 1793.

A party of boys, assuming the office of public censors, are *riding the stang.* This is a pole, supported on the shoulders of two or more of the lads, across which one of them is mounted, beating an old pan or kettle with a stick. He at the same time repeats a speech, or what they term a nominy, which, for the sake of detailing the whole ceremony, is here subjoined:—

With a ran, tan, tan,
On my old tin can,
Mrs. —— and her good man.
She bang'd him, she bang'd him,
For spending a penny when he stood in need;
She up with a three-footed stool;
She struck him so hard, and she cut so deep,
Till the blood run down like a new-stuck sheep.
Costume of Yorkshire, p. 63: 1814.

A custom [is] still prevalent among the country people of Scotland; who oblige any man, who is so unmanly as to beat his wife, to ride astride on a long pole, borne by two men, through the village, as a mark of the highest infamy. This they call *riding the stang*; and the person who has been thus treated, seldom recovers his honour in the opinion of his neighbours. When they cannot lay hold of the culprit himself, they put some young fellow on the *stang* or pole, who proclaims that it is not on his own account that he is thus treated, but on that of another person, whom he names.—*Callander, Two Ancient Scottish Poems*, p. 154.

To *ride the stang*, is to be mounted on a strong pole, borne on men's shoulders, and carried about from place to place; the rider representing usually a henpecked husband, and sometimes the husband who had beaten his wife. *To ride skimmington*, is, in some parts of England, of much the same import. —*Todd.*

The *riding of the stang* on a woman that hath beat her husband is, as I have described, by one's riding upon a long piece of wood, carried by two others on their shoulders, where, like a herald, he proclaims the woman's name, &c.—*Notes to Allan Ramsay's Poems, cited by Brand.*

There used formerly, and I believe it is still now and then retained, to be a kind of ignominious procession in the north of England, called *riding the stang*, when, as the glossary to Douglas's Virgil informs us, one is made to ride on a pole for his neighbour's wife's fault.—*Brand, Popular Antiquities*, ii. 107.

(Rich.)

The *stannary* courts of Devonshire and Cornwall for the administration of justice among the tinners herein, are also courts of record, but of the same private and exclusive nature. They are held before the lord warden and his substitutes, in virtue of a privilege granted to the workers in the tin mines there, to sue and be sued only in their own courts, that they may not be drawn from their business, which is highly profitable to the public, by attending their lawsuits in other courts. ... All tinners and labourers in and about the *stannaries* shall, during the time of their working therein bonâ fide, be privileged from suits of other courts, and be only impleaded in the *stannary* court on all matters excepting pleas of land, life, and member.—*Sir W. Blackstone, Commentaries on the Laws of England*, b. iii. ch. vi. § 8.

Come, Yarmouth, my boy, never trouble your brains
About what your old crony,
The Emperor Boney,
Is doing, or brewing, on Muscovy's plains,

Should there come a famine,
Still plenty to cram in
You always shall have, my dear lord of the *stannaries*. *T. Moore, The Twopenny Postbag.*

The New Metamorphoses; MS. temp. Jac. I. (Nares by H. and W.)

Stánza. *s.* [Italian.] In *Poetry*. Term applied to certain definite divisions of a metrical composition in which there is a pause, *stand*, or break, in both the sense and the metre. The stanza is more regular than the *strophe*, and longer than the *couplet*; though of course a couplet can be printed in a *stanzaic* form. *Triplets*, however, have a fairer claim to be considered such, while in respect to the *quatrain*, especially when (as in Gray's Elegy, &c.) the rhymes are alternate, there is no doubt as to its character. The Spenserian stanza (Faerie Queen, Childe Harold, &c.) has nine lines; the Italian Ottava rima (as in Don Juan) eight; these numbers and four giving the ordinary number. The type and standard of the stanza is found in such Latin and Greek metres as the Alcaic, the Sapphic, and more particularly the stanzaic Asclepiad, wherein the first three lines are identical in the way of metre, and the third, with which the stanza concludes, differs from them only in its length.

So bold as yet no verse of mine has been
To wear that gem on any line,
Nor till the happy nuptial house be seen
Shall any *stanza* with it shine. *Cowley.*

Horace confines himself strictly to one sort of verse or *stanza* in every ode.—*Dryden.*

In quatrains, the last line of the *stanza* is to be considered in the composition of the first.—*Id.*

Before his sacred name flies every fault,
And each exalted *stanza* teems with thought.
Pope, Essay on Criticism, ii. 422.

Stanza [is] a certain stated number of grave verses, containing some perfect sense, terminated with a rest or pause. The word is Italian, and signifies a *stand* or *station*, because of the pause to be made at the end of each *stanza*, or complete sense, ... *Stanzas* were first introduced from the Italian into the French poetry about the year 1580, and thence they were transferred into the English.—*Rees, Cyclopædia.*

When two or more *staves* are knit together into one, the compound *stave* thence resulting may be called a *stanza*—a name that seems to have been first applied to the compound Italian *stanze* which came into fashion during the sixteenth century.—*Dr. Guest, History of English Rhythms*, b. iv. ch. i.

The earl then acquainted them that he should move their sovereign to honour Woodstock occasionally with her residence.... Meanwhile, he rejoiced to be the expounder of her gracious pleasure, in assuring them that for the increase of trade and encouragement of the worthy burgesses of Woodstock, her majesty was minded to erect the town into a *staple* for wool.—*Sir W. Scott, Kenilworth*, ch. vii.

Bruges ... was the great *staple* for both Mediterranean and northern merchandise.—*Hallam, View of the State of Europe during the Middle Ages*, ch. ix. pt. ii.

And seems to overmatch the golden Phrygian fell.
Drayton, Polyolbion,

3. Staple commodity.

As I told you before, the whale is the *staple* of this island. You observe that his skin serves us as a house; from his bones we form all our implements—from his sinews, our thickest ropes down to our finest thread. The dress we wear is composed of the belly-part of the skin, dressed with a sort of soap, composed of the alkali obtained from the sea-weed which abounds in the lake, and the oil of the whale. His blubber serves us for fuel and candle; his flesh for meat, and the milk is invaluable to us.—*Marryat, The Pacha of Many Tales.*

4. Main element.

'I have been bred and reared all my life by this grandfather of whom I have just spoken. Now, he has a great many good points; there is no doubt about that; I'll not disguise the fact from you; but he has two very great faults, which are the *staple* of his bad side. In the first place, he has the most confirmed obstinacy of character you ever met with in any human creature. In the second, he is most abominably selfish.'—*Dickens, Martin Chuzzlewit*, ch. vi.

Wordsworth.

A violet 'neath a mossy stone,
Half-hidden from the eye;
A single *star*, when only one
Is shining in the sky. *Id.*

It would be a vain task to count the *stars* in one of these globular clusters. They are not to be reckoned by hundreds; and on a rough calculation, grounded on the apparent intervals between them at the borders (where they are not seen projected on each other) and the angular diameter of the whole group, it would appear that many clusters of this description must contain at least ten or twenty thousand *stars* compressed and wedged together in a round space, whose angular diameter does not exceed 8 or 10 minutes; i. e. in an area not exceeding the tenth part of that covered by the moon.—*Sir J. Herschel*, in *Lardner's Cabinet Encyclopædia, Astronomy.*

As the *first element* in a *compound*.

Hither the Syracusan's art translates
Heaven's form, the course of things and human fates;
The included spirit serving the *star-deck'd* signs,
The living work in constant motions winds.

Shot through the lists at Camelot, and charged
Before the eyes of ladies and of kings.
Tennyson, The Epic.

6. Specially applied, in theatrical matters, to an actor of superior eminence; e.g. one from the capital among those of the provinces. Hence, also, the use of the verb, as '*starring*' or '*starring* it in the provinces.'

7. Decoration.

Eighteen shillings a week! Just, most just, thy censure, upright Pecksniff! Had it been for the sake of a ribbon, *star*, or garter, ... or eighteen thousand pounds, or even eighteen hundred;—but to worship the golden calf for eighteen shillings a week! Oh pitiful, pitiful!—*Dickens, Martin Chuzzlewit*, ch. x.

8. Flaw.

Star-of-Béthlehem. *s.* Native plant of the genus Ornithogalum (umbellatum).

Stárapple. *s.* In *Botany*. Edible fruit of the Chrysophyllum Cainito.

The *starapple* is a globular or olive-shaped soft fleshy fruit, inclosing a stone of the same shape. This plant grows in the warmest parts of America, where the fruit is eaten by way of dessert. It grows to the height of thirty or forty feet.—*Miller.*

The fruit of many [of the Sapotaceæ] is esteemed in their native countries as an article of the dessert. Such are the sapodilla plum, the *starapple*, the marmalade, the medlar of Surinam, and others; they are described as having generally a sweet taste, with a little acidity.—*Lindley, Vegetable Kingdom.*

Stárboard. *s.* [A.S. *steorbord* = rudder.] Right-hand side of the ship, as larboard is the left.

On shipboard the mariners will not leave their *starboard* and larboard, because some one accounts it gibberish.—*Bramhall.*

Roll'd to *starboard*, roll'd to larboard, when the surge was seething free,
When the wallowing monster spouted his foam-fountains in the sea.
Tennyson, The Lotos-eaters.

Used *adjectively.*

The Bellona . . . kept too close to the *starboard* shoal, and grounded against the outer ship of the enemy. . . . Each ship had been ordered to pass her leader on the *starboard* side, because the water was supposed to shoal on the larboard shore.—*Southey, Life of Nelson*, ch. vii.

On the *starboard* side of the deck, just abaft the gangway, stood the apparatus of punishment.—*Hannay, Singleton Fontenoy.*

Starch. *s.* [*stark* = strong, stiff.] That which gives strength, or stiffness; especially applied to certain granular vegetable elements, which, when partially dissolved in water, may be used for the stiffening of linen. In *Physiology*, starch is an important alimentary substance; and in *Chemistry*, important for the way in which it comports itself with certain reagents, e. g. iodine. Thus considered, *starchy* is often rendered by the word *amylaceous*, from *amylum* = starch.

But wot you what? The devill, as he in the fulnesse of his malice first invented those great ruffes, so hath he now found out also two great pillers to bear up and maintain this his kingdom of pride withall (for the devill is king and prince over all pride). The one arch or piller with which the devill's kingdome of great ruffes is underpropped, is a certain kind of liquid matter which they call *starteh*, wherein the devill hath willed them to wash and drie their ruffes, which being drie will stand stiff and inflexible about their neckes. The other piller is a certain device of wiers, crested for the purpose, whipped over with gold thred, silver, or silk, and this he calleth a supportasse or underpropper.—*Anatomie of Abuses.* (Nares by H. and W.)

Has he
Disliked your yellow *starch*, or said your doublet
Was not exactly Frenchified?
Fletcher, Queen of Corinth.

With *starch* thin laid on, and the skin well stretched, prepare your ground.—*Peacham, On Drawing.*

Three kinds of *starch* have been distinguished by chemists; that of wheat, that called inuline, and lichen *starch*. These three agree in being insoluble in cold water, alcohol, ether, and oils, and in being converted into sugar by either dilute sulphuric acid or diastase. The main difference between them consists in their habitudes with water and iodine.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Used *adjectivally.*

The potato consists of a mass of cells, enclosing *starch-granules* and an albuminous juice. The chemical composition of the potato is subject to great variations, as the analyses of different chemists very considerably. In general terms, it may be stated that potatoes contain water in quantity amounting to three-fourths of their weight, the remaining fourth part being made up of *starch*, gum, sugar, albumen, vegetable fibre, and a very small proportion of fatty material.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

There is a royal court o' the *star-chamber*
Will scatter all these mists, disperse these vapours,
And clear the truth. *B. Jonson, The New Inn*, v. 5.

[They] doe sit in a place which is called the *starre-chamber*, eyther because it is full of windowes, or because at the first all the roofe thereof was decked with images of starres gilted.—*Smith, Commonwealth*, b. iii. ch. iv. (Rich.)

That court of justice, so tremendous in the Tudor and part of the Stuart reign, the *star-chamber*, still keeps its name, which was not taken from the stars with which its roof is said to have been painted (which were obliterated even before the time of Queen Elizabeth), but from the starra (Hebrew Shetar) or Jewish covenants, which were deposited there by Richard I. in chests under three locks. No starr was allowed to be valid except found in those repositories; here they remained till the banishment of the Jews by Edward I.—*Pennant, London*, p. 122. (Rich.)

Thus it was the Court of *Star-chamber* (as the old court of the King's Concilium Ordinarium was now called) exercised an extensive and anomalous jurisdiction, by means of which men were arbitrarily fined and imprisoned, and often suffered cruel mutilations for any alleged misconduct which the lords and prelates of the council or any minister of the crown might think fit to impute to them.—*Sir E. S. Creasy, The Rise and Progress of the English Constitution*, ch. xv.

No attempt was made after the Restoration to revive some of the instruments of royal misgovernment which the Long Parliament had overthrown. The Court of *Star-chamber* had been abolished, nor was it ever revived.—*Id.*, ch. xvi.

Used *adjectivally.*

I'll make a *starchamber* matter of it: if he were twenty Sir John Falstaffs, he shall not abuse Robert Shallow, esq.—*Shakespear, Merry Wives of Windsor*, i. 1.

The High Bailiff of the city, who was himself in daily communication with Ferguson, reported to the Hague that he did not know where to find a single one of the refugees; and with this excuse the federal government was forced to be content. Stárfish. *s.* In *Malacology.* Radiate animal, chief of the genus Asteria; the term, however, has a wider application, and is sometimes given to the whole group of animals allied to, and represented by, the true starfishes.

The beauty and symmetry of the true *starfishes* attracted the attention of such observers of nature as dwelt by the sea-side, from a very early period, and several kinds are noticed by ancient authors. . . . A fanciful analogy between the form of these radiata and the popular notion of a star has originated a name applied to them in most maritime countries,—a name which has given rise to a fine thought or two. As there are stars in the sky, so are there stars in the sea. 'Cœlorum spectare sidera decet juvatque astronomos; physicorum interest stellis marinis visum intendere,' saith Christian Gabriel Fischer, in his preface to Link's volume. Our own poet, James Montgomery, whose inspiration has revelled gloriously among the wonders of nature, beautifully expresses the same analogy:—

The heavens
Were thronged with constellations, and the seas
Strown with their images.
—*E. Forbes, A History of British Starfishes.*

Leaving the Ophiuræ, we are led through a long series of almost imperceptible gradations to the *starfishes*. In these, from the increased size of the body, the rays are united at their origin, and become so much dilated as to contain prolongations of the viscera lodged in their interior; an arrangement not met with in Ophiuræ and other slender-rayed Asteridæ. The dilatation of the central part proceeds, and in the same proportion the rays become obliterated; so that, by degrees, the asteroid shape becomes totally lost by the progressive filling up of the interspaces between the rays; and we arrive ultimately at completely pentagonal forms, the sides of the pentagon being perfectly straight lines.—*Rymer Jones, General Outline of the Organization of the Animal Kingdom*, § 438.

In the *star-fishes*, of which the body is flat, the mouth conducts to a wide stomach that fills the disc of the body. It was supposed formerly that this stomach was in all of them a blind sac, as Tiedemann has described it in Asterias aurantiaca. Afterwards Meckel detected in Comatulæ a second opening of the intestinal canal, that lies on the same surface of the body with the mouth.—*Dr. W. Clark, Translation of Van der Hoeven, Handbook of Zoology.*

She sees the black trunks of the water-spout spin;

Gurney, Esq., in a fresh state, during June 1842, and was said to have been shot near Barton Broad, and to have had another of the same species in company with it. It was a male bird, in good condition, and almost adult plumage; the stomach full of the remains of beetles. I have detailed these circumstances, as it seems probable, if these points were so, that these foreign visitants intended to nest here. Wilson says they resort to low grounds where reeds and alders grow, for that purpose, and that the bird in America is often termed marsh blackbird, or swamp bird.—*Farrell, History of British Birds.*

D., Preface by A. B.*

And turn him to no pain; but if he *start*,
It is the flesh of a corrupted heart.
Shakespear, Merry Wives of Windsor, v. 5.

5. Deviate.

State. *s.* [Lat. *status*, etymologically the *standing* (Lat. *sto* = I stand) position, condition, or relation in which anything occurs. The connection between this and that which, by representing a state, *establishes* something relating to the state represented, originates two series of meanings, which are found in the word under notice. This gives us (1) from the primary Latin form *status*, the series of terms connected with *condition*; (2) the series connected with *estate* (Fr. *état*), suggesting nobility or privilege of some kind or other, carrying with it political rights. Hence the close affinity between the *States* = body politic, and the *States* = the constituents thereof.

To distinguish between the origin of a word derived directly from the Latin *status*, and one from the immediate root of *estate*, is difficult. Hence, in the present entry, the two classes are dealt with as one; in other words, between the immediate derivatives from *status* and the immediate derivatives from the root of *estate* no distinction is drawn.

In the previous editions there is no separate entry. The derivatives from *état*, however, are noted separately.]

Used *adjectivally*.
The brain was her study, the heart her *state* room. —*Arbuthnot.*

To *state* it fairly, imitation is the most advantageous way for a translator to shew himself, but the greatest wrong which can be done to the memory of the dead.—*Dryden.*
I pretended not fully to *state*, much less demonstrate, the truth contained in the text.—*Bishop Atterbury.*
Though I don't pretend to *state* the exact degree of mischief that is done by it, yet its plain and natural tendency to do harm is sufficient to justify the most absolute condemnation of it.—*Law.*

It is a poor error to figure them as wrapt up in ceremonial *stateliness*, avoiding the most gifted man of a lower station; and for their own supercilious triviality, themselves avoided by all truly gifted men.—*Carlyle, Critical and Miscellaneous Essays, State of German Literature.*

Státely. *adj.*
1. August; grand; lofty; elevated; majestic; magnificent.

Státement. *s.*
1. Arrangement of a series of facts or circumstances.

2. Facts or circumstances so arranged; thing stated.
The greatest clearness of apprehension; quickness sufficient, and not extreme, which, in a judge, is perilous, often allied with impatience, and apt to degenerate into hastiness; admirable perspicuity of *statement*, whether delivering his opinion to the court and the bar, or giving his directions to a jury; conciseness with clearness; these were the contributions which his understanding made towards the formation of his judicial character.—*Lord Brougham, Historical Sketches of Statesmen during the Reign of George III., Lord Mansfield.*
It is not caprice, but a most sure instinct, which has led [Niebuhr] to seize on some particular passage of a careless or ill-informed writer, and to perceive in it marks of most important truth; while on other occasions he has set aside the *statements* of the same writer with no deference to his authority whatever.—*Arnold, History of Rome*, ch. xiii.
The whole army thus assembled amounted, according to the *statement* of Plutarch, to forty thousand men.—*Ibid.* ch. xxiv.
Diodorus states positively that the Roman army marched out across the Tiber. It is true that he seems to have supposed the Alia to have been on the right bank of the Tiber; but this confusion arose probably from his finding no notice of the Romans recrossing the river before the battle. His first *statement* is probable, and seems to me to explain the extreme suddenness with which the battle on the Alia took place.—*Ibid.* note.

The lawyer's jest, the hired assassin's trade.
Shelley, Queen Mab.

The tyranny of William displayed less of passion or insolence than of that indifference about human suffering, which distinguishes a cold and far-sighted *statesman.* Impressed by the frequent risings of the English at the commencement of his reign, and by the recollection, as one historian observes, that the mild government of Canute had only ended in the expulsion of the Danish line—he formed the scheme of riveting such fetters upon the conquered nation, that all resistance should become impracticable.—*Hallam, View of the State of Europe during the Middle Ages,* pt. ii. ch. viii.

Bards make new poems,
Thinkers new schools,
Statesmen new systems,
Critics new rules.
Look, ah, what genius,

Statesmen like Pitt.

In the ultimate crisis, at least, of Venetian liberty, that solemn mockery of *statesmanship* was exhibited to contempt.—*Hallam, View of the State of Europe during the Middle Ages,* pt. ii. ch. iii.

Státeswoman. *s.* Female statesman.

How she was in debt, and where she meant
To raise fresh sums: she's a great *stateswoman!*
B. Jonson.

Several objects may innocently be ridiculed, as the passions of our *stateswomen.*—*Addison.*

Státic. *adj.* Statical.

A man weigheth some pounds less in the height of winter, according to experience, and the *statick* aphorisms of Sanctorius.—*Sir T. Browne, Vulgar Errours.*

Státical. *adj.* Static.

At first we might expect, perhaps, that since *statical* forces come under the general notion of cause, the mode of measuring them would be derived from the second axiom of causation, that causes are measured by their effects. But we find that the application of this axiom is controlled by the limitation which we noticed, after stating that axiom, namely the condition that the causes shall be capable of addition. Further, as we have seen, a *statical* force produces no other effect than this, that it balances some other *statical* force; and hence, the measure of *statical* forces is necessarily dependent upon their balancing, that is upon the equality of action and reaction. That the *statical* forces are capable of addition is involved in our conception of such forces. —*Whewell, Philosophy of the Inductive Sciences,* pt. i. b. iii. ch. vi. § 4.

The duality of aspect demands duality of name. Add to this, that if we class those attributes in respect of which the object is active while the subject is passive, as dynamical; and if we class as *statical,* those in respect of which the subject is active while the object is passive; then we must class as statico-dynamical, those in respect of which subject and object are both active.—*Herbert Spencer, Principles of Biology.*

If one by a *statical* engine could regulate his insensible perspiration, he might often, by restoring of that, foresee, prevent, or shorten a fit of the gout. —*Arbuthnot, On Diet.*

Státically. *adv.* In a statical manner; according to statics.

A machine is an instrument by which force or motion may be transmitted and modified as to its quantity and direction. There are two ways in which a machine may be applied, and which give rise to a division of mechanical science into parts denominated statics and dynamics; the one including the theory of equilibrium, and the other the theory of motion. When a machine is considered *statically,* it is viewed as an instrument by which forces of determinate quantities and directions are made to balance other forces of other quantities and other directions. If it be viewed dynamically, it is considered as a means by which certain motions of determinate quantity and direction may be made to produce other motions in other directions and quantities.—*Kater and Lardner,* in *Lardner's Cabinet Cyclopædia, Mechanics,* § 222.

Státics. *s. pl.* Branch of mechanics treating of equilibrium, or balance of motive power.

This is a catholick rule of *staticks,* that if any body be bulk for bulk heavier than a fluid, it will sink to the bottom; and, if lighter, it will float upon it, having part extant, and part immersed, as that so much of the fluid as is equal in bulk to the immersed part be equal in gravity to the whole.—*Bentley.*

We must first turn our attention to a technical distinction of mechanics into two portions according as the forces about which we reason produce rest or motion; the former portion is termed *statics,* the latter dynamics. If a stone fall, or a weight put a machine in motion, the problem belongs to dynamics; but if the stone rest upon the ground, or a weight be merely supported by a machine, without being raised higher, the question is one of *statics.* In *statics* forces balance each other, or keep each other in equilibrium.—*Whewell, Philosophy of the Inductive Sciences,* pt. i. b. iii. ch. vi. §§ 2, 3.

To these names ought to be added that of Stephen Hales, whose Vegetable *Statics,* published in 1727, and Haemastatics, published in 1733, carried both vegetable and animal physiology considerably farther than any preceding work either English or foreign. —*Craik, History of English Literature,* vol. ii. p. 168.

Státing. *verbal abs.* Statement.

Many other inconveniences are consequent to this *stating* of the question; and particularly that by those which thus state it, there hath never yet been assigned any definite number of fundamentals. — *Hammond, On Fundamentals.*

Státion. *s.* [Fr.; Lat. *statio, -onis.*]

1. Act of standing.

Their manner was to stand at prayer, whereupon their meetings unto that purpose on those days had the names of *stations* given them.—*Hooker, Ecclesiastical Polity.*

In *station* like the herald, Mercury,
New-lighted on a heaven-kissing hill.
Shakespear, Hamlet, iii. 4.

2. State of rest.

All progression is performed by drawing on or impelling forward some part which was before in *station* or at quiet, where there are no joints.—*Sir T. Browne, Vulgar Errours.*

3. Spot where anyone is placed.

The seditious remained within their *station,* which, by reason of the nastiness of the beastly multitude, might more fitly be termed a kennel than a camp.—*Sir J. Hayward.*

The planets in their *station* listening stood.
Milton, Paradise Lost, vii. 563.

4. Post assigned; office.

Michael in either hand leads them out of Paradise, the fiery serpent waving behind them, and the cherubims taking their *stations* to guard the place. —*Milton.*

5. Situation; position.

To single *stations* now what years belong,
With planets join'd, they claim another song.
Creech.

The fig and date, why love they to remain
In middle *station* and an even plain;
While in the lower marsh the gourd is found,
And while the hill with olive-shade is crown'd?
Prior, Solomon, i. 67.

6. Employment; office.

No member of a political body so mean, but it may be used in some *station* or other.—*Sir R. L'Estrange.*

By spending this day in religious exercises, we acquire new strength and resolution to perform God's will in our several *stations* the week following. —*Nelson.*

Whether those who are leaders of a party arrive at that *station* more by a sort of instinct, or influence of the stars, than by the possession of any great abilities, may be a point of much dispute.—*Id.*

7. Character; state.

Far the greater part have kept, I see,
Their *station.* *Milton, Paradise Lost,* vii. 145.

8. Rank; condition of life.

I can be contented with an humbler *station* in the temple of virtue, than to be set on the pinnacle.—*Dryden.*

Henry resolved that Becket should succeed [Archbishop Theobald] in the . . . See of Canterbury. Becket remonstrated. . . . He knew well the imperious and violent temper of the king, and the certainty of their friendship being turned to bitter hate, if he should in his new *station* thwart the royal will. . . . He may have felt that if he were to assume the *station* of the highest ecclesiastic in England . . . he could no longer be the mere instrument of kingly will, without contracting a degree of baseness and guilt, from which his soul revolted.—*Sir E. S. Creasy, History of England,* ch. ix.

9. See extract.

Stations, in Ecclesiastical Antiquities [are] the weekly fasts of Wednesdays and Fridays. These were omitted between Easter and Whitsuntide. They terminated at three in the afternoon; hence sometimes called Semijejunia. Saturday was made a station day by the council of Elvira; and this, it is said, led to the gradual neglect of the Wednesday *station* in the Western church.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

10. See extract.

The term *station* is also applied to certain points in the narrative of the passage of Christ from the judgment-seat to the cross, which are selected by the Roman Church as subjects for meditation, and are well known through the pictorial representations common in Roman Catholic churches.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

11. In *Botany.* See extract.

The various peculiarities which characterize different '*stations,*' can scarcely be appreciated. Those which possess a very general resemblance, may still differ in some important circumstance by which the existence, or at least the prevalence of some peculiar species may be determined. Thus a marsh may be formed by salt and fresh water mixed in different proportions; two tracts in other respects alike, may be very differently exposed to the prevalence of winds, or the influence of sea breezes, &c. Independently of these modifying circumstances, we may enumerate about sixteen tolerably well-defined *stations,* to one or other of which the different plants of every flora will be found more particularly attached. . . . Greater uncertainty prevails respecting the different habitations of plants than their *stations.*— *Henslow, Principles of Descriptive and Physiological Botany,* pt. ii. §§ 308–309.

Státion. *v. a.* Assign to a certain post, rank, or place.

He gained the brow of the hill, where the English phalanx was *stationed.*—*Lord Lyttelton.*

The commanding officer of the troops on board of one of our ships asked where his men should be *stationed?* He was told that they could be of no use; that they were not near enough for musquetry, and were not wanted at the guns; and had, therefore, better go below. This, he said, was impossible; it would be a disgrace that could never be wiped away. They were therefore drawn up upon the gangway, to satisfy this cruel point of honour; and there, without the possibility of annoying the enemy, they were mown down.—*Southey, Life of Nelson,* ch. vii.

Státionary. *adj.* [Fr. *stationnaire.*]

1. Fixed; not progressive.

Mine own businesses are rather *stationary* than retrograde.—*Sir H. Wotton, Remains,* p. 565.

Between the descent and ascent, where the image seemed *stationary,* I stopped the prism, and fixed it in that posture, that it should be moved no more. —*Sir I. Newton, On Opticks.*

In astronomy a planet is said to be at its station, or to be *stationary,* when its motion in right ascension ceases, or its apparent place in the ecliptic remains for a few days unaltered.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

2. Respecting place.

The same harmony and *stationary* constitution, as it happened in many species, so doth it fall out in individuals.—*Sir T. Browne.*

Státioner. *s.*

1. Bookseller.

Such other places, where little markets are kept; as at Brussels, Lovaine, &c. I will not enter into particulars concerning such places; your own consciences are best witnesses what pernicious projects, what calumnious detractions, are there on foote: I only say, that your standing *stationers,* and assistants at your miracle-markets, and miracle-forges, are for most part of lewdest life.—*Sheldon, Miracles of Antichrist,* p. 174: 1616.

Hitherto no *stationer* has lost by me.—*Fuller.*

Some modern tragedies are beautiful on the stage, and yet Tryphon the *stationer* complains they are seldom asked for in his *shop.*—*Dryden.*

With authors, *stationers* obey'd the call;
(The field of glory is a field for all),
Glory and gain the industrious tribe provoke,
And gentle Dulness ever loves a joke.
Pope, Dunciad, ii. 31.

The company of *stationers* existed long before the invention of printing. A *stationer,* therefore, was a dealer who kept a shop or stall, as distinguished from an itinerant vendor, whether of books or broomsticks. — *Pegge, Anecdotes of the English Language,* p. 336: (2nd ed.)

2. Dealer in Stationery.

Státionery. *s.* See extract.

Stationery, a term which is not very well defined, but which is now commonly understood to desig-

nate the pens, ink, paper, wax, wafers, and other materials necessary to the writing of letters, including pen-knives, erasers, &c. Formerly the term had a wider signification, stationer and bookseller being held to be synonymous. And hence it is that the Stationers' Company formerly comprised, and continues to comprise, all the more eminent booksellers and publishers of the Metropolis. The name has no doubt been derived from the stationes (stations) that were assigned in the forum at Rome to the vendors of books, which were classed among the (sic) 'mercium vilissimarum.'— *M'Culloch, Dictionary of Commerce.*

The term *stationery* is derived from the business of booksellers having been anciently carried on entirely in stalls or stations. The *Stationery* Office in London is the medium through which all government offices, both at home and abroad, are supplied with writing materials; and at the same time it contracts for the printing of all reports and other matters laid before the House of Commons, &c. It consists of a comptroller, a storekeeper, and about thirty clerks and other subordinate officers, and has a branch establishment at Dublin.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

Státism. *s.* Policy; arts of government.

The greatest politician is the greatest fool; for he turns all his religion into hypocrisy, into *statisme*, yea into atheisme; making Christianity a very footstoole to policy.—*Junius, Sin Stigmatized*, p. 613: 1639.

Hence it is that the enemies of God take occasion to blaspheme, and call our religion *statism.*—*South, Sermons*, i. 151.

Státist. *s.* Statesman; politician; one skilled in government.

I do believe,
Statist though I am none, nor like to be,
That this shall prove a war.
Shakespear, Cymbeline, ii. 4.

Right and lawful
Was never yet found as a marginal note
In the black book of profit. I am sunk
Too low to be buoyed up, it being held
A foolish weakness and disease in *statists*,
In favour of a weak man to provoke
Such as are mighty.
Massinger, Believe as You List, i. 1.

Their orators thou then extoll'st, as those
The top of eloquence, *statists* indeed,
And lovers of their country.
Milton, Paradise Regained, iv. 353.

There was a young barrister who had written a pamphlet, and wore spectacles; there was the brother of a Liberal member; there was a *statist* in embryo; there was a leading-article man. All more or less clever—all working men, and pushing men. ... 'Have you seen The Lays of Ancient Rome?' asked somebody across the table. 'I never read poetry,' said the *statist.*—*Hannay, Singleton Fontenoy.*

Statístic. *adj.* Statistical.

Statístic. *s.* [Fr. *statistique.*] See Statistics.

Statístical. *adj.* Relating to, having the character of, constituted by, statistics.

It is scarcely worth while to discuss all the objections which the narrow views of cold-hearted *statistical* writers have suggested against the charity school of this benevolent country.—*Dr. Knox, Sermons*, xxviii. (Rich.)

In 1832 a *statistical* department was organised in the Board of Trade for preparing, classifying, and publishing official returns and information respecting the statistics of the United Kingdom and its dependencies, and also respecting foreign states. Mr. Porter was placed at the head of this department; and the numerous volumes of well digested, commodiously arranged returns he has since given to the world afford the best evidence of his zeal and industry.—*M'Culloch, The Literature of Political Economy*, p. 222: 1845.

Statístically. *adv.* In a statistical manner; by means of statistics.

'I was reading a work the other day,' said Egremont, 'that *statistically* proved that the general condition of the people was much better at this moment than it had been at any known period of history.' 'Ah! yes, I know that style of speculation,' said Gerard; 'your gentleman, who reminds you that a working man now has a pair of cotton stockings, and that Harry the Eighth himself was not as well off.'—*B. Disraeli, Sybil*, b. iii. ch. v.

Statistícian. *s.* One engaged on, employed in, interested in, statistics.

The researches, however, of the best *statisticians* fail to satisfy us.—*Hallam, View of the State of Europe during the Middle Ages*, pt. iii. ch. viii.

Statístics. *s.* That part of political philosophy which investigates the several elements of the strength and resources of a state; exhibiting the results in either actual or approximate tables; or, at any rate in a numerical form. Todd names the Statistical Account of the Population, &c., of England and Wales, by Capper, date 1801, and this is probably one of the earliest works in which the name appears. Compare the notice from Richardson. Though the etymology of the term rests on the word *state*, the numerical method involved in the application has led to its extension to other branches of knowledge, e.g. the proportion of German, Latin, French, and other words in the English language has been treated as philological statistics.

Statistick is a word for which we are said to be indebted to a living writer. *Statisticks* is applied to everything that belongs to a state, its population, soil, product, &c.—*Richardson*, in *Dictionary*: 1837.

Statistics is that department of political science which is concerned in collecting and arranging facts illustrative of the condition and resources of a state. To reason upon such facts, and to draw conclusions from them is not within the province of *statistics*; but is the business of the statesman and of the political economist. . . . It would be useless to attempt an enumeration of the various matters that are included in the province of *statistics*; but for the more convenient consideration of the subject it may be divided into:—1. Historical *statistics*, or facts illustrative of the former condition of a state; 2. *Statistics* of population; 3. Of revenue; 4. Of trade, commerce, and navigation; 5. Of the moral, social, and physical condition of the people.—*Cyclopædia of Political, Constitutional, and Forensic Knowledge*: 1849.

The earliest *statistical* calculations—apart from some vague and uncertain guesses as to the currency and population—were made for certain practical purposes, for the granting annuities and affecting insurances, i.e. the first *statistics* were what is called vital *statistics*. Such calculations illustrate better than anything else the nature of a *statistical* induction. . . . *Statistics* in foreign countries are generally supplied from the various administrative bureaux, and are, as a rule, exact and exhaustive. In England the collection of *statistics* is partly the function of government boards (and as far as these can enquire are as good as can be), and, in part, the action of individual observation or research. Thus the customs returns of exports and imports, of shipping, of trade, of railways, are supplied from the Board of Trade: that of the banks and circulation, from the Treasury: that of pauperism, from the Poor Law Board, &c. But some *statistics* of great importance are as yet withheld, or only grudgingly accorded.—*Brande and Cox, Dictionary of Science, Literature, and Art.*

Státua. *s.* [Lat.] Statue, of which it is probably the older form. *Obsolete.*

Let there be a fountain, or some fair work of *statuas*, in the middest of this court.—*Bacon, Essays, Of Building.*

The Greeks in that place raised him a *statua.*—*Sir T. Herbert, Relation of some Years' Travels into Africa and the Great Asia*, p. 242.

Crosses . . . famous for the *statuas* which were placed in them.—*Heylin, History of the Presbyterians.*

Státuary. *s.* [Fr. *statuaire.*]

1. Art of carving images or representations of life.

The northern nations, that overwhelmed it by their numbers, were too barbarous to preserve the remains of learning more carefully than they did those of architecture and *statuary.*—*Sir W. Temple.*

2. One who practices or professes the art of making statues.

As the *statuary*,
That, by the large size of Alcides' foot,
Guess'd at his whole proportion.
Beaumont and Fletcher, Prophetess.

On other occasions the *statuaries* took their subjects from the poets.—*Addison.*

How shall any man, who hath a genius for history, undertake such a work with spirit and cheerfulness, when he considers that he will be read with pleasure but a very few years? This is like employing an excellent *statuary* to work upon mouldering stone.—*Swift.*

So he [Corporal Trim] stood before my father, my uncle Toby, and Dr. Slop,—so swayed his body, so contracted his limbs, and with such an oratorical sweep throughout the whole figure,—a *statuary* might have modelled from it;—nay, I doubt whether the oldest fellow of a college,—or the Hebrew Professor himself could have mended it.—*Sterne, Tristram Shandy*, vol. i. ch. xvii.

Painters and *statuaries* were by no means a despised or an ill paid class.—*Macaulay, History of England*, ch. iii.

'Shall we be careful in our newspapers, and negligent on our tombstones? Shall we teach our peasantry spelling, and bury them without it? Shall we be learned by the fireside, and illiterate at the grave? Sir, I early perceived this rank abuse, and I exerted myself to rectify it! I put myself in communication with various *statuaries*, and engaged to supply—for a proper but moderate remuneration—proper inscriptions.'—Lepel was charmed. 'You deserve great credit, upon my honour, Mr. Lakker,' he said; 'but give me an example. Is it not difficult to deal with such a variety of persons as you must have to write epitaphs for, and, pardon me, are you not apt to repeat yourself?'—'Mankind is fallible,' said Lakker, with a sigh. 'Some people have thought so. *Statuaries*, sir, I am sorry to say, have made the observation!'—*Hannay, Singleton Fontenoy*, b. i. ch. ix.

Used *adjectivally.*

Painting and the *statuary* art, cousins germans to poetry.—*Hakewill, Apology*, p. 211.

Státue. *s.* [Fr.; Lat. *statua.*] Solid representation of any living being.

They spake not a word:
But like dumb *statues*, or unbreathing stones,
Stared each on other. *Id., Richard III.* iii. 7.

Architects propounded unto Alexander to cut the mountain Athos into the form of a *statue*, which in his right hand should hold a town capable of containing ten thousand men, and in his left a vessel to receive all the water that flowed from the mountain.—*Bishop Wilkins, Mathematical Magick.*

A *statue* of Polycletus, called the rule, deserves that name for having so perfect an agreement in all its parts, that it is not possible to find a fault in it.—*Dryden, Translation of Dufresnoy's Art of Painting.*

The difference between an animal and an automaton *statue* consists in this, that in the animal we trace the mechanism to a certain point, and then we are stopped; either the mechanism becoming too subtile for our discernment, or something else beside the known laws of mechanism taking place; whereas, in the automaton, for the comparatively few motions of which it is capable, we trace the mechanism throughout.—*Paley, Natural Theology*, ch. iii.

We have certain demonstration from Egyptian mummies, and Roman urns and rings, and measures and edifices, and many other antiquities, that human *stature* has not diminished for above two thousand years.—*Bentley, Sermons.*

J. Hall, Poems, p. 93: 1646.

Státus. *s.* [Lat.] State: (chiefly used in the ablative case with the relative pronoun, i.e. as *in statu quo*; this being part of a longer combination, i.e. *in statu quo ante bellum* = state as before the war. It was used originally in treaties, whereby the belligerents held the same possessions as they had before the war. It is now applied more generally; and sometimes in the nominative case).

Swift, in his masterly argument 'Against Abolishing the Christian Religion,' urges, not without pathos, that innumerable men of wit, enjoying a comfortable *status*, by virtue of jokes on the Catechism, would hereby be left without pabulum, the staff of life cut away from their hand.—*Carlyle, Critical and Miscellaneous Essays, Diderot.*

There was a *statute* against vagabonds; wherein note the dislike the parliament had of gaoling them as chargeable and pesterous.—*Bacon.*

Know the *statutes* of heaven and laws of eternity, those immutable rules of justice.—*Archbishop Tillotson.*

We have already seen, that a foundation was laid in the *statute* of provisors under Edward III. In the next reign, many other measures tending to repress the interference of Rome were adopted, especially the great *statute* of præmunire, which subjects all persons bringing papal bulls for translation of bishops and other enumerated purposes into the kingdom to the penalties of forfeiture and perpetual imprisonment. . . . Combined with the *statute* of provisors, it put a stop to the pope's usurpation of patronage, which had impoverished the church and kingdom of England for nearly two centuries. Several attempts were made to overthrow these enactments; the first parliament of Henry IV. gave a very large power to the king over the *statute* of provisors, enabling him even to annul it at his pleasure. This however does not appear in the *statute-book*.—*Hallam, View of the State of Europe during the Middle Ages*, pt. ii. ch. vii.

Státute-book. *s.* Book of statutes.

Colman and D. Garrick, The Clandestine Marriage*, iii. 1.

Státute-mérchant. *s.* See extract from Blount.

Statute-merchant [is] a bond acknowledged before one of the clerks of the *statutes-merchant*, and mayor of the staple, a chief warden of the citie of London, or two merchants of the said city, for that purpose assigned; or before the mayor, chief warden, or master, of other cities or good towns, or other sufficient men for that purpose appointed; sealed with the seal of the debtor and the king, which is of two pieces; the greater is kept by the said merchant, &c., and the less by the said clerk.—*Blount.*

Státute-roll. *s.* Enrolled statute.

In the second year of Richard II., the council, after hearing read the *statute-roll* of an act recently passed, confirming a criminal jurisdiction in certain cases upon justices of the peace, declared that the intention of parliament, though not clearly expressed therein, had been to extend that jurisdiction to certain other cases omitted, which accordingly they caused to be inserted in the commissions made to these justices under the great seal.—*Hallam, View of the State of Europe during the Middle Ages*, pt. iii. ch. viii.

Státutory. *adj.* Enacted by statute.

In the formulary and *statutory* part of law a plodding blockhead may excel; but in the ingenious and rational part of it, a plodding blockhead can never excel.—*Dr. Johnson*, in *Boswell's Life* (under 1766).

It is, on the whole, expedient that the *statutory* maximum should so far exceed the ordinary rates as to allow of a certain elasticity of administration; and there is little doubt that within a few years the tariffs of all railways will virtually be largely reduced by the incessant fall in the value of gold.—*Saturday Review*, August 22, 1868, p. 249.

Staunch. *adj.* See Stanch.

Stave. *s.* [Word for word this is *staff*, under the eighth sense of which this latter word may be found, with the meaning given in the present entry. With the word, however, now under notice, the *current* singular form always ends in *-ve*, never in *-ff*.] Metrical division in a poem. See extract, in which the import of the term is more specific and precise than is the case in ordinary language; where it is generally recognized that the stanza consists of more *staves* than one. That the *stave* is, in general, a shorter division than the stanza and strophe is much as may be safely said.

A *stave* is a portion of a song or poem, containing a given number of verses, arranged according to some given law, and ending with a period, or at least with some important division of a sentence. When two or more *staves* are knit together into one, the compound *stave* thence resulting may be called a stanza—a name that seems to have been first applied to the compound Italian *staves*, which came into fashion during the sixteenth century. . . . The classical *staves*, which admitted variety of verse (the Sapphic and Alcaic for instance), though some of them were well known during the middle ages, seem to have had but little influence on the modern versification of Europe. The later Latin poets generally preferred those *staves*, which contained only one description of verse. In the church-hymns, the iambic trimeter is always in *staves* of four verses; the imperfect trochaic tetrameter almost always in *staves* of three; the Asclepiad in *staves* of four; and the iambic trimeter in *staves* of five. All these *staves* were used in 'rhythmus;' and it is probable that the *stave* of four verses, with eight syllables to the verse, now so common throughout Europe, may represent the first; and some of our tumbling *staves* of four verses, with continuous rhyme, the third of these classical combinations. Speculations, however, of this kind require extreme caution.—*Dr. Guest, History of English Rhythms*, b. iv. ch. i.

Stave. *v. a.*

The condition of a servant *staves* him *off* to a distance; but the gospel speaks nothing but allurement, attraction, and invitation.—*South, Sermons.*

Always more inclined to *stave off* an immediate difficulty by some patch-work scheme of modifications and suspensions, than to consult for posterity in the comprehensive spirit of legal philosophy, we accumulate statute upon statute, and precedent upon precedent, till no industry can acquire, nor any intellect digest the mass of learning that grows upon the panting student.—*Hallam, View of the State of Europe during the Middle Ages.*

Stavesacre . . . is with great difficultie preserved in our cold countries, albeit in some milde winters I have kept it covered over with a little fern, to defend it from the injury of the March winde, which doth more harme unto plants that come forth of hot countries, than doth the greatest frosts. It floureth in June, and the seed is ripe the second yeare of his sowing. . . . The seeds of *stavesacres* are extreame hot, almost in the fourth degree, of a biting burning quality.—*Gerarde, Herball*, p. 495: 1633.

2. As applied in mechanics from its elasticity.
Men have crossed oceans by *steam,* the Birmingham fire-king has visited the fabulous East; and the genius of the Cape, were there any Camoens now to sing it, has again been alarmed, and with far stranger thunder than Gama's. There is no end to machinery. Even the horse is stripped of his harness, and finds a fleet firehorse yoked in his stead. Nay, we have an artist that hatches chickens by steam; the very brood hen is to be superseded.—*Carlyle, Critical and Miscellaneous Essays, Signs of the Times.*
During many years after the invention of the barometer and the consequent discovery of atmospheric pressure, the boiling-point of a liquid was defined to be the temperature at which its evaporating tendency is equal to the common pressure of the atmosphere, or the lowest temperature at which its vapour can have the elasticity of common air. About the middle of the last century it was noticed by several distinguished Fellows of the Society that the boiling-point of water under a constant pressure varies within certain limits, according to the depth to which the thermometer is plunged into the boiling liquid. In the Report on Thermometers published in the Transactions for 1777, it was stated that the *steam* from boiling water fairly represents the atmospheric pressure; and it was recommended that, in determining the boiling-point, the water be boiled in a metal vessel constructed so as to allow the bulb, and nearly the whole of that part of the stem that contained mercury, to be surrounded by the *steam.* In the fine experiments undertaken by Dalton, Watt, Robison, Southern, and others for determining the pressures of saturated *steam* at different temperatures above and below the standard boiling-point, it was noticed that if a minute portion of soda or of some salt soluble in water, and not capable of rising in vapour with it, be allowed to ascend to the top of the mercury, the column rises, thereby indicating a diminished pressure of *steam.* The adhesion of the soda to the water tends to restrain the water from evaporating, and thus the steam-emitting tension of a solution of soda is measurably less than that of pure water at the same temperature. . . . In 1803 De Luc stated, in very precise terms, that boiling is produced by the bubbles of air which the heat disengages from the liquid. If the water be completely purged of air it cannot boil, because *steam* can only form on free surfaces, such as the air-bubbles present. Deprived of air, water can boil only on the upper or free surface. Water in a tube from which the air had been carefully expelled was raised to 234½°F. without boiling.—*C. Tomlinson, On the Action of Solid Nuclei in Liberating Vapour from Boiling Liquids, Proceedings of the Royal Society, January* 21, 1869.
2. Energy in general.
The two Miss Pecksniffs being a pretty good match for the three Miss Chuzzlewits, and all five young ladies having, in the figurative language of the day, a great amount of *steam* to dispose of, the altercation would no doubt have been a long one but for the high valour and prowess of the strong-minded woman, who, in right of her reputation for powers of sarcasm, did so belabour and pummel Mrs. Spottletoe with taunting words that that poor lady, before the engagement was two minutes old, had no refuge but in tears.—*Dickens, Martin Chuzzlewit,* ch. iv.

Steaming up, a lamentation and an ancient tale of wrong,

Stéarate. *s.* In *Chemistry.* See under Stearic.

Stéaric. *adj.* [Gr. στέαρ, gen. στέατος = fat.] In *Chemistry.* Term applied to one of the acids which constitute fat; viz. the one which most conduces to its solid (the *oleic* being the one which conduces to its fluid) character. The salts of *stearic* acid are the *stearates.*
Stearic acid, improperly called *stearine,* is the solid constituent of fatty substances, as of tallow and olive oil, converted into a crystalline mass by saponification with alkaline matter, and abstraction of the alkali by an acid. By this process fat is convertible into three acids called *stearic,* margaric, and oleic; the first two being solid, and the last liquid. The stearine, of which factitious wax candles are made, consists of the *stearic* and margaric acid combined. These can be separated from each other only by the agency of alcohol, which holds the margaric acid in solution after it has deposited the *stearic* in crystals.—*Ure, Dictionary of Arts, Manufactures, and Mines.*
Stearic acid forms both neutral and acid salts. The *stearates* of the alkalies are soluble in water, alcohol, and ether; but when the aqueous solutions of the neutral compounds are largely diluted, they deposit flakes of the acid *stearate.* The *stearates* of the alkaline earths may be obtained by double decomposition, from bistearate of potash: they are insoluble. *Stearate* of potash is the basis of soft soap, and *stearate* of soda of the principal hard soaps: these *stearates* are separated from their solutions in water by excess of alkali, and also by chloride of sodium and some other salts. *Stearate* of lead is the basis of lead-plaster.—*Frankland,* in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Stéarin. *s.* In *Chemistry.* Common name for Stearic acid; this being a substance of which the acid character is determined by the way in which it comports itself with the alkalis in saponification (soap-making) rather than its sensible qualities; stearic acid with a certain mixture of glycerin and margarin.
The acid may be obtained by decomposing a soluble *stearin* soap by tartaric acid, and purifying the product by solution in boiling alcohol, from which it separates in crystalline flakes; it may be further purified by solution in ether. It is white, inodorous, and tasteless, but it reddens litmus. It fuses at about 160°, and may be distilled in vacuo, but when highly heated in the air it undergoes more or less change. Stearic acid may be distinguished from *stearin* by its ready solubility in a boiling solution of potash.—*Frankland,* in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Stéatite. *s.* In *Mineralogy.* Soapstone.

Steatite is a mineral of the magnesian family. It has a greyish-white or greenish-white colour, often marked with dendritic delineations, and occurs massive, as also in various supposititous crystalline forms; it has a dull or fatty lustre; a coarse splintery fracture, with translucent edges; a shining streak; it writes feebly; is soft, and easily cut with a knife, but somewhat tough; does not adhere to the tongue, feels very greasy; infusible before the blowpipe; specific gravity from 2.6 to 2.8. It consists of—silica, 44; magnesia, 44: alumina, 2; iron, 7.3; manganese, 1.5: chrome, 2; with a trace of lime. It is found frequently in small contemporaneous veins that traverse serpentine in all directions, as in Portsoy, in Shetland, in the limestone of Icolmkiln, in the serpentine of Cornwall, in Anglesey, in Saxony, Bavaria (at Bayreuth), Hungary. &c. It is used in the manufacture of porcelain. It makes the biscuit semi-transparent, but rather brittle, and apt to crack with slight changes of heat. It is employed for polishing serpentine, marble, gypseous alabaster, and mirror glass, as the basis of cosmetic powders, as an ingredient in anti-attrition pastes: it is dusted in powder upon the inside of boots, to make the feet glide easily into them; when rubbed upon grease-spots in silk and woollen clothes, it removes the stains by absorption, it enters into the composition of certain crayons, and is used itself for making traces upon glass, silk, &c. The spotted *steatite*, cut into cameos and calcined, assumes an onyx aspect. Soft *steatite* forms excellent stoppers for the chemical apparatus used in distilling or subliming corrosive vapours. Lamellar *steatite* is talc.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Steatite [is] a massive variety of talc, with a smooth greasy feel, like that of suet, and so soft as to yield to the nail. It is a hydrated silicate of magnesia, and is found near the Lizard Point in Cornwall, at Glyder Rock, and Moel Siabod in Carnarvonshire, Portsoy in Banffshire, Canada, &c. *Steatite* is a material much used in China for carving into grotesque figures; and slabs of the same stone are, from their refractory nature, employed for lining ovens and furnaces. It is also made into gas-burners, which possess the advantage of not corroding or becoming stopped up.—*Frankland,* in *Brande and Cox, Dictionary of Science, Literature, and Art.*

Steatóma. *s.* [Gr. στέαρ, -ατος.] In *Pathology.* Species, or variety, of tumour, so-called from its fatty, or suety, character.

If the matter in a wen resembles milk curds, the tumour is called atheroma; if like honey, melicerís; and if composed of fat, *steatoma.*—*Sharp, Surgery.*

Steatómatous. *adj.* Having the character of a steatoma.

Steatomatous growths may be attached to either the internal or the external surface of the uterus.—*Cooper, Surgical Dictionary, Tumours.*

Diamonds, though hard bodies, will not readily strike fire with *steel,* much less with one another; nor a flint easily with a *steel,* if they both be wet; the sparks being then quenched in their eruption.—*Sir T. Browne, Vulgar Errours.*

Both were of shining *steel,* and wrought so pure
As might the strokes of two such arms endure.
Dryden, Palamon and Arcite, ii. 175.

Steel is made from the purest and softest iron, by keeping it red hot, stratified with coal-dust and wood-ashes, or other substances that abound in the phlogiston, for several hours in a close furnace.—*Sir J. Hill, Materia Medica.*

[*Steel* is] iron, refined and purified by the fire with other ingredients, which renders it white, and its grain closer and finer than common iron. *Steel,* of all other metals, is that susceptible of the greatest degree of hardness, when well tempered, whence its great use in the making of tools and instruments of all kinds.—*Chambers.*

The good quality of *steel* is shown by its being homogeneous, being easily worked at the forge; by its hardening and tempering well, by its resisting or overcoming forces, and by its elasticity. To ascertain the first point, the surface should be ground and polished on the wheel, when its lustre and texture will appear. The second test requires a skilful workman to give it a heat suitable to its nature and state of conversion. The size and colour of the grain are best shown by taking a bar forged into a razor form, hardening and tempering it, and then breaking off the thin edge in successive bits with a hammer and anvil. If it had been fully ignited only at the end, then, after the hardening, it will display on fracture a succession in the aspect of its grains from that extremity to the other, as they are whiter and larger at the former than the latter. The other qualities become manifest on filing the *steel*; using it as a chisel for cutting iron, or bending it under a heavy weight.—*Ure, Dictionary of Arts, Manufactures, and Mines.*

Steel principally differs from wrought iron in containing a certain amount of combined carbon, and in being susceptible of having its hardness much increased by being first strongly heated, and then suddenly cooled in water. *Steel* is also much more brittle than ordinary iron; but less so than crude or pig iron, which, besides containing a larger per centage of carbon, is, moreover, to a greater or less degree, combined with other impurities.—*J. A. Phillips, Manual of Metallurgy,* p. 304: 1852.

As the *first element* in a *compound.*

At her back a bow and quiver gay,
Stuff'd with *steel-headed* darts wherewith she quell'd
The savage beasts in their victorious play. *Spenser.*

With mighty bars of long-enduring brass
The *steel-bound* doors and iron gates he ties.
Fairfax.

Used *adjectivally.*

A lance then took he, with a keene *steel* head,
To be his keepe off, both 'gainst men and dogges.
Chapman.

2. Weapons or armour.

Brave Macbeth with his brandish'd *steel,*
Which smoked with bloody execution,
Carved out his passage till he had faced the slave.
Shakespear, Macbeth, i. 2.

He sudden as the word,
In proud Plexippus' bosom plunged the sword;
Toxeus amazed, and with amazement slow,
Or to revenge or ward the coming blow,
Stood doubting; and while doubting thus he stood
Received the *steel* bathed in his brother's blood.
Dryden, Translation from Ovid, Meleager and Atalanta.

Knights were knights then; God mend the age, say I!
True as the *steel* upon their backs were they,
And their one lady's word was gospel law.
H. Taylor, Philip van Artevelde, Part I. ii. 3.

3. Chalybeate medicines.

After relaxing, *steel* strengthens the solids, and is likewise an antiacid.—*Arbuthnot.*

4. It is used proverbially for hardness: (as, heads of *steel*).

Steel. *v. a.*

Add proof unto mine armour with thy prayers,
And with thy blessings *steel* my lance's point.
Shakespear, Richard II. i. 3.

2. Make hard or firm.

Lies well *steel'd* with weighty arguments.
Shakespear, Richard III. i. 1.

So service shall with *steeled* sinews toil,
And labour shall refresh itself with hope.
Id., Henry V. ii. 2.

From his metal was his party *steel'd*;
Which, once in him rebated, all the rest
Turn'd on themselves, like dull and heavy lead.
Id., Henry IV. Part II. i. 1.

O God of battles! *steel* my soldiers' hearts,
Possess them not with fear. *Id., Henry V.* iv. 1.

Why will you fight against so sweet a passion,
And *steel* your heart to such a world of charms?
Addison.

Man, foolish man!
Scarce know'st thou how thyself began;
Scarce hast thou thought enough to prove thou art;
Yet *steel'd* with study'd boldness, thou darest try
To send thy doubted reason's dazzled eye
Through the mysterious gulph of vast immensity.

Let the *steeled* Turk be deaf to matrons' cries,
See virgins ravished with relentless eyes. *Tickell.*

Steéler. *s.* See extract.

Steeler, in ship-building, [is] a name given to the foremost or aftermost plank, in a strake which drops short of the stem and stern-post, and of which the end or butt nearest the rabbet is wrought very narrow, and well forward or aft. Its use is to take out the sny ing-edge occasioned by a full bow, or sudden circular buttock.—*Rees, Cyclopædia.*

Steéliness. *s.* Attribute suggested by Steely.

Their nurture and education in the soft and warm bosom of that pacifick age, had so far temper'd the natural *steeliness* of their metal as it turn'd edge.—*Christian Religion's Appeal,* p. 70. (Ord MS.)

Steéling. *verbal abs.* See extract; case hardening.

Steeling, in cutlery, [is] the laying on a piece of steel upon a larger mass of iron, to make that part which is to receive the edge harder than the rest. The body of an axe may very well be of iron, as it never comes into use to cut with, and perhaps is stronger, and less liable to break, than if of steel; but it must have a quantity of steel at that part where the edge is to be made.—*Rees, Cyclopædia.*

Steély. *adj.*

1. Abounding in, having the character, nature, or qualities of, steel: (applied to certain varieties of iron).

To prepare *steely* iron by the Catalan method, the founder greatly diminishes the quantity of siftings which are usually strewed on the fire during the process of smelting, and takes care to run off the clinkers very frequently, in order to diminish the decarburetting influence on the metal.—*J. A. Phillips, Manual of Metallurgy,* p. 311: 1852.

2. Made with steel. *Rare.*

Thy brother's blood the thirsty earth hath drunk,
Broach'd with the *steely* point of Clifford's lance.
Shakespear, Henry VI. Part III. ii. 3.

Like polished mirrors, so his *steely* breast
Had every figure of her woes expressed.
Marvel, On the Death of the Lord Protector.

Here smokes his forge, he bares his sinewy arm,
And early strokes the sounding anvil warm;
Around his shop the *steely* sparkles flew,
As for the steed he shaped the bending shoe.
Gay, Trivia, i. 253.

3. Hard; firm; unmoved; unfeeling.

Steélyard. *s.* Balance, in which the weight is moved along an iron rod, and grows heavier as it is removed farther from the fulcrum.

Hither your *steelyards,* butchers, bring to weigh
The pound of flesh Antonio's bond must pay!
Warton, Prologue on the Winchester Playhouse.

The muscle at the shoulder, by which the arm is raised, is fixed nearly in the same manner as the load is fixed upon a *steelyard,* within a few decimals, we will say, of an inch from the centre upon which the *steelyard* turns.—*Paley, Natural Theology,* ch. ix.

Steéning. *s.* [*stone.*] See extract.

Steening [is] brickwork laid dry (that is without mortar) used for forming the cylindrical shaft of a well or cesspool, whose office is to prevent the irruption of the surrounding soil.—*Rees, Cyclopædia.*

Steénkirk. *s.* [see extracts; Disraeli giving the Dutch, Macaulay the German, form.] Name brought into fashion after the Battle of Steenkirk for several articles of dress and its adjuncts; wigs, buckles, and powders; chiefly, however, applied to large, elaborately ornamented, neckties.

A quaker is prouder of his diminutive cravat, than a beau of his *steenkirk.*—*Laconicks,* &c. p. 53: 1701.

As for ruffles and *steenkirks,* they were never added in the very splendor and luxury of the empire!—*King, Miscellanies,* p. 221.

Fashions have frequently originated from circumstances as silly as the following one. Isabella, daughter of Philip II. and wife of the Archduke Albert, vowed not to change her linen till Ostend was taken; this siege, unluckily for her comfort, lasted three years; and the supposed colour of the archduchess's linen gave rise to a fashionable colour, hence called 'L'isabeau,' or the Isabella; a kind of whitish-yellow-dingy. Sometimes they originate in some temporary event: as after the battle of *Steenkirk,* where the allies wore large cravats, by which the French frequently seized hold of them, a circumstance perpetuated on the medals of Louis XIV., cravats were called *Steenkirks*; and after the battle of Ramillies, wigs received that denomination.—*I. Disraeli, Curiosities of Literature, Anecdotes of Fashion.*

The people lined the roads to see the princes and nobles who returned from *Steinkirk.* The jewellers devised *Steinkirk* buckles: the perfumers sold *Stein-*

kirk powder. But the name of the field of battle was peculiarly given to a new species of collar. Lace neckcloths were then worn by men of fashion; and it had been usual to arrange them with great care. But at the terrible moment when the brigade of Bourbonnais was flying before the onset of the allies, there was no time for foppery; and the finest gentlemen of the Court came spurring to the front of the line of battle with their rich cravats in disorder. It therefore became a fashion among the beauties of Paris to wear round their necks kerchiefs of the finest lace studiously disarranged; and these kerchiefs were called *Steinkirks*.—*Macaulay, History of England*, ch. xix.

Steep. *v. a.* [Provincial German, *stippen*.] Soak; macerate; imbue; dip.

Four days will quickly *steep* themselves in nights;
Four nights will quickly dream away the time.
Id., Midsummer-Night's Dream, i. 1.

When flowing cups run swiftly round,
With no allaying Thames,
Our careless heads with roses bound,
Our hearts with loyal flames;
When thirsty grief in wine we *steep*,
When healths and draughts go free,
Fishes that tipple in the deep
Know no such liberty.
Lovelace, Lines to Althæa from Prison.

Whole droves of minds are by the driving god

As that Theban monster that proposed
Her riddle, and him, who solved it not, devour'd;
That once found out and solved, for grief and spight
Cast herself headlong from the Ismenian *steep*.
Milton, Paradise Regained, iv. 572.

As high turrets for their airy *steep*
Require foundations in proportion deep;
And lofty cedars as far upwards shoot
As to the nether heavens they drive the root,
So low did her secure foundation lie;
She was not humble, but humility.
Dryden, Eleonora, 91.

Leaning o'er the rails, he musing stood,
And view'd below the black canal of mud,
Where common shores a lulling murmur keep,
Whose torrents rush from Holborn's fatal *steep*.

Uprose the king of men with speed,
